

## Anderson Street Under Construction

Works have commenced on the Anderson Street Town Entrance Project this week by Council's appointed contractor ADA Constructions.

The \$800,000 construction project will include:

- Stormwater drainage improvements
- Better direction of traffic for improved flow
- Asphaltting of gravelled areas
- Improved visual amenity

Anderson Street forms Stage One of the Leongatha Revitalisation Project, to be followed by the Bair Street Commercial Precinct Redevelopment and the Railway Site Transformation projects subject to available funding.

Council appreciates the patience of motorists in the area as minor traffic delays will be expected during the works.

South Gippsland Shire Council's Engineering Coordinator Paul Challis was pleased the works could begin on the project.

"It is great to see ADA Constructions out this week beginning on the Anderson Street Town Entrance Project.

"The project is a key stage of the Leongatha Revitalisation Project and marks the beginning of works that will significantly improve the amenity in the area.

"These works complement the Leongatha Heavy Vehicle Alternate Route and will promote motorist safety," said Mr Challis.

The project is expected to be completed in 12 weeks with weather permitting.
