### **Executive Summary**

The Gippsland Tracks and Trails Feasibility Study is an initiative of the Gippsland Local Government Network (GLGN) with project partners Destination Gippsland Pty Ltd and the Gippsland Mountain Bike Club Inc.

Significant planning work has already occurred across Gippsland, with the various project partners recognising the substantial benefits tracks and trails provide for local residents through health and wellbeing and economic development, and for visitor enjoyment and economic growth in the region. Several of the partners have already developed strategies expressing the intent to grow and connect trail opportunities across Gippsland with some projects already implemented, or ready to be implemented through recent funding commitments. A summary of some of the more relevant documents can be found in Appendix B of this report.

This Study will unite all of the existing significant plans and projects with a common Vision and Goal for investment, collaboration and governance for Gippsland tracks and trails into the future as they relate to attracting visitors to Gippsland.

The Study recommends several iconic trail experiences, interconnecting trail networks and growth of complementary trail products and services leading towards increased visitation, economic opportunities and greater overnight stays in the region.

It should be noted that this document has been developed in concurrence with the Destination Management Plan (DMP) so that it may complement the work, research and priority projects identified in the DMP for broader Gippsland.

Phases towards development of a feasibility study for the future of Gippsland tracks and trails:

- PHASE 1.
   Literature Review & Research Report
- PHASE 2.
   Consultation & Track and Trail Assessment
- PHASE 3.
   Feasibility Study
- PHASE 4.
   Advocacy Materials

#### Vision and framework

Through literature and market research, consultation, site assessments and alignment of public and private priorities, this Study represents the outcomes of the various project partners working together, establishing a united vision and providing a targeted framework for Gippsland Tracks and Trails into the future.

#### VISION

Gippsland will be recognised as a world class trails destination offering a diversity of outstanding landscapes and experiences.

#### Pathway to the future

There are 6 core areas where coordinated actions are desirable to deliver a world-class regional trail network that grows visitor economy outcomes for Gippsland. The study discusses each of the six areas and makes a series of recommendations on each.

By looking at this opportunity holistically, the study provides integrated opportunities and frameworks from which to grow collaboration in the region, to grow the experiences and to grow the industry (and the community support behind it), leading to additional people visiting Gippsland to enjoy the trails for hiking, biking and walking.

The six core areas for coordinated actions:

#### • Effective coordination

arrangements to provide region-wide leadership and direction and assist collaboration and coordination

#### · Consistent and collaborative planning

provide consistent regional policies and approaches to trail use, design and construction standards and environmental sustainability

#### • Delivering trail experiences

a consistent approach to trail classification, network development and service delivery

#### Sustainable management

maintenance and monitoring to ensure continued environmental and social sustainability

#### Supporting trail use and community involvement

including support for the work of volunteer trail groups and encouraging trail use through programs and events

#### • Marketing and communication

effective ways to reach local and visitor trail markets

The trail network for the Gippsland region will be built around 3 trail classifications that form building blocks for managing, improving and marketing the network, meeting the needs of residents and visitors, and prioritising resources and investment. The framework is deliberately built around an objective to improve the visitor economy by attracting new and repeat visitation to Gippsland (and in some cases, keeping people in Gippsland longer), so it is acknowledged that trails will continue to be developed for community purposes outside this study.

Figure 1.Gippsland tracks and trails framework for the future

#### **Signature Trails**

A smaller number of trails that showcase the region and offer outstanding experiences attracting people to Gippsland to complete the trails

#### **Regional Trails**

A larger part of trail network that provide quality experiences for residents and visitors, keep people in the region longer, and perhaps less crowds

#### **Local Trails**

Trails that primarily service local communities, or local attractions, and that important for health, wellbeing and connections to community infrastructure

The signature trails recommended in this plan are those listed below. They are the trails in which investment will drive the highest visitor economy outcomes for the Gippsland region as a whole through driving increased visitation to the region.

They have been chosen based on the analysis in this plan relating to the market demand for experiences, the gaps in Gippsland's trail offering, the opportunities Gippsland has to show case its raw natural and cultural products, and the diversity of landscapes it contains including coastal wilderness, alpine and foothill areas and rolling green hills.

#### Gippsland Signature Trail Experiences recommended in the study

Gippsland Signature Trail Experiences recommended in the study			
	Signature Walks		
1 Wilsons Promontory Circuit Track and upgrade (Planning as an initial step)	The Wilsons Promontory Circuit Walk offers a renowned multi day walk that includes the lighthouse in the southernmost part of mainland Australia, coastal forests and pristine beaches. With an experience upgrade that may include re-looking at the accommodation options on the trail (noting that the current plan of management may have to be changed), it will continue to present as one of Victoria's great walks.		
2 George Bass Coastal Walk	The George Bass Coastal Walk while limited in its length at present, has had a government funding commitment to significantly change its length, style and appeal. Significant investment the walk will offer new campgrounds, access to villages, additional length and infrastructure to showcase the outstanding beauty of the Bass Coast.		
3 Wilderness Coast Walk from Cape Conran to Point Hicks	With a master plan and feasibility to update the previous work undertaken, the Wilderness Coast Track could present an ideal 2 to 4 day experience along the coast from Cape Conran to Point Hicks with full serviced options, and the remaining walk from Point Hicks to Mallacoota as a wilderness style walk.		
4 Sections of the Australian Alps Walking Track	Build on the market knowledge and appeal of the Australian Alps Walking Track including the serviced section branded the Great Walhalla Alpine Trail from Baw Baw village to Walhalla, and Hotham to Falls (currently in development). Continue to worl with partners in the ACT and NSW to market and improve the trail.		
5 The Sea to Summit (Feasibility Study)	Following the announcement by the Victoria Government, a feasibility will be undertaken to a trail from Mt Ellery in Errinundra NP to Bemm River with the potential for a multi-day hike through East Gippsland's forests with the option for serviced camping or accommodation available.		
Signature Mountain Biking Hubs and Trails			
1 Develop the Central Gippsland Mountain Biking Hub with Haunted Hills as a centrepiece	Develop a central Gippsland Mountain Bike Hub based on the Haunted Hills with other parks in nearby areas forming a collective MTB offering. Formalising the parks in Glengarry and Avon Mount Hendrick as well as continued investment will see a significant visitor offer for mountain biking beyond the individual park's attributes.		
2 Omeo MTB Hub Development	The development of the proposed Omeo MTB hub will see a world class facility with flow, cross country and other trails all leading from and into the town.		
3 Feasibility for the Epic Trail in Central Gippsland	Develop a feasibility for an epic trail that descends from Baw Baw Alpine Village, and traverses through the forests of the Gippsland alpine areas arriving the Latrobe Valley. This trail could potentially change the game for riding in Gippsland and could use many existing trails.		
4 The Timber Trail including options for accommodation and servicing	The potential for a timber trail ride through the west Gippsland forests with dedicated overnight accommodation for rides, while providing access to the villages would provide a strong commercial product similar to the successful models in operation in NZ.		
Multi Use Trails			
1 Continued development of 'Rail Trails' that together will form the basis of a 'Gippsland Trail'.	Packaging the existing main rail trails and multi-use trails in Gippsland as the Gippsland Trail, and undertaking strategic connections between the various existing elements will over time provide a strong offering that can be undertaken or packaged into sections, or sold as a multi-day trail. The trail would link into the outer Metropolitan transport network near Clyde.		
2 The development and implementation of the Gippsland Lakes Aquatic Trail.	Complete feasibility and market testing for a multi-day multi format trail that provides commercial opportunities based on the outstanding Gippsland Lakes.		

Regional trails form the next level of importance from a visitor experience perspective. A larger number of regional trails that form the backbone of the network, they can bring additional people to Gippsland, keep visitors in the region longer, or act as the second tier of trails that people return to the region to do.

Local Trails are not listed as they are essentially the bulk of trails and those remaining. They are often important for communities for a variety of purposes and also often have a high level of community ownership and volunteerism attached to them. The management and decision making of those trails remains with the current manager.

#### Governance

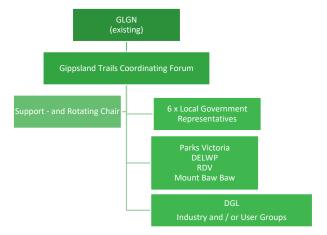

Ongoing collaboration, effective decision making and working together to continue to promote and develop trail experiences is fundamental to future success.

Gippsland has at least 10 agencies involved in direct management, development and maintenance of trails. This includes the 6 Local Government Areas, Parks Victoria, DELWP, Mount Baw Baw Alpine Resort, and Phillip Island Nature Park. This list excludes private businesses and committees of management operating within Gippsland.

In order to take an effective Gippsland wide view of trail development and management, effective coordination and governance is critical.

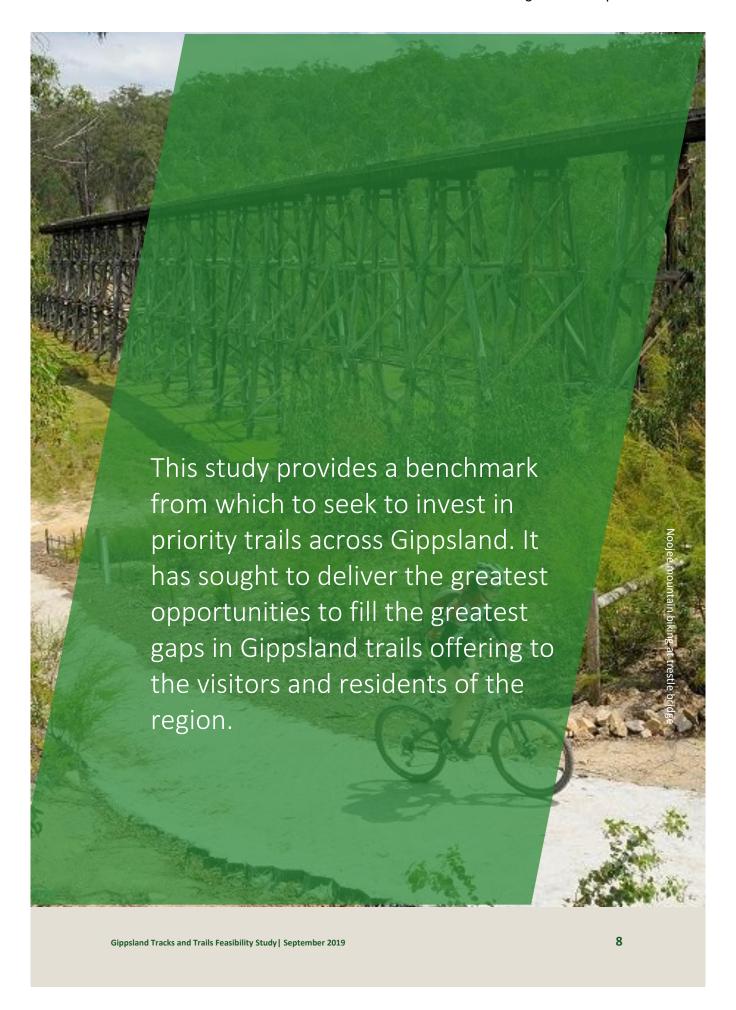

A proposed new group aligned to the existing Gippsland leadership forum Gippsland Local Government Network (GLGN) is proposed with a charter to collaborate and develop the trails based visitor economy in a systematic and planned way.

