# **Restructure Plans for Old and Inappropriate Subdivisions in South Gippsland Shire August 2019**

This document is incorporated at Clause 72.04 of the South Gippsland Planning Scheme as **Restructure Plans for Old and Inappropriate Subdivisions in South Gippsland Shire August 2019** to inform Clause 45.05 – Restructure Overlay, Schedules 1 to 21, and the Schedule to Clause 51.01 – Specific Sites and Exclusions.

## **Restructure Plans for Old and Inappropriate Subdivisions in South Gippsland Shire August 2019**

### **1.0 Preamble**

This document is incorporated into the South Gippsland Planning Scheme, pursuant to Clause 72.04 (Documents Incorporated into this Planning Scheme), as *Restructure Plans for Old and Inappropriate Subdivisions in South Gippsland Shire August 2019*. The document applies to land affected by the Restructure Overlay. It is to be used when assessing planning applications on land where a Restructure Overlay applies.

If there are any inconsistencies between the specific controls in this Incorporated Document and any other provision of the South Gippsland Planning Scheme, the specific controls in this Incorporated Document will prevail.

### **2.0 Background Information**

Application of the Restructure Overlays to old and inappropriate subdivisions is a means of managing existing subdivided areas which, if not appropriately managed, would have serious environmental, servicing and social impacts (including environmental risk to the community) as well as the potential for amenity conflict with existing agricultural uses and the proliferation of dwellings in inappropriate areas.

This document relates largely to historically envisaged railway and port settlements, former coal mining townships and State Government land settlement schemes from the late 19<sup>th</sup> century. For completeness, the document also includes the Venus Bay Restructure Plans which previously existed in the planning scheme.

The document also seeks to identify redundant, disused road reserves to be consolidated so as to form larger lots in an orderly manner. Their existing condition and need for future planning has been taken into account. For example, many of these roads have not been made and are not required for access to a lot or the coast.

### **3.0 Objectives of this Incorporated Document**

To manage the subdivision, use and development of Restructure Overlay areas to:

- Prevent the further fragmentation of landholdings and reduce the number of small and inappropriately located lots in Restructure Overlay areas by encouraging the subdivisional restructuring and consolidation of multiple-lot landholdings.
- Minimise adverse environmental effects and risks, minimise adverse impacts on surrounding agricultural activity, minimise adverse impacts on agricultural, landscape and water catchment values, and reduce community servicing inefficiencies, resulting from dwelling development in old and inappropriate subdivisions.
- Encourage the closure of redundant, disused road reserves and their subsequent consolidation into adjoining agricultural land within the identified Restructure Lots, particularly where these road reserves are centrally located.

## 4.0 Restructure Plans

The Restructure Plans at Section 7.0 apply to all land affected by the Restructure Overlay (RO). There is a separate Restructure Plan for each of the 21 areas which is listed in the Schedule to the Restructure Overlay. Individual Restructure Lots and their corresponding Restructure Lot numbers are identified in the Restructure Plans. The table attached to each individual Restructure Plan forms part of the Restructure Plan.

## 5.0 Specific Sites and Exclusions that apply under Schedule to Clause 51.01

The Schedule to Clause 51.01 of the South Gippsland Planning Scheme provides site specific requirements relating to the use and development of land contained within the *Restructure Plans for Old and Inappropriate Subdivisions in South Gippsland Shire August 2019*. These provisions apply to all Restructure Overlay areas identified in this Incorporated Document.

The site specific provisions listed in this document apply in addition to the provisions of any zone, overlay or other planning scheme requirement which affects the specified property. As noted in Section 1.0, to the extent of any inconsistency, the provisions of the site specific controls prevail.

For clarity, it is noted that the Incorporated Document does not:

- Exclude the need for a planning permit where this is required elsewhere in the South Gippsland Planning Scheme;
- Override Clause 63 Existing Use Rights (i.e. consolidation is not required to continue the use or to construct or carry out the buildings and works associated with a replacement dwelling allowed under Clause 63).

### Expiry of 'Specific Sites and Exclusions' provisions

The above listed 'Specific Sites and Exclusions' provisions will expire 1 January 2065 unless otherwise extended.

