

Works to Commence at Baths Road Reserve, Mirboo North

Council is pleased to announce that works to reduce storm debris in Baths Road Reserve will commence Monday 5 May with an anticipated completion date of Friday 16 May. The works are being led by the Department of Energy, Environment, and Climate Action and supported by South Gippsland Shire Council.

During this time, there will be limited access to the Reserve with walking tracks closed to the public.

The purpose of these works is to reduce storm debris from the February 2024 storm event. The reduction of debris will improve access for emergency personnel, equipment and the community. The works will not remove all the debris from the February 2024 storm event, only what is necessary to reduce bushfire and other safety risks, while considering environmental impacts.

Heavy machinery will be working in the Reserve so please obey the signage and fencing.

There will be periods of machinery noise and activity during these works particularly around Jordan Way in Mirboo North. The machinery will only operate between 7.00am to 5.00pm from Monday to Friday while the works take place.

Debris suitable for firewood will be removed and made available to the community at local firewood collection areas.

Recovery support is still available for people impacted by the February 2024 storm event. For advice on what programs and services can help you, and to find out more, please call the Emergency Recovery Hotline on 1800 560 760.