Figure 2.Proposed Governance Model for Trails Coordination in Gippsland

The study provides a strong evidence based and robust assessment of Gippsland. It takes a market based assessment of the visitor economy outcomes, with Signature Trails aimed at bringing more people into Gippsland, and provides recommended priority trail developments based on those assessments.

It is noted that achieving many of the Signature Trails may take some time and involve rigorous planning and feasibility assessments for each individual trail or hub. It is also recognised that some further development of on park accommodation may require both investors and government being willing to commit to a process that may include changes to plans of management. While these can seem long and difficult, and require the willingness of the community to embrace new approaches, the outcomes will be a repositioned Gippsland trail offering that attracts people to the region, keeps people in the region longer, and provides a boost to the visitor economy.

### 1 Introduction

#### 1.1 Purpose of the Study

TRC Tourism was engaged by a partnership including the 6 regional Councils, Destination Gippsland Ltd and the Gippsland Mountain Bike Club to develop this Gippsland Tracks and Trails Feasibility Study.

The report provides an assessment of trails across Gippsland and makes recommendations on opportunities for improving the current trails-based experiences. This includes the prioritisation and planning for improvements to existing trails and the development of future tracks and trails.

The intent is to establish Gippsland as a cycling, mountain biking and hiking and walking destination of national significance whilst providing economic and social benefit to the communities within the region. This aligns with the development of a Destination Management Plan by Destination Gippsland for the entire Gippsland region.

#### 1.2 What are trails?

Recreational trails are invaluable. They connect people to places through travel, help us appreciate the natural and cultural world around us, they challenge people to climb mountains and they lead people to breathtaking views, they keep communities healthy and connected and bring economic benefits through tourism.

Trails come in all shapes and sizes and provide for a range of uses from walking, hiking, cycling, mountain biking, trail running and horse riding, to specially designed wheelchair and baby stroller friendly trails. Trails can be single or shared use, on roads, pathways, dirt tracks, old train lines and specially built trails for mountain biking or walking. Trails can be on water with non-motorised vessel use (kayak and canoes). Trails can even be a mix of adventures connecting land-based walking and riding with water trails.

Trails can be designed for various users. Local trails provide outdoor recreational opportunities for local communities and can aid in healthier commuting alternatives. There are also visitors who travel around the world seeking Instagram worthy #epictrail experiences. This means that trail users today have higher expectations about their trail experience. They are anticipating ease of planning and fact finding, access, high quality regularly maintained infrastructure, facilities and services and complementary packaged options including accommodation, food and beverage and other value-add activities. It is important that the user experience is central to each element of trail design and management.

The terms 'tracks' and 'trails' can be used interchangeably and for the purpose of this report, will have similar meaning, acknowledging that they may have different meaning to different people.

This report will focus on trails for single use (walking, hiking, cycling and mountain biking) and shared use (any combination of walking, hiking, cycling, water access such as canoeing, and mountain biking).

#### 1.3 Location

Gippsland is in the south-eastern corner of the Australian mainland and covers a major part of the eastern state of Victoria, encompassing a land area of close to 41,600km². The region extends from its western end, adjoining metropolitan Melbourne's south-eastern boundary, to Cape Howe the most easterly point of Victoria. In the north, the region borders NSW and much of its northern boundary is defined by Victoria's high country. The region's southern boundary encompasses 700 km of spectacular coastline and includes the most southern point of the Australian mainland, Wilsons Promontory.

The region is comprised of six local government areas (LGAs) being Bass Coast Shire, Baw Baw Shire, East Gippsland Shire, Latrobe City, South Gippsland Shire and Wellington Shire. Bass Coast is in the unusual situation of straddling two tourism regions: Gippsland and Phillip Island.

Phillip Island and San Remo come under the regional development area of Gippsland, though from a tourism planning point of view these two areas sits separately from the Greater Gippsland region and act as a neighbour of tourism to Gippsland.

Figure 3.Location of Gippsland

#### 1.4 Description

A unique part of Victoria, Gippsland covers almost 20% of the state's land mass. It is highly valued by visitors and local communities for its extensive forest reserves and national parks, watercourses and bushland, and a northern snow-topped boundary of the Victorian high-country juxtaposed with the extensive stretches of coastline to the south.

These natural assets provide a substantial opportunity for sustainable growth in tourism with iconic experiences already established around Phillip Island, Mt Baw Baw, Wilsons Promontory National Park and the Gippsland Lakes, which are the largest network of inland waterways in Australia. Visitors to the region can expect to find quaint villages, alpine towns and farming communities.

The Destination Management Plan provides further detail on markets, positioning, experiences and opportunities.

Gippsland is well known for<sup>1</sup>: iconic nature; coast, beaches and Gippsland Lakes; national parks and mountain landscapes; villages; natural product and farmers markets; and Walhalla.

There are 33² national parks and significant reserves in Gippsland, many of which have tracks and trails for visitor enjoyment and appreciation of the natural area. This is in addition to substantial areas of State Forest, and other land tenure conducive to recreation and tourism businesses.

#### 1.5 Stakeholders

There are a number of government and industry organisations that are involved (both directly and indirectly) in the visitor economy in the Gippsland region.

Table 1. List of the organisations involved in the visitor economy, trail management and promotion

Government	Tourism
Gippsland Local Government Network	Visit Victoria
Bass Coast Shire Council	Destination Gippsland
Baw Baw Shire Council	Destination Phillip Island
East Gippsland Shire Council	Victoria Tourism Industry Council
Latrobe City Council	LTOs
South Gippsland Shire Council	Industry Groups and Associations
Wellington Shire Council	Gippsland MTB Inc.
Department of Environment Land Water and Planning	Prom Coast MTB Club.
Parks Victoria	Australian Hotels Association
Mount Baw Baw Alpine Resort	Bushwalking Victoria
Phillip Island Nature Park	Bicycle Network
Sport and Recreation Victoria	Cycling Australia
VicRoads	Caravan and Motorhome Club of Australia Ltd
Victorian Fisheries Authority	Outdoors Victoria
Neighbouring Council areas such as Yarra Ranges Council	Industry Groups and Associations

Traditional Owners	Other	
Gunaikurnai Land and Water Corporation (GLAWAC)	Local business operators	
Bunurong	Local tourism operators	
Bidwell	Property developers	
Monero	Local Chambers of Commerce	
Yuin	Walking and cycling clubs/groups	
Other Groups		

Gippsland Tracks and Trails Feasibility Study | September 2019

### 2 Current situation

#### 2.1 People and communities

- The Gippsland region had a population of 271,416 people as at the 2016 census with an average age 45.<sup>3</sup>
- Regional Development Victoria has identified that an ageing population<sup>4</sup> is one of the challenges facing the region, with people aged 65 years and over making up 21.7% of the population and family without children representing 45.6% of the population.<sup>5</sup>
- Gippsland has 70,749 families with an average number of children for all families of 0.6, and for those with children, 1.9 children per family.
- Unemployment at the time of the census in 2016 sat at 6.9% as compared with 6.6% for the State.
- The level of volunteerism sits higher than the Victorian average at 23% doing work in a voluntary organisation or group as compared to the average at 19%. This is a positive opportunity for land managers and organisations to mobilise community in delivering services or experiences.

#### 2.2 Employment and industry

Cafes, restaurants and take-away food services were the tourism businesses that contributed the most to direct tourism employment in regional Victoria in 2016-17, with a 36% share of direct tourism employment. Regional Victoria's other top industry contributors to direct tourism employment included:

- Accommodation (16%)
- Retail trade (15%)
- Clubs, pubs, taverns and bars (7%)<sup>6</sup>
- Gippsland's economy is predominantly based around natural resources and commodities, with key industry sectors including agriculture, forestry, dairy and pastoral industries, fishing, and coal mining, oil and gas extraction and processing <sup>7</sup>
- In 2016-17, the non-metropolitan regions that contributed the most (number of persons) to Victoria's direct tourism employment were Murray, Great Ocean Road, Gippsland and Mornington Peninsula. (This includes Gippsland contributing 6,700 jobs or 4.7% of employment share of Victoria). There are currently 3,094 tourism businesses in the Gippsland region and in the year ending September 2018, tourism generated employment of approximately 8,900 people or 8.6% of Gippsland's employment (direct and indirect jobs). A breakdown of the locations of Gippsland tourism businesses can be viewed in Appendix A.
- With the exception of South Gippsland, each of these LGAs in the Gippsland region has a larger percentage of local workers employed in Accommodation and Food Services when compared to that of all Victoria (6.6%).<sup>11</sup>

#### 2.3 Access

#### Ways to access Gippsland

The major road spine, the Princes Freeway (M1) from Melbourne, enters in the west and becomes the Princes Highway (A1) through to the NSW border in the east and then north to Sydney. It is also known as the Sydney Melbourne Touring Route. The M420 connects Melbourne with Phillip Island with the South Gippsland Highway branching off this road and connecting southern Gippsland to the Princes Highway at

Other roads head north from the Princes Highway through the High Country to NSW, including the popular Great Alpine Road.

Latrobe City is serviced twenty times per day by train to Melbourne (2.5hr) with further rail and coach connections through to Bairnsdale and other East Gippsland towns.

V/Line coach service from Melbourne to South Gippsland, Bass Coast or the north-south service from Wonthaggi-Traralgon. Much of Gippsland off the main train line is also serviced by V/Line coach services.

