

## Council Adopts Korumburra Town Centre Streetscape Masterplan

South Gippsland Shire Council adopted the Korumburra Town Centre Streetscape Masterplan at its meeting on Wednesday.

The masterplan provides traffic and pedestrian safety enhancements with visual appeal and functionality improvements along Commercial Street from Bridge Street to King Street.

The masterplans aim to address key themes of feedback received from the community including pedestrian safety and accessibility, visual amenity, pedestrian and traffic flows and public open space.

Minimal disruption to existing infrastructure is expected through the changes to traffic movement and parking.

The project will now advance to detailed design which will provide clear plans for project delivery and construction.

South Gippsland Mayor, Cr. Bob Newton said it was promising to see the project advance to the next stage after extensive public consultation.

“The Korumburra Town Centre Streetscape Masterplan provides the necessary steps to create a town centre for Korumburra that the whole community can enjoy.

“The project has received a number of submissions from the public during its consultation and we thank them for providing their feedback and support.

“By increasing the functionality, safety and visual amenity of the area we invest in community pride and provide a town centre that is welcoming to both residents and visitors alike,” said the Mayor.

Council will now seek further comment from the community on the masterplan for consideration in the detailed design phase of the project.

Individuals wishing to view the masterplan and make a submission can visit [www.southgippsland.vic.gov.au/korumburra-streetscape-masterplan](http://www.southgippsland.vic.gov.au/korumburra-streetscape-masterplan).
