

Toora Streetscape Works Complete

Line marking on Stanley Street was finished recently, which also marked the completion of the Toora Streetscape project.

The Toora Streetscape was a significant undertaking which involved footpath and drainage improvements, a new road surface and landscaping. Stanley Street, parts of Welshpool Road and Foster Road – Stage One were upgraded as part of the project, with the works completed by Council's construction crews.

The project was funded by Council with support from the Federal Government's Roads to Recovery Program. The streetscape project builds on previous works that were completed in Stanley Street in 2015.

Quote attributable to South Gippsland Shire Mayor, Mohya Davies:

"It is lovely to see the Toora Streetscape works complete. The project has helped to give a lift to what is already one of the most picturesque streets in South Gippsland. We hope that the revitalised streetscape will benefit local businesses and the wider community for many years to come."