Despite having eight public and one private airport, Gippsland lacks regular passenger transport. Melbourne's Tullamarine Airport is between 1.5hr and 6.5hr drive depending on how far east the trip commences.

East Gippsland is also accessible via Merimbula Airport in South East NSW.

Bounded by Westernport in the west and Bass Strait to the south, the Gippsland coast is home to five ports and two waterways including the largest series of inland lakes in the southern hemisphere. The region has many wharfs, jetties and boating facilities. There is a regular ferry service from Westernport (passenger only) from Mornington Peninsula to Phillip Island and French Island. There is also a short Ferry (vehicular) from Paynesville to Raymond Island. Phillip Island receives regular cruise ship visits and the Visitor Economy strategy proposes a car Ferry from Cribb Point to Cowes.

#### 2.4 Existing trail experiences

Gippsland is a large and complex region, containing a variety of natural assets, landscapes and communities. The current trail offering is by its very nature, broad and diverse. In part this reflects the scale and the landscapes, and in part reflecting previous legacy of land uses.

Many existing trails have 'evolved' over time from what were bridle trails, gold era routes, cattlemen's access into the high country or old forest harvesting routes.

In order to understand the existing trail assets in Gippsland that might have a reasonable significance to the visitor economy, a database of trails has been compiled. It captures information across a number of the important elements required to deliver on the proposed trail framework and assessment criteria.

Information has been compiled on the following attributes of Gippsland's trails:

#### Summary of Trails database information

TRAIL TYPE	OVERVIEW OF GIPPSLAND'S CURRENT TRAILS	STRENGTHS
Short Walks	Gippsland has a large number of high-quality short walks. Some occur in 'clusters' including areas such as Baw Baw's Noojee and Walhalla areas, The Princes Highway in East Gippsland that is important to the Sydney Melbourne Touring Route, shorter walks within and around the Wilsons Promontory National Park and other areas including the Strzelecki Ranges and South Gippsland.	Clusters of high-quality walks often aligned to strong visitor markets.
	The walks are often well managed and traverse a range of high-quality natural areas.	
	Some have little to no interpretation which can be a disadvantage for international and domestic visitors.	
	Investment in short walks appears to be continuing.	
	Most short walks include car parks, trail heads and many include toilets, although the quality of some may be deteriorating with age.	
	The quality of the trail experience can vary although the highly sought-after trails are generally for higher visitor markets.	
Mountain Bike Trails	Gippsland boasts a number of quality mountain bike parks dedicated to use by mountain bike riders. These are generally managed in partnership between the land manager and local clubs although Councils are now seeing the economic advantages of high-quality trail destinations and are seeking to develop purpose-built areas such as the proposals for Omeo.	Growing community support for mountain bike parks and hubs.  A sound base for growth with strong offerings in and around Central Gippsland and exciting proposals for Omeo and other potential sites.  Potential for Bass Coast to develop a regionally focussed mountain bike park.
	Most of Gippsland's mountain bike parks range from 15 to 40 km of trails. This is generally considered on the low side for mountain bike 'destinations' and therefore are deemed to be generally serving regional and some domestic visitation, with the ability to grow further.	
	There is also a desire for Bass Boast and other areas to develop mountain biking hubs in partnership with biking groups.	
Longer Distance Walking Trails	Gippsland has a large number of long-distance walks, most of which are 'under-developed' and remain as remote hiking and walking opportunities. The exception is the Circuit Walk/Lighthouse Walk at Wilsons Promontory NP which offers higher levels of service including booking services, track rangers and water.	Strong experiences and a variety of walk options in alpine, coastal and forested landscapes.
	The Alpine National Park, Croajingalong NP and other areas contain longer walks that are used in lower numbers,	

TRAIL TYPE	OVERVIEW OF GIPPSLAND'S CURRENT TRAILS	STRENGTHS
	however, offer strong experiences. Many are distant to market and long travel distances may be required.	
	The Alpine Walks also tend to be shared with the neighbouring NE Victoria, and who with Parks Victoria are developing the Falls to Hotham Alpine Walk.	
	The Walhalla to Baw Baw section of the AAWT is used for higher quality serviced walking. Falls to Hotham is also currently being developed by Parks Victoria.	
	Navigation on many of the walks can be challenging and most require a strong self-reliance ability, good equipment and an ability to deal with emergencies should they arise.	
Horse Trails	Horse riding is an important activity for horse clubs and regional visitors, with some domestic visitation.	Multiple use trails for existing horse-riding activity.
	A number of the region's trails are multiple purpose and horses share the trails with walkers and in some cases bike riders.	
	Longer distance bridle trails exist mostly in the foothills and alpine areas, where a long history of horse use exists, tied to (in most cases) historical activity including cattle and gold.	
Shared Use Paths (Rail Trails)	Rail trail development continues to occur in Gippsland building on a strong trail base. Developments include linking Lakes Entrance to the East Gippsland Rail Trail, extending the Great Southern Rail Trail westwards from Leongatha and eastwards in partnership with Wellington Shire, and plans to link the Latrobe Valley with shared pathways. Expansion of the Two Towns Trail continues to be considered.	A strong base for growth and good Council support for maintaining and growing the network where feasible and viable.
	The longer distance 'spines' tend to be providing for regional and domestic use and with some further services, development and businesses taking up the potential they offer, may grow significantly into the future.	
	Many of the existing trails link existing product and services such as small towns, wineries and food and historical features of Gippsland.	

#### 2.5 Planning context

A wide variety of State policy, legislation, strategy, planning and programs intersect with the development, management, maintenance and planning of trails in Gippsland and Victoria. The section below provides a brief summary of both relevant legislation and plans that contribute to the development of this Gippsland Tracks and Rails Feasibility Study report.

A review of the relevant partner agency plans and policies can be viewed in Appendix B.

#### Legislation

The Local Government Act 1989 and associated Regulations provide the authority for Local Government in Victoria to operate. It also defines the functions and purposes of local government. Within this context, LGAs can undertake planning, provide services and administer businesses in line with the provisions of other Acts in Victoria.

The National Parks Act 1975 provides for the management of the State's National Parks and various classes of reserves. The Act and its Regulations prescribe the permitted use and regulation of activity in Parks, ensuring the protection of individual park values while providing for safe and enjoyable use.

The Forests Act 1958 sets the management framework for the State Forest management in Gippsland. The Act includes firefighting and fire management guidance and for recreation activities as well as commercial management of forests.

The *Crown Land (Reserves) Act 1978* and the *Land Act 1958* provide the legislative framework for the management of Crown Land in Victoria. Specifically, they provide for regulations governing use and the provision to create Committee of Management, relevant to Councils for managing rail trails and other areas of Crown Land for recreation or tourism.

The Aboriginal Heritage Act 2006 provides for the protection of Aboriginal Heritage sites of significance in Victoria, as well as the establishment of the Victorian Aboriginal Heritage Council to provide a State-wide voice to Aboriginal people and provide advice to the Minister.

Various other Acts and Regulations apply to the running of businesses and use of Crown Lands.

Parks Victoria manages the Commercial Tour Operator Program for all the public land in Victoria in a bid to streamline the administration and regulation of tour operators, and to encourage the appropriate use of public land.

#### **Plans**

A hierarchy of plans apply to the tracks and trails feasibility study. These include State-wide, regional and LGA plans, as well as management plans for parcels of land.

Relevant plans include:

#### **Tourism Plans**

This includes the Gippsland Destination

Management Plan (finalised in August 2019) to guide the growth of the industry in Gippsland, including how it is positioned, managed, marketed, and development of projects aligned to the target markets that will support growth in visitation and more broadly the regional economy.

#### **Economic Development Plans**

All Council partners in the region have, in one form or another, developed an Economic Development Strategy or plan. In some cases, they are aligned to an overarching Council area plan setting the broader community vision for the LGA. We note in our review of the plans that there are no real conflicting policies between the partners, and in general they support the objectives of growing trail-based tourism and regional economic benefits as well as benefits for communities including commuting, health and connectivity.

#### **Trail and Path Strategies**

All Council partners have some form of trail or path strategy. In most cases the objectives are more aligned to the development of community activation and community connectedness. Many provide for the economic benefit of trails and a healthy lifestyle for their residents and visitors.

In a similar way to the economic development plans, the trail plans and strategies are generally aligned in their principles, directions and intent. Differing approaches to achieving objectives are not considered material to this study.

#### **Land Management Plans**

National Parks and significant reserves have a plan of management. Many are several years old and may contain policies, actions and provisions that may act to restrict trail-based tourism, while others remain silent on trail development. Relatively new plans exist for the Alpine National Park and the Gunaikurnai jointly managed parks and reserves.

The Gunaikurnai and Victorian Government Joint Management Plan was approved in July 2018. The plan covers the joint management of 10 of Gippsland's important parks and reserves. The plan provides for strategies and actions to deliver the objectives which include management of country, and developing appropriate nature-based tourism industries.

Mount Baw Baw Alpine Resort has a variety of plans and strategies aimed at managing the underlying Crown Land and at improving the visitor economy outcomes. It is governed by the Southern Alpine Resort Management Board which contains an economic development function in part aimed at developing 'green season' activity.

DELWP manages the State Forest in Gippsland. A recently published DRAFT Central Gippsland Public Land Strategy provides strategic direction for the use and management of Central Gippsland Forests and crown lands. It proposes several 'game changing' projects which align to two of the hero sites of Gippsland at Mount Baw Baw and Walhalla.

#### State-wide Strategies

A number of relevant strategies and plans exist at a State-wide level. Of relevance despite its age is the Victorian Tracks and Trails strategy that provides for a range of relevant directions including a trails hierarchy.

### 3 Visitor economy overview

This section provides an overview of the visitor economy specifically as it relates to Victoria, Gippsland and tracks and trails.

# 3.1 Gippsland compared to Regional Victoria

When compared with the rest of regional Victoria, Gippsland has experienced strong growth in the number of domestic visitors traveling to the region in recent years. However, the average overnight spend for domestic visitors to Gippsland is lower (\$106) than the average for regional Victoria (\$139) and the average overnight spend of international visitors to Gippsland is only marginally lower (\$68) when compared to an average of \$71 for regional Victoria. 12.