## 5.1 All Lots

### Development of land controls

The requirements of Clause 45.05-2 Dwellings and other buildings in the Restructure Overlay are varied as follows:

- A permit is not required to:
  - Extend an existing habitable building provided the gross floor area of the additions does not exceed 100 square metres.
  - Construct a non-habitable building associated with an existing dwelling provided the gross floor area of the building does not exceed 100 square metres.
  - Construct a non-habitable agricultural building provided that one side is open.
  - Construct a non-habitable building undertaken by or on behalf of a public authority.

It is noted that the Restructure Overlay does not trigger a planning permit for works, only for buildings.

### Subdivisions

The requirements of Clause 45.05-1 Subdivision in the Restructure Overlay are varied as follows:

- A permit may be granted to allow land to be consolidated or subdivided in a form which varies from the Restructure Lot boundaries shown on a Restructure Plan, only where the variation from the Restructure Plan:
  - Is generally in accordance with the Restructure Plan;
  - Ensures disused road reserves are incorporated into Restructure Lots to the maximum extent possible; and
  - Will not increase the number of dwelling entitlements or number of lots allowed by the Restructure Plan.

Such a permit may be granted where a disused road reserve that separates one or more Restructure Lots is included in Restructure Lots in a manner different to the Restructure Lot plans at Section 7.0 subject to the agreement of the authority responsible for the disused road reserve and adjoining land owners and consideration of future access needs including access to lots and to the coastline.

### Application Requirements

An application for a permit on land where the Restructure Overlay applies must be accompanied by the following information, as appropriate:

- A site analysis that outlines notable features of the Restructure Lot site and surrounding area including topography (one metre contour intervals required on maps), vegetation, proposed and existing buildings and works, roads (made and unmade), utility services, easements, soil type and other relevant features.
- The availability of infrastructure, including legal access and roadways; utility services, including sewerage, water, drainage, electricity, gas and telecommunications.
- Details of agricultural activities occurring on adjoining land and how a new dwelling will not affect, or be affected by these activities.
- Evidence of a Consolidated Plan title or evidence of ownership approval for lots to be consolidated in accordance with the relevant Restructure Plan listed in the Schedule to Clause 45.05 Restructure Overlay.

An application to vary the Restructure Lot boundaries shown on a Restructure Plan must be accompanied by:

- The written views and / or agreement of the authority responsible for the ownership of the road reserve and adjoining landowners as relevant; and
- A written statement explaining the reasons for the proposed changes to the Restructure Lot boundaries and how they respond to the objectives at Section 3.0.

## **5.2 Type A Lots (Single Dwelling Lots with Section 2 Uses and Accommodation Restricted)**

### Use of land controls

The requirements of Tables of Uses in the Farming Zone (Clause 35.07-1) and Rural Activity Zone (Clause 35.08-1) are varied as follows:

- Dwelling is a Section 1 use (permit not required) subject to the following conditions:

- The land has been consolidated or subdivided in accordance with the Restructure Plan or otherwise consolidated /or subdivided to the satisfaction of the Responsible Authority, and
- Must be the only dwelling on the approved consolidated or subdivided lot.

If these conditions are not met, the use is prohibited (Section 3 use).

- Any use of land for which a planning permit is required (Section 2 use) must not be approved until the land has been consolidated or subdivided in accordance with the Restructure Plan, or otherwise consolidated or subdivided to the satisfaction of the Responsible Authority.

The requirements of the Tables of Uses in the Township Zone (Clause 32.05-2), Public Park and Recreation Zone (Clause 36.02-1) and Public Conservation and Resource Zone (Clause 36.03-1) are varied as follows:

- Any use of land for which a planning permit is required (Section 2 use) must not be approved until the lot has been consolidated or subdivided in accordance with the Restructure Plan identified at Section 7.0, or otherwise consolidated or subdivided to the satisfaction of the Responsible Authority.

### **5.3 Type B Lots (Accommodation Prohibited)**

#### Use of land controls

The requirements of Tables of Uses in the Farming Zone (Clause 35.07-1) and Rural Activity Zone (Clause 35.08-1) are varied as follows:

- The use of land for Accommodation is prohibited (Section 3 use).

