

## Road Safety Mapping for South Gippsland Cyclists

South Gippsland Shire Council is inviting all bike riders to participate in the largest road safety mapping program for cyclists and other road users in South Gippsland.

A community engagement website has been developed that will allow users to identify road safety issues that need improvement on a map and also provide positive feedback for good cycling connections.

All community members are invited to an official launch of the website which will be held on Thursday 25 July from 1.00pm at the Foster Men's Shed with a live demonstration.

Following the launch, the website will be made available from Council's website [www.southgippsland.vic.gov.au](http://www.southgippsland.vic.gov.au)

Community members will have until 31 October to provide their feedback and contribute to the overall website.

South Gippsland Shire Council's Road Safety Awareness Officer John Ernst was proud that the website was ready for the launch.

"The South Gippsland Safe Cycling website is an exciting opportunity to make cycling safer for our community members, their family and friends.

"I look forward to the official launch and cannot wait to start receiving feedback from our passionate cycling residents and the wider community.

"This valuable feedback will help determine where we can improve cycling experiences in our region and understand where further planning may be necessary," said Mr Ernst.

Those wishing to attend the launch event are encouraged to RSVP to John Ernst at [johne@southgippsland.vic.gov.au](mailto:johne@southgippsland.vic.gov.au)