### Summary for Gippsland tourism data 13

- Greater Gippsland receives a 12.4% share of the regional Victorian market for visitors (International overnight, Domestic overnight and Domestic daytrip)
- Most visitors to the region are day trippers (60%), followed by domestic overnight visitors (39%). International visitors represent 1% of visitors to the region
- Most visitors to the region are from Victoria
- International visitors stay longer in the region three times longer in the region compared to domestic visitors
- Domestic overnight expenditure in Gippsland is estimated \$106 per night and \$296 per visitor
- Daytrip visitors spend an around \$89 on their trip
- International overnight expenditure is estimated at \$68 per night and \$562 per visit
- The primary purpose of visits to Gippsland is to holiday. Notably the region has a high number of people visiting friends and relatives and this number has grown considerably over the last few years
- Latrobe receives the greatest share of business visitors and those travelling to visit friends and relatives in the region
- Most visitors to the region are over 55 and this market has experienced high growth over the past few years.
   When the 50-54 age group is added to the 55+ market, nearly half of Gippsland's market is represented by the over 50+ market
- Active families are an important market for the region especially in summer school holidays
- March is traditionally the high season with September and June being traditionally low seasons in the region
- Social activities, outdoor nature and active sports, dominate the reasons why people travel to the Greater Gippsland region
- The Chinese market has grown significantly over the last few years
- Most visitors stay with friends and relatives while in the region.<sup>14</sup>

comparison, Bass Coast has been included and is known as Greater Gippsland

<sup>14</sup> Sourced from: Travel to the Greater Gippsland region and its Sub-Regions - International Visitors Survey and National Visitors Survey, 2018 and Year Ending March 2019 TRA; Tourism's Economic Contribution to Great Gippsland in 2016-17

<sup>&</sup>lt;sup>13</sup> Destination Management Plan for Gippsland (2019)

A breakdown of visitation per Gippsland sub-region can be viewed in Appendix E.

#### Summary of visitor segments for Gippsland

A snapshot<sup>15</sup> from Tourism Research Australia provides the following breakdown in visitor segments.

Table 2. Domestic day visitors to Gippsland:

REASON FOR TRAVEL	LIFECYCLE GROUP	ACTIVITIES UNDERTAKEN
- 50.8% holiday	<ul> <li>52.0% older persons</li> </ul>	- 26.7% undertake
<ul> <li>30.3% visiting friends and</li> </ul>	<ul><li>26.8% families</li></ul>	outdoor/nature activity
relatives	- 11.6% midlife	<ul> <li>13.3% undertake active outdoor/sports</li> </ul>
	- 9.8% young	

Table 3. Domestic intrastate overnight visitors to Gippsland:

REASON FOR TRAVEL	LIFECYCLE GROUP	ACTIVITIES UNDERTAKEN
- 57.7% holiday	- 36.9% older persons	- 51.4% undertake
- 30.8% visiting friends and	- 32.5% families	outdoor/nature activity
relatives	- 18.5% midlife	<ul> <li>34.6% undertake active outdoor/sports</li> </ul>
	- 12.1% young	

Table 4. Domestic interstate overnight visitors to Gippsland:

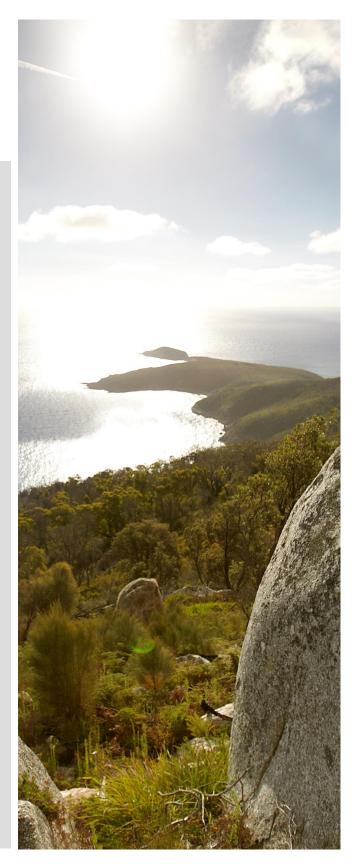

REASON FOR TRAVEL	LIFECYCLE GROUP	ACTIVITIES UNDERTAKEN
<ul> <li>53.4% holiday</li> <li>39.7% visiting friends and relatives</li> </ul>	<ul> <li>51.9% older persons</li> <li>28.5% families</li> <li>14.9% midlife</li> <li>4.6% young</li> </ul>	<ul> <li>39.1% undertake outdoor/nature activity</li> <li>18.7% undertake active outdoor/sports</li> </ul>

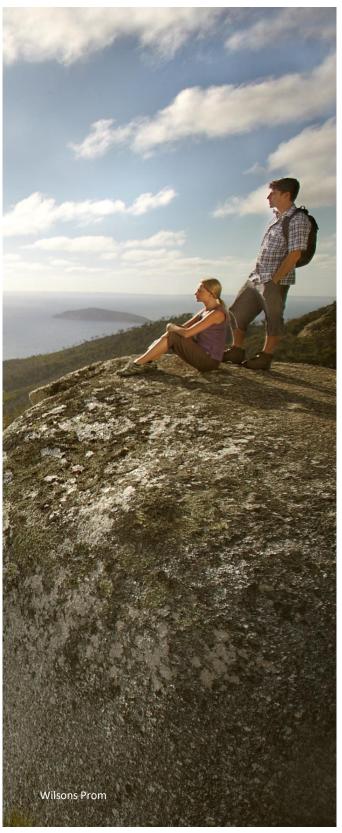

Gippsland Tracks and Trails Feasibility Study | September 2019

 $<sup>^{15}\,</sup> Destination\, Gippsland, Gippsland\, Destination\, Management\, Plan,\, Working\, Draft\, 05,\, Appendix\, B,\, TRA\, (2018a\, \&\, 2018b)$ 

## Trail related insights from Gippsland visitation

- Gippsland has 12.3% share of regional visitor economy (-0.2%)
- East Gippsland, Baw Baw, South Gippsland and Wonthaggi/Inverloch all experienced growth in visitor numbers
- Only East Gippsland and Wonthaggi/Inverloch reported growth in visitor nights indicating the continued tendency for day visits to the region
- 55+ represents 37% of the market, with a continued 5% growth in this age group over the past 3 years. When you add in 50-54 age group to the 55+, nearly half the market is represented by the 50+ market (46% combined), which will need to be a consideration with regards to future trail experiences, accessibility and comfort facilities
- The even spread across the rest of the demographics (15-49) would suggest that the active family market is also an important market for the region, especially in summer school holidays (combined 46% noting that children under 15 have not been represented in visitor analysis data)
- The March quarter is a seasonal high with September and June quarters being seasonal lows indicating that there is spare servicing capacity in these periods
- The LGAs closer to Melbourne have a higher percentage of day visitors
- The VFR is a huge component of the market with 35.4% of all overnight visitors staying with friends and relatives.
   This has grown by an average of 9% over the last 3 years.

Victoria's Trails Strategy 2014-2024. Victorian Government
 Victoria's Trails Strategy 2014-2024. Victorian Government

### 4 Trail trends

#### 4.1 Overview

The development of, and demand for trails has increased globally, along with the trend for visitors to have experience-based holidays or breaks. A world-wide trend is for visitors to now seek more authentic and immersive ways to experience places and connect with the people who live there.

Providing a well-planned and thoughtfully constructed track or trail is essential to ensuring use is undertaken in a way that protects natural and cultural values, is environmentally and socially sustainable over the long-term, and offers a fun and enjoyable experience.

At the time the 2014 Tracks and Trails Strategy for Victoria was published, there were 2,000-plus<sup>16</sup> trails listed showcasing Victoria's natural assets across an extensive network. This combined with the State's diverse and accessible landscapes, provides an ideal platform from which to build stronger and more sustainable trail-based destinations<sup>17</sup>.

Within Victoria, Parks Victoria manages 50% of recreational trails; the Department of Environment Land Water and Planning (DELWP) manages 35% of the network; and Local Government and Committees of Management manage 15% of the trail network.<sup>18</sup>

In Victoria, there is limited trail-specific research, and an inventory of all track and trails across the State is not stored and maintained by a central designated organisation. Instead, there are a range of sources available independently through which information can be obtained regarding trail locations, lengths, classifications and maps.

<sup>&</sup>lt;sup>18</sup> Victoria's Trails Strategy 2014-2024. Victorian Government

An understanding of the current tracks and trails supply in Gippsland was established drawing primarily on information obtained through desktop research.

The Victoria Tracks and Trails Strategy proposed a hierarchy of trails for Victoria. That hierarchy had few Victorian Trails that offer a truly 'hero' product. The map of Victoria's international, national and state significant trails from that strategy can be found in Appendix C.

#### 4.2 Who uses trails?

Trails can cater for tourism (domestic and international travellers seeking nature-based experiences) and events attracting participants and accompanying friends/family. They also provide an outlet for residents to get outside and participate in physical activity contributing to public health, wellbeing, community and social interaction and a better liveability of a place. Part of the appeal of trails is that they mostly do not have costs or membership fees. More often than not, there is also an opportunity to provide interpretation and education in areas of natural, cultural or historical value along the trail.

The desire to experience more of a destination at a relaxed and unhurried pace is more important than ever. Advancing technologies, busy lives and timestarved people often translates to travellers opting for "slow travel". That is, they want to travel less and see more, rather than packing in as many places to visit in a short space of time as they can.<sup>19</sup>

As trails can be broken into smaller and more manageable sections to complete, this can also encourage visitors to stop, stay, spend and return.

Regional Victoria has strong positioning as a destination for spa and wellness, food and wine, touring and cycling and golf, based on a diverse range of private and public regional products and services that help drive visitation and spend.<sup>20</sup>

Wellness is a 'hook' in travel marketing as travellers seek out a healthier, more active holiday. The well-known destination of Boulder in Colorado, USA has reported that 'there are more people on our trails than ever before'. <sup>21</sup> Participation in sport or physical recreation offers many benefits, ranging from simple enjoyment to improved health and the opportunity for social interaction. <sup>22</sup>

Many community groups and businesses are now recognising that their local trail is a substantial piece of infrastructure that they can extract more benefit from. Nowhere is this more evident than in Victoria, where rail trails have the longest history.<sup>23</sup> There are currently more than 100 rail trails across Australia with Victoria hosting the most at 39.<sup>24</sup>

# 4.3 Different types of trail experiences

The experiences offered to trail users will inform the type of access, materials, trail width, design and grading. The overall trail experience will need to be carefully packaged with trail and user type at the front of mind. This includes facilities, signage, products and services and value-add activities. It is likely that there won't only be one type of user on the trails and it is important to

cater for the needs of multiple user groups and user capacity where appropriate.

