

## Council Considers Proposed Korumburra Town Centre Streetscape Masterplan

After receiving 73 submissions while on exhibition, South Gippsland Shire Council will consider the proposed Korumburra Town Centre Streetscape Masterplan at its meeting on the 25 May 2016.

The aim of the Korumburra Town Centre Streetscape Masterplan is to enhance the safety, attractiveness and practicality of Korumburra's Town Centre along Commercial Street and Bridge Street intersection.

Submissions have been analysed for level of support and priority rating from the Korumburra community.

The final version incorporates both significant reconfigurations and minor alterations as suggested by the feedback received.

The plan has been refined and considered by an independent road safety audit and VicRoads.

The report to Council will outline the level of support received for different aspects of the masterplan, what changes were made for the final version and what improvements are expected from the proposals if they are endorsed.