The requirements of the Tables of Uses in the Township Zone (Clause 32.05-2), Public Park and Recreation Zone (Clause 36.02-1) and Public Conservation and Resource Zone (Clause 36.03-1) are varied as follows:

- The use of land for Accommodation is prohibited (Section 3 use).

## 6.0 Restructure Overlay Areas

**Table 1**

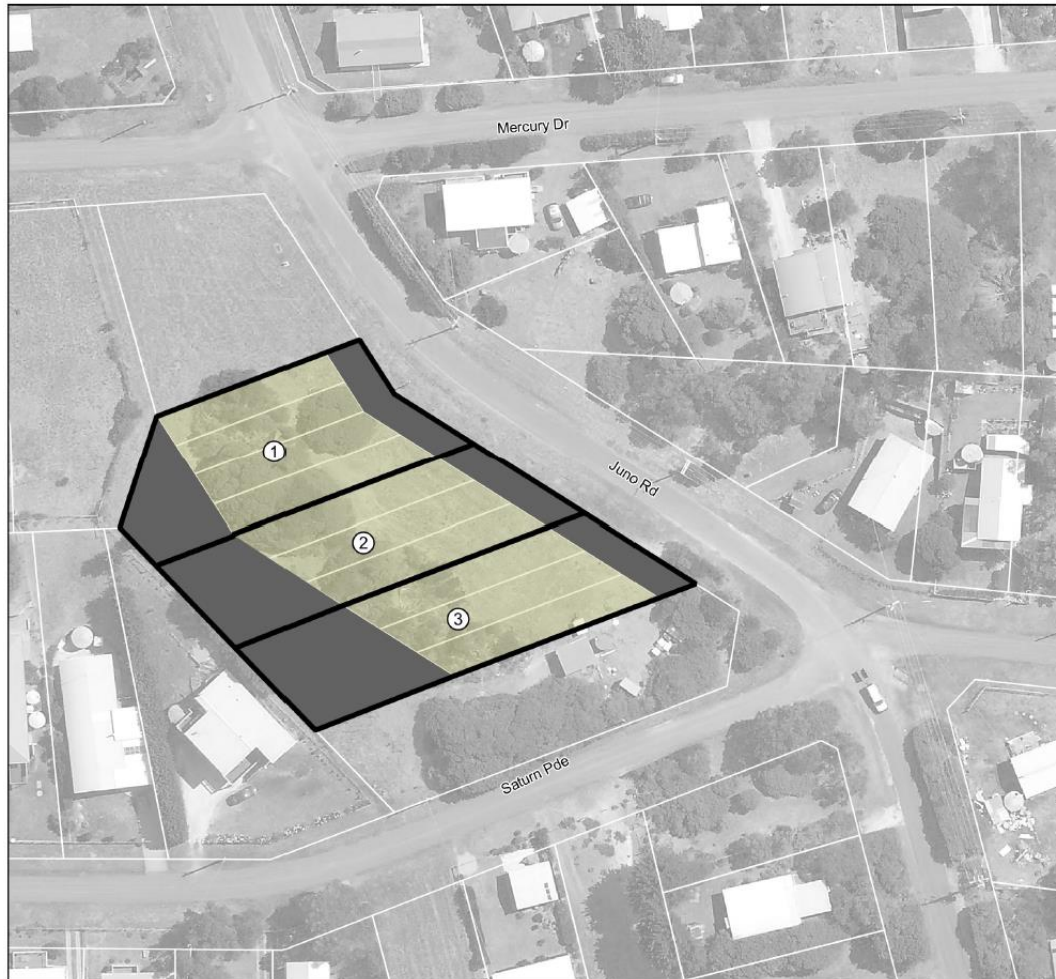

RO / Figure Number	Location
RO1 / Figure 1	Land located at Venus Bay on Juno Road and Mercury Drive
RO2 / Figure 2	Land located at Venus Bay on Atkinson Avenue
RO3 / Figure 3	Land located at Venus Bay on Black Avenue
RO4 / Figure 4	Land located at Jeetho on Wettenhalls Road