Trails can be single-use (one activity only e.g. walking) or shared use. It is important to carefully design trails that are shared use to ensure safety and visitor enjoyment without creating conflict between users.

<sup>&</sup>lt;sup>24</sup> News Article. Published 14 August 2018. www.bicyclenetwork.com.au/newsroom/2018/08/14/brisbane-valley-rail-trail/

#### Summary of different types of trail experiences

Walking / Hiking varies from a leisurely stroll to a more intense and strenuous hike through rugged terrain. Walking can be done for commuting or exercising with the dog in urban areas or in national parks and reserves even offering an overnight experience. Walkers undertaking a more remote activity are generally looking to immerse in nature or challenge themselves on an adventure hike.

As with walking, runners can use a range of trails types in urban and hard settings to more remote and wild settings running through challenging terrain. Trail running continues to grow in popularity with new emerging trail running events occurring internationally. Trail running adventures can also include orienteering and rogaining challenges.

Cycle users may use urban trails for commuting however, may also enjoy longer cycle trails for short breaks and weekends, independently or with family and friends. There are also cycle tourists (domestic and international) who travel from place to place with their bicycle to better explore a region.

Mountain Biking as with walkers, mountain biking applies to a range of users from beginners and family groups, to more adventurous cross-country and downhill riders. Mountain biking may be done for leisure locally or also attract major international competitions and visitors.

Horse Riding users can also be categorised into short recreational riders, often undertaking a few hours ride on a weekend; endurance riders who participate in riding competitions and may use trails for training purposes; and long-distance riders who are enjoying an overnight experience or longer journey on horseback.

Water trails can be used by kayakers, snorkellers, scuba divers and canoeists. The trail may be purely for the water-based activity or paired with on land walking and riding trail experiences. Water trails may include boat ramps and remote campsites accessible by water only. When planning for water trails, consideration also needs to be given to the types of facilities and services these users may require such as secure car parking, signage and safety provisions.

#### 4.4 Sports, recreation and naturebased tourism experiences

Trails aren't just about user activities, the purpose of trail experiences is different for each user, from ensuring a healthy and active lifestyle, holiday immersion or dedicated competitive sports.

#### Sports and recreation

Of the Australian population aged 15 years and over, an estimated 60% (11.1 million people) reported that they had participated in sport and physical recreation at least once during the 12 months prior to the interview conducted in 2013–14.<sup>25</sup>

Of all sports or physical recreation activities, walking for exercise had the highest level of participation (23%). Swimming (7.4%), cycling (6.5%) and jogging or running (6.5%) were the only other activities that were participated in by more than one in twenty Australians.<sup>26</sup>

#### Nature-based tourism

Around 46 million nature-based outdoor activities occurred in Victoria in 2015, including around 36 million nature-based walking, running, cycling and swimming activities in Victorian Parks.<sup>27</sup>

22% of all visitors to regional Victoria participated in a nature-based experience (including both domestic and international overnight visitors, as well as domestic daytrip visitors).<sup>28</sup>

Many nature-based outdoor activities support regional economies by shifting expenditure from urban to regional towns and cities and rural areas.<sup>29</sup>

\$265 million was the estimated avoided cost to the Victorian healthcare system attributable to nature-based outdoor activities in 2015.<sup>30</sup>

#### Walking and hiking

Walking for exercise is the most popular sport or activity which Australians regularly participate in. Nearly half of adult Australians, or 47.9%, regularly go for a vigorous stroll.<sup>31</sup>

Hiking and rainforest walks undertaken by international visitors to Australia increased by 7% to 1.9 million<sup>32</sup> in the year ending September 2018.

Further demonstrating the popularity of walking as a recreational activity, Bushwalking Victoria, representing all bushwalkers and bushwalking clubs in Victoria, has over 60 affiliated clubs. Collectively, they represent 8,000 members and 250,000 bushwalkers who actively engaged in outdoor recreation.<sup>33</sup>

#### Cycling

In the year ending September 2018, the number of international visitors to Australia who participated in cycling increased 12% to reach 495,000.<sup>34</sup>

Shared paths are the most common form of offroad cycling facility in Australia.<sup>35</sup>

While over a third of Victorians have cycled in the last year, most of them did so for recreational purposes rather than for transport.<sup>36</sup>

The popularity of electronic bikes, or e-bikes, is growing rapidly. An e-bike allows people of various

fitness levels to cycle together, taking on greater distances and inclines with ease.<sup>37</sup>

Quipmo is potentially the next trend in the sharing economy that will give Australians access to bicycles and other sporting equipment anywhere at any time. It is a peer-to-peer gear rental marketplace that will give people access to all kinds of bikes and accessories wherever they are to help them see the sights and live like locals. The concept has the potential to make bike riding easier for people all around Australia and further align Australia's cycling community with tourism.38

In neighbouring New Zealand, there is evidence to suggest that cycle visitors stay longer. Visitors that participate in cycling spend 33 nights compared to all holiday visitors who stay 16 nights.<sup>39</sup> On average, cycling tourists also spend more on their visit when compared to all visitors and this pattern has continued throughout recent years.40 41

#### Mountain biking

Mountain biking continues to grow as one of the fastest and most popular family friendly lifestyle activities in Australia. This is highlighted by the number of people riding trails across Australia every weekend, both before and after work.42

Membership, affiliations and participation numbers have increased on the previous year with financial members of Mountain Bike Australia increasing by 13.7% to over 15,000. With the inclusion of past members and those that had purchased a day licence, MTBA's reach is currently over 70,000 individuals.43

Mountain bike trails created or ridden on by national park visitors that are not part of the authorised mountain bike trail network are

sometimes closed and rehabilitated by park managers to protect public safety, mitigate visitor risk and protect environmental and cultural heritage values.

#### 4.5 The economic benefit of trails

Economic benefits resulting from trail-related tourism have been demonstrated globally.

The Otago Central Rail Trail, the classic Great Ride and model for the New Zealand Cycle Trail, is well known for its success in rejuvenating the economy of the area through which it passes. Development of a wide range of products, attractions, accommodation and services for trail users has provided substantial increases to both visitation and the economy. In 2014-15 it was estimated that the trail received 12,000 to 15,000 multi-day users and 50,000 day users. The economic impact of the trail on the Otago region economy in 2014-15 was estimated as \$6.9 million in direct expenditure and total expenditure of \$10.4 million; total GDP impact of \$5.3 million; 81 direct full-time equivalent jobs and 21.4 indirect jobs.44

In 2013 a report evaluating the New Zealand Cycle Trail estimated that cycle trail visitors on the Queenstown Trails contributed \$3.7 million in direct expenditure to the region between December 2012 and March 2013<sup>45</sup>. A further report in 2016 estimated that international visitors to the Queenstown Trails (about 46% of total trail users) spent \$219.42 per day in the region.<sup>46</sup>

The Bibbulmun Track is a 1,000 km trail in the south west of Western Australia offering a range of low key accessible, semi-remote and backcountry walking experiences either with packs or utilising accommodation in nearby towns. About 300,000 visitor days are spent on the Track annually, half of

which are thought to be day walks<sup>47</sup>. Walks on the track are popular with local and regional residents with an estimated 7% of users bona fide visitors (domestic and international). In 2014-15 it was estimated that an average of AUD\$30.95 and AUD\$45.09 per day was spent by day-use and overnight walkers respectively. Overall Bibbulmun Track walkers were estimated to contribute AUD\$13.1 million in direct expenditure to the areas around the track <sup>48</sup>

Several case studies are presented later in this report that also showcase the regional and economic benefits of trials and of creating trailbased destinations. These are listed in Appendix D.

# 4.6 Trail markets and their preferences

Each of the trail markets (users) has a preferred approach to the experience they are seeking. By way of example, hikers ideally have trail heads with car parks, and information. They prefer not to walk on '4 WD Tracks' although in many cases these are the best options available.

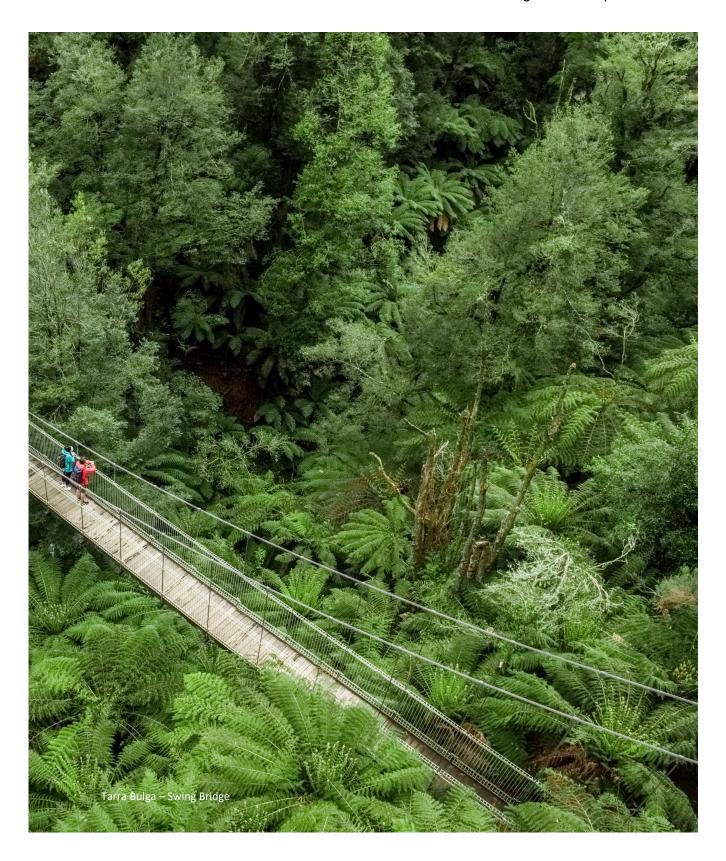

A summary of the markets and their preferences is provided in Appendix E. The preferences have been developed based on the market knowledge, research (some of which is included in this document) and competitor destination analysis.

