## CONDITIONS RATINGS

Council regularly reviews the condition data of all its assets, including swimming pools. The following table states the intervention level for Council to consider renewing assets at the different facilities. For example, if the pump shed at Mirboo North reached Condition 4 it would be included in the Renewal Program as part of Council's annual capital works program.

The condition ratings are used to guide Councils renewal program and are summarised below.

CONDITION RATINGS		
Scale		
0	New Asset	New
1	All components are in near new condition with no obvious signs of wear.	Very Good
2	All components are in very good condition with limited signs of wear. Components do not require any special attention.	Good
3	Component(s) are in generally good condition with some evidence of minor failure or deterioration in local spots. Component(s) require some planned maintenance to prevent further deterioration and to return it to a very good condition.	Fair
4	Evidence of significant failure/or deterioration in multiple locations. Component(s) require major maintenance to prevent further deterioration and to return it to a very good condition.	Poor
5	Multiple components are in need of major repair and referred to the capital works program for renewal / disposal.	Very Poor

## Condition Ratings of Aquatic Facility Components

The following table provides a detailed condition rating on the individual structures and components at each location.