### 5 Developing a world-class trail destination

A world class trails destination contains not only a series of world class trails developed to meet the needs of the identified markets, and that showcases the landscape and culture of the area, it also has a range of trail related services to help support the experience of the users. This applies to both local community users as well as visitors to the area.

By way of example, Three Capes Trail in Tasmania is not only a great trail through an outstanding landscape, it also offers trail users a complete experience. Not all trails need to offer the same experience, and this will in part depend on the intended users and level of service planned for trail. This study provides a framework that helps delineate intended markets and the needs of the trails specifically for Gippsland.

The following elements influence the trail destination in the marketplace and combine to also provide a way in which we can identify future needs of the region to help it develop its positioning the trails market, and the services and products it offers its residents and communities for outdoor active recreation.

#### 5.1 Diversity of trails

Whether or not a destination offers a significant diversity of trails depends on its positioning and target markets. In the case of Gippsland, with a broad market and trail offering, a diversity of trails would be required.

A diversity of trails can be achieved in a number of ways. These may include offering trails to different and particular trail markets such as walking, hiking, multi-use, cycling and mountain biking. As well as different types of trails, they should also be offered to people with different fitness, skill levels and equipment. This may include degree of difficulty in use, length of trail, the number of points at which people can stop for refreshments or rests, or technical equipment requirements.

Mountain biking destinations that offer a variety of trails that may include cross country, downhill, and flow, as well as a variety of trail difficulty and lengths.

#### Queenstown (New Zealand)

owes part of its success as a trails destination to its wide range of walking, tramping, cycling and mountain biking trails that are easily accessible from the town and trail heads close by the town centre.

#### North-East Victoria

recognised as a trails destination now attracting a wide range of visitors for the trails it offers, and the support services including food and beverage that exist. The area has strong rail trail products, mountain bike tracks, walks and hikes as well as wonderful environment in which the trails sit.

#### 5.2 Icon trails and supporting trails

Great trails destinations are very likely to have drawcard trails that provide the 'hook' to bring people into the region to experience a trails-based holiday. While the icon trail is important, it is also important to have a variety of supporting trails in the area to keep people in the region as long as possible (increased length of stay generally equates to increased yield), and to develop repeat visitation to the area.

The supporting trails will generally be aligned to the product strength of the region. For example, a destination with a hero mountain bike trail will generally have a number of mountain bike trails designed for similar markets, but of varying length and degree of difficulty etc.

Other types of trail may also be provided to deliver a comprehensive trail offering for other members in a group that may chose the visit.

The Tasman Peninsula (Tasmania) offers one of the widest ranges of walking tracks in Australia, with easy to difficult walks showcasing the area's distinctive, rugged sea cliffs, areas of rainforest, coastal heathland and convict heritage. The Three Capes Track is a 4 day/3 night, 46-kilometre journey that showcases the area's main features using purpose-built cabin accommodation. The Track is limited to 48 walkers a day. While the Three Capes Track serves to build the area's reputation as a walking destination, there are numerous other quality trails for visitors who seek a different experience.

# 5.3 Concentration of trail opportunities

Transport between trails can be a barrier for visitors seeking to have a multi-day trail experience in a region. Ideally the trails will be close to a trail head or area that provides accommodation and a service hub.

In the absence of the trails being located in a close area, strong transport connections are important to enable visitors to enjoy the area without travelling large distances to begin their experiences.

#### Yarra Ranges Council

(Victoria) are currently in the planning stages of developing Warburton as a world class trails destination. The destination will be based on a series of mountain bike trails and hubs all descending into Warburton. In addition, the area has great walking tracks and road cycling opportunities. Trail based businesses will be able to develop and grown based on the concentration of visitors in the valley and town.

#### 5.4 High quality infrastructure

Trails will ideally be designed to be sustainable environmentally and will fit into the landscape in which they sit. Modern trail construction methods and new trail building guidelines (such as the MTBA guidelines<sup>49</sup>) all promote good design with a strong emphasis on sustainability and user experience.

Importantly, trail design and infrastructure should be fit for purpose. Supporting infrastructure includes trail heads, toilets, information, car parks etc. For example, wilderness trails need significantly less infrastructure than high volume short walking tracks on the Princes Highway in East Gippsland.

Trails and infrastructure should be designed and managed to be safe for the proposed uses, including shared use trails. There should be clear, accessible information (on signs and online sources) on orientation and wayfinding, trail standards, difficulty ratings, appropriate user behaviour and journey length.

### Makera Peak, Wellington, New Zealand is a purpose-built mountain bike area.

Zealand is a purpose-built mountain bike area. Trail design and construction aims to be high class and local clubs plant several trees on the site for every metre of track constructed. The trail head has bike facilities including tools and a comprehensive map of the area. Trails standards are clearly shown giving users a clear expectation of difficulty and experience.

 $<sup>^{\</sup>rm 49}$  Mountain Bike Australia Trail — Australian Mountain Bike Trail Guidelines

30

#### 5.5 Accessibility

Trails need to be accessible to user markets. For example, there is little point constructing a high-quality day walk trail with no access to day user markets. Transport and access need to be aligned to the markets using the trail. Considerations include:

- Is their suitable road access to the trail head?
- Can users use public transport to reach the trail of trail head?
- Is there the ability to have luggage transfers from the trail head to overnight destinations?
- Can bikes be shuttled uphill via cars of lifting?
- Is the area all ability accessible to encourage community use across all user groups?

#### West Highland Way

in the Scottish High Country is a well-known 5 to 8 day walk stretching from just north of Glasgow to Fort William. Companies specialise in transferring walkers' luggage between rest stops on the trail, and public transport enables people to catch a train from Fort William back to Glasgow. The transport connections enable international travellers to easily book and walk the trail.

#### 5.6 Distinctive experiences

Trails destinations attracting strong growth and market position offer something distinctive that positions them uniquely in the market. Generally, that point of difference will include:

- Showcasing the natural or cultural landscape in which the trails sit, and enable the users to have a memorable experience
- Supporting infrastructure and services adding to the overall experience – including accommodation, and food and beverage
- Events and other activities
- Story-telling and local interaction including interpretation exists and is well presented.

# 5.7 Attractive natural and cultural settings

The setting in which the trail is located is vitally important to attracting visitors. Trail destinations use hero marketing shots of trail that showcase the area. This includes 'blue bird' days in alpine areas, coastal environments on still sunny days, and forests and waterfalls.

Trails based on cultural elements including Aboriginal culture are also important.

#### Yosemite National Park and Half Dome

are famous the world over for spectacular views and scenery. The Yosemite Valley is visited by approximately 4 million people per annum, and has generated a strong visitor economy in the region, yet very few people venture beyond the valley floor into the strong trail offering including the John Muir Trail.

#### 5.8 Quality pre-trip information

Visitors more and more are researching their trip based on on-line content. Quality pre-trip information, including maps for trails is required to provide prospective visitors with the information they need to make a decision on the trail destination they will visit. A 'one stop shop' is ideal for visitors who can research accommodation transport, maps, etc. Other sites can then be used for verification.

#### Otago Central Rail Trail

(www.otagocentralrailtrail.co.nz) provides comprehensive information about the trail and the region, equipment requirements, transport services, bike hire, tours, accommodation, food and wine, attractions and events. Itineraries are provided for trail trips of various lengths.

#### 5.9 Range of quality support services

Successful trail destinations provide the range of trail users with the services they need to access and enjoy trails. They assist in providing a seamless experience where the logistics of accessing trails, transporting people and equipment, and finding a place to stay are easily handled. The support services need to recognise the special needs of trail visitors. It is becoming more prevalent for trail destinations to run walker or bike friendly schemes where service and accommodation providers offer products and packages that cater for needs such as secure bike and equipment storage, clothes and equipment washing, packed lunches, opening hours convenient to trail users. Many of the European walks and rides fit this category.

Typical trail destination support services include:

- people, equipment and luggage transport to and from trailheads and accommodation
- a range of guided and self-guided trail tours
- equipment, bike hire, repair and retail for hiking, and other user needs including bridle equipment
- car rental services that facilitate carrying of equipment and bikes
- long stay car parking at or near trailheads
- a range of trail-friendly accommodation that caters for walkers and riders.

#### Italy Bike Hotels

(www.italybikehotels.com) is a consortium of 70 hotels which provide quality-services according to agreed criteria to cyclists visiting different parts of Italy. They cover the different cycling clientele – road cyclists, mountain bikers, cycle tourists and sport cyclists. The fulfilment of the criteria in each hotel is audited independently. The core facilities provided by participating hotels include:

- Safe and secure bike storage
- An equipped bike workshop and repair services
- Cycling guides
- Information on trail routes etc
- Laundry services
- Balanced meals including packaged lunches
- Some offering massage and medical support facilities.

# 5.10 Support businesses in food and beverage etc

Trail destinations attract visitors for the trail offering and the range of important support services that can make the trail experience a highlight. Many trail destinations have great cafes on the trail, showcase regional and local produce, have strong beverage offerings including cellar doors, distilleries and provide the services in an accessible way.

Other businesses include the need for bike and walking equipment shops, repair services, trail transport etc. For some destinations, equipment rental is an important service when catering for international visitors and domestic markets that are some distance away.

#### 5.11 Strong positioning and marketing

Strong marketing is required to ensure a trails destination cuts through in what is becoming a more and more crowded market-place. Each destination must ensure it positions itself well and aligns its core strengths and experiences to the market and promotes it accordingly.

Consistent application of a brand across the destination and the partners involved is also critical to avoid mixed signals and inconsistent messaging.

Strong planning and collaboration between partners, land managers, businesses and the tourism industry more generally is essential to getting the marketing and positioning delivered well.

#### 5.12 Strong governance

Good governance provides for well made decisions, based on evidence and made in a collaborative way aligned to a strong sense of vision and long-term planning. An effective governance structure and mechanism is important for each destination, and it is important that the governance model is fit for purpose for that area. Elements of a good governance model include:

- The partners and operators have a clear sense of a vision for the destination
- The partners have a clear understanding of their roles and accountabilities and work together in that framework

- Having teams with the right skills and experience to drive outcomes
- Having access to the necessary financial, human and support resources they need to develop the destination.

Many trail destinations in Australia struggle to gain the necessary funding for ongoing maintenance. This is in part due to many trails being on land run by National Parks Services, and Forest Services whose business models generally do not have fee for services where the fees directly hypothecate back into a destination's maintenance.

New models are being developed across Australia to help deliver strong financial security for trails developments. This includes the proposed new Red Centre Adventure Ride in the Northern Territory and the Yarra Ranges Mountain Bike Destination.

#### Queenstown Trails Trust

is an organisation with a purpose to raise funds for the development and growth of the trails network in Queenstown NZ (www.queenstowntrail.co.nz). It has a Board of Trustees that includes independent businesspeople and land managers. They have been very successful in helping to deliver and grow over 120 km's of trails on mixed land tenures around Queenstown and the Wakatipu.

#### 5.13 Community engagement

Strong community engagement with local communities about plans, issues and opportunities helps ensure that the destination's experiences are delivered by managers, businesses and community alike. It also helps ensure that local needs are considered in the trail management and development.

Strong engagement can occur in a variety of ways. Trusts and Associations are one way of developing a more formal approach to engagement. Most local government areas (LGAs) have strong channels for engagement including the 'Your Say' page or through the Victorian State Government's Engage Victoria.

### The Bibbulmun Track Foundation

(www.bibbulmuntrack.org.au) has encouraged growth of a supportive track community that extends through user groups, local community, the general public, and the government and private sectors. This has resulted in a strong sense of stewardship and support for the Bibbulmun Track.

The Foundation operates volunteer programs, training programs, information sessions and sponsorship partnerships that enable residents, visitors and businesses to participate in management and development of the Track.

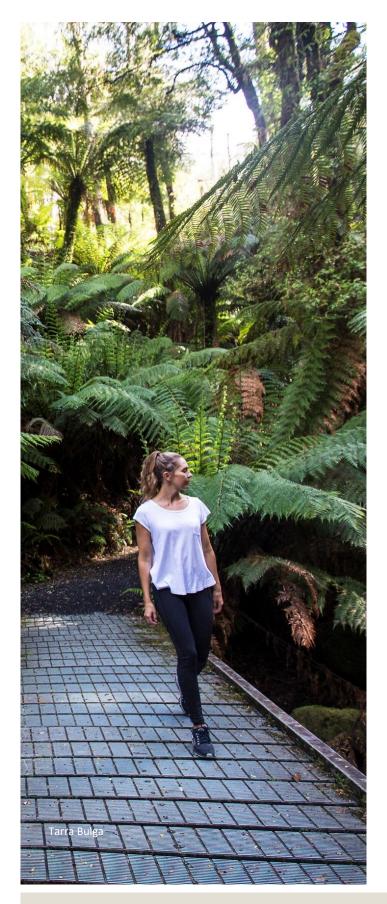

The Eyes on the Ground Maintenance Program enables teams of volunteers adopt a section of track, carry out a maintenance and reporting schedule and attend annual Maintenance Field Days. An incentives program offers rewards (such as gift vouchers, national park passes) linked to the number of hours volunteered in a year.

Partnerships with local businesses are used to sponsor specific programs, activities and track work (for which each sponsor is acknowledged) – such as the volunteer maintenance program, first aid training, incentive prizes for volunteers.

# 5.14 An events calendar with strong events

A strong events calendar can help bring a trail destination to life, particularly in shoulder and off seasons for visitors. It also assists in providing trail related businesses in the area to have an income source and provide some business certainty.

# 6 Current trail network& destination

#### 6.1 Gippsland trail areas

The trail offering throughout Gippsland is extensive and formed mostly on a legacy of uses across much of the various tenures of public land in the region. Generations of local users and communities have used trails for recreation, community connectedness and enterprise. Many of the trails in the alpine and foothill areas of Gippsland were formed over a century ago by cattlemen, gold miners, traders and timber industry businesses.

The Gippsland Aboriginal community has valued the landscape as a living natural and cultural region for thousands of years. Family and clan connections were often maintained by trails traditionally used for access and for food collection as well as trading. Many of the best places for modern recreation were similarly used by Aboriginal people for recreational and living for the same reasons as they are used today – they are nice places to visit, have access to views and water and connect to other areas naturally.

With the advent of specialised equipment such as mountain bikes, and improved comfort and functionality of walking/hiking gear, a greater demand for trail-based access has emerged over the past decade and world-wide trends around being active in nature indicate that it will continue to develop.

The current Gippsland trail offering includes areas for general trail use, community trails in local areas for health and wellbeing activities, specialised mountain biking areas, longer distance hikes, short walks and also bridle trails for horse riding. Many trails offer multiple user types the opportunity to use the network. This includes rail trails and other trail spines.

This report has taken the view that 'trail areas' are the appropriate level of description of the current offer. A table (contained as Appendix F) provides details of the main trail areas in Gippsland, their main markets and land managers, and a brief description of the area.

#### 6.2 Strengths, weaknesses, opportunities and threats of Gippsland's trail network

A SWOT analysis (strengths, weaknesses, opportunities and threats) undertaken for the current trails offering in Gippsland is presented in the following infographic.

#### STRENGTHS

- The natural product of Gippsland and the landscapes and seascapes are outstanding
- The opportunity to capitalise on the strengths
- Large and diverse collection of trails
- Strong and well-known offerings including Wilsons Promontory, Walhalla and Gippsland
- West and South Gippsland are close to Melbourne visitor markets
- Sydney-Melbourne touring route brings strongly aligned markets to Gippsland
- Different markets, with some served well
- Large number of existing gravel tracks suitable for riding and touring

- Transport connections between destinations are poor and often bike unfriendly
- Many existing trails are struggling to recieve the
- Many existing tracks and trails are not mapped correctly and are not publicised in the market

#### **OPPORTUNITIES**

- Develop a smaller number of market driven high-quality, high-yielding products based on the outstanding offer in Gippsland
- Small but enthusiastic mountain biking community with potential to be more effective in
- Linking existing products, infrastructure, and
- Information: how to take it to market
- Rationalise investment to bring a smaller number of trails to a higher standard
- Refresh of existing products i.e. Wilsons Prom, George Bass walks
- Community/industry development
- The ability to apply universal access to many new trails

- Gippsland falls behind other regions and destinations that offer high quality market aligned products such as hut based walks
- Emergencies, including fires, close areas or destroy infrastructure
- Expectations are set too high, delivering a sense we cannot achieve it

- Diversity (lack of, or not focusing on, product strengths)

#### 6.3 Gippsland's Trail Performance Against the World Class Criteria

This section outlines Gippsland's performance against those criteria and provides comments on not only the current gaps and issues, but also on the opportunities presented.

Emoji's are used to provide a guide to current performance against the criteria:

- Performs well | 
   Average performance with room to improve |
- **8** Poor performance with significant improvement required

Table 5. Assessment of Gippsland's trails and trail experiences against criteria for a strong trail destination

#### **RANKING GAPS AND ISSUES OPPORTUNITIES CRITERIA** Diversity in some parts of the The main opportunity would be to improve the Diversity of network is poor, including 'top end' availability of serviced walks in Gippsland which Trail Types trail experiences designed to bring in for the most part is missing. These would include the Coastal Wilderness Walk and a potentially a visitors to Gippsland. Events	80	<ul> <li>Current trail-based events are mostly in mountain biking although trail running is growing in popularity and Mitchell River and a number of other locations hold strong events.</li> <li>Most events are competitive, with few community-based events, including visitor economy events such as trails, food and wine.</li> </ul>	Gippsland's trails, and align it to the Regional Events strategy recommended in the DMP.

#### 6.4 Further analysis of supporting infrastructure for trails tourism

#### Accommodation

Gippsland features a range of accommodation types that would appeal to the variety of visitors who would use tracks and trails. This ranges from branded resorts, hotels and motel chain properties (e.g. Mercure, Best Western, Quest, RACV), independent hotels and motels, bed and breakfasts, farm-stays, holiday parks, caravan and camping sites and privately-owned holiday properties.

Having accommodation available close to, or nearby, the trail heads or along the tracks and trails means that there is potential to attract visitors to stay longer and spend more, positively contributing to the overall visitor economy of the region.

#### Services

Visitor information centres can be found in the following locations across the Gippsland region:
Maffra, Foster, Metung, Bairnsdale, Lakes Entrance, Korumburra, Inverloch, Orbost, Omeo, Latrobe and Sale. Although information is available on various tracks and trails online and can be researched in advance before departure, some visitors utilise these visitor centres to collect local maps or ask for further information and advice on tracks and trails in the region. In addition, Parks Victoria offices also fulfil this function with materials and local knowledge.

Services such as bike repair and spare part shops, bike hire shops, shuttle bus transport, walking and trail gear stores, pubs, restaurants and cafes, supermarkets, general stores, public toilets, car parks, shelters, access to drinking water and picnic areas can all be utilised and accessed by tracks and

trail users. These all exist in varying supply and quality across the Gippsland region.

Having these service options available to tracks and trails users means that they are more likely to attract a wider variety of visitors, as the experience will be more appealing to those who wish to use tracks and trails recreationally, and may not possess all of the necessary equipment. In addition, access to the convenience of places to stop and eat and drink, means that a particular track or trail may become more appealing to those with a family, than perhaps a track or trail that does not offer this amenity. Having the ability to break longer tracks and trails into shorter sections, with accompanying infrastructure or amenities along the way for comfort stops, also allows users of varying ages and physical ability to be able to enjoy the experience.

#### Attractions

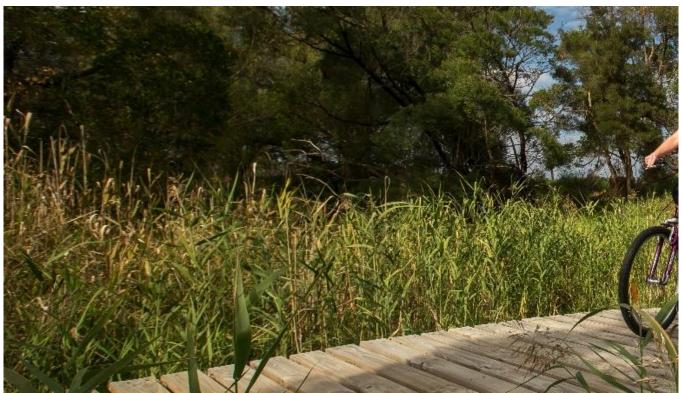

Many of the best-known attractions of the Gippsland region can be linked to tracks and trails, whether directly related or positioned nearby and considered a complementary experience. This includes experiences such as visiting the Phillip Island Nature Park, Wilsons Promontory National Park, and other attractions where tracks and trails support the enjoyment and experience provided by the product.

In addition to outdoor recreation, Gippsland offers a variety of non-commissionable and commissionable activities for residents and visitors.

There are a number of organised hiking and cycling tour opportunities, where operators offer multi-day itineraries that include accommodation, meals, transfers, on-ground transport and guides. For participants that do not require a fully guided experience, other options include self-guided tours, where elements such as bike hire, accommodation, luggage transfers and return transport are packaged together.

#### **Events**

Events are currently held along tracks and trails in the Gippsland region, which have the potential to attract not only the participants to the region, but their supporting family and friends as well (e.g. the Great East Rail Trail Ride is a fully-supported 3-day cycle event along the East Gippsland Rail Trail which has been held annually since 2014). Trail running events utilising tracks and trails are also held across Gippsland, including The Mitchell River Trail Run, which will be the hallmark event of a new trail running series to be held across the region<sup>50</sup> and Duncan's Run, an ultra-marathon event held in the trails of Gippsland's Tarra Bulga State Forest. Events more focused towards beginners, those looking to support a charity event or simply wanting to participate for fun could include The Baw Baw Trail Run Festival and Keeping Kids on Track Fun Run, which is held along the scenic Bass Coast Rail Trail.

# 7 The future framework for trails in Gippsland

#### 7.1 Vision

The development of the Gippsland Trail Network will be driven by the following vision for the region:

Gippsland will be recognised as a world-class trails destination offering a diversity of outstanding landscapes and experiences.

Gippsland Tracks and Trails Feasibility Study | September 2019

### 7.2 Principles for the network

By aligning principles, the framework and the goals to the vision, it will ensure that the network grows in a coordinated, planned, aligned and deliberate way maximising the returns to the community from the growth in the visitor economy driven by increased visitor numbers into Gippsland, and also from improved community outcomes such as health, connectivity and accessibility.

#### Guiding principles for Gippsland tracks and trails

1	We offer diversity Gippsland offers a strong diversity of settings that the trail offer should capitalise on that
2	We pursue quality Gippsland has lots of trails, we aim to improve quality of trail and experiences
3	We have a market focus We continually look to what markets and people want and seek to adapt to its needs, and we take our product to market strategically
4	We seek sustainability We value long term environmental, social and cultural considerations
5	We seek community benefit We seek multiple community outcomes from trails including health and wellbeing, connections and economic opportunities
6	We work together We work across LGAs, State Government and users to deliver optimized regional outcomes through good governance and strong collaboration
7	We seek accessibility We actively deliver trails that connect communities and that are suitable for use by a range of users
8	We seek to resource trails We actively seek to deliver resources to trails to ensure experiences are high quality
9	We seek strong stewardship We work with the community and trail users to care for the trails and the environment
10	We seek strong economic outcomes We deliver opportunities for business, yield, economic outcomes and jobs
11	We showcase nature and culture Trails showcase Gippsland's natural and cultural assets
12	We work with other regional strategies and groups The DMP will provide direction for markets, projects etc.

#### 7.3 Framework

The trail network for the Gippsland region will be built around 3 trail classifications that form building blocks for managing, improving and marketing the network, meeting the needs of residents and visitors, and prioritising resources and investment.

Figure 4. Gippsland tracks and trails framework for the future

#### **Signature Trails**

 A smaller number of trails that showcase the region and offer outstanding experiences attracting people to Gippsland to complete the trails

#### **Regional Trails**

 A larger part of trail network that provide quality experiences for residents and visitors, keep people in region longer, and perhaps less crowds

#### **Local Trails**

•Trails that primarily service local communities, or local attractions, and that important for health, wellbeing and connections to community infrastructure

#### Signature trails

A small number of outstanding trails will be chosen as the region's signature trail experiences and will have the highest priority for regional investment. These trail experiences will have strong marketability that can attract visitors and achieve recognition beyond the region. They will reflect the region's strengths and key points of difference across the trails offering. They will also align to the positioning of the region and fill identified gaps in the trail offering that Gippsland has.

#### Signature trail criteria:

- The highest quality experiences in nature and culture
- One of the best trails of its type
- The highest quality infrastructure fit for purpose and sustainable
- Accessibility to target markets for Gippsland and for trail visitors
- Good information from pre-trip to post trip follow up
- Sustainable in the environment and culturally
- Effective management and coordination including community
- Brand and reputation aligned as well as positioned in the market
- Provides (or has the potential to) for strong visitor number growth into Gippsland.

#### Regional trails

Regional trails are significant trails that form the core of the trail network and provide quality experiences for residents and visitors.

Regional trails support the region's positioning and its signature trails by offering a variety of other quality experiences, and have the potential to keep people in the region longer.

Regional trails will be prioritised for development based on their development needs and potential to contribute to the destination, and to opportunities for business growth based on the trail visitor numbers and yield.

Some regional trails may have the potential to evolve into signature trails. Decisions on conversion to signature trails should be made based on the criteria and with the appropriate decision-making governance framework applied.

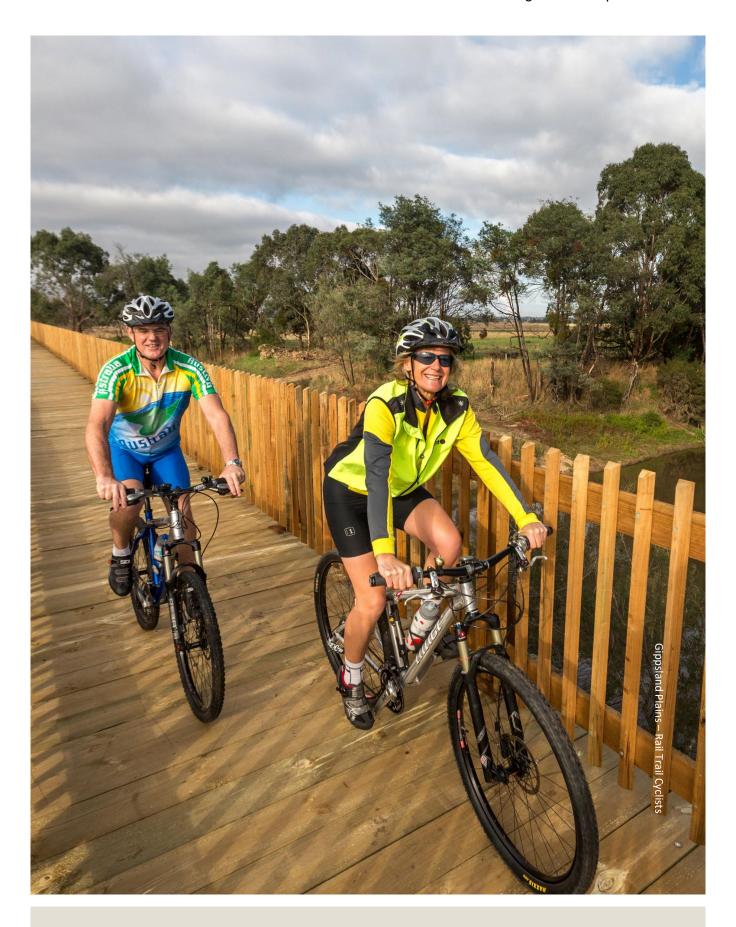

#### Regional trail criteria:

- Attracts people from within and outside the region with good standard facilities and services
- Strong experience offering
- Quality infrastructure fit for purpose
- Good accessibility for users
- Designed and managed to limit damage to the environment
- Effective management regime
- Could cope with some increase in use if required
- Can collectively be part of a Signature Trail hub or group
- Provides a contribution to the visitor economy (or has the potential to) through increased visitor numbers, or increased length of time spent while in the region.

#### Local trails

Local trails primarily service a local community and provide facilities suited to local markets. Investment in local trails will be the responsibility of the relevant Council or trail (land) manager. Prioritisation for works, improvements and signage on these trails would continue with the managing authority.

A designation as a local trail does not imply it will receive less funding, or that it is less important to a local community. Importantly it continues to place the decisions for the management of trail at a local level so that issues and opportunities are addressed locally.

Gippsland Tracks and Trails Feasibility Study | September 2019

## 8 Enabling trail experiences

There are 6 core areas where coordinated actions are desirable to deliver a world-class regional trail network that grows visitor economy outcomes for Gippsland.

- Effective coordination
   arrangements to provide region-wide leadership and direction and assist collaboration and coordination
- Consistent and collaborative planning to provide consistent regional policies and approaches to trail use, design and construction standards and environmental sustainability
- Delivering trail experiences
   a consistent approach to trail classification, network development and service delivery
- Sustainable management
   maintenance and monitoring to ensure continued environmental and social sustainability
- Supporting trail use and community involvement
  - including support for the work of volunteer trail groups and encouraging trail use through programs and events
- Marketing and communication
   effective ways to reach local and visitor trail
   markets.

#### 8.1 Effective coordination

Gippsland has at least 10 agencies involved in direct management, development and maintenance of trails. This includes the 6 Local Government Areas, Parks Victoria, DELWP, Mount Baw Baw Alpine Resort, and Phillip Island Nature Park. This list excludes private businesses and committees of management operating within Gippsland.

To take an effective Gippsland wide view of trail development and management, effective coordination and governance is critical. Accordingly a set of principles is recommended. A trail coordination group will:

- respect the role the land manager or Council has in legislation and more broadly across Victoria
- respect the democratic processes that exist in Councils for the allocation of resources and priorities within LGAs
- seek to bring alignment to trail management priorities between partners
- encourage communication and sharing of information on trail trends, visitor data
- provide leadership and recommendations to agencies on a whole of Gippsland approach
- assist with the oversight of delivery of the feasibility study recommendations
- work with the regional tourism entity (DGL) on trail marketing.

Utilising an existing forum or means of coordination across Gippsland avoids the need to recreate another forum. Both the Gippsland Regional Partnership Forum and the Gippsland Local Government Network work as coordination forums for local government and State Government to determine priorities across the region.

The role of the forum is aimed at coordination and ensuring the region's organisations work collectively to pursue the recommendations in this plan. It is not designed to be a direct management authority for trails.

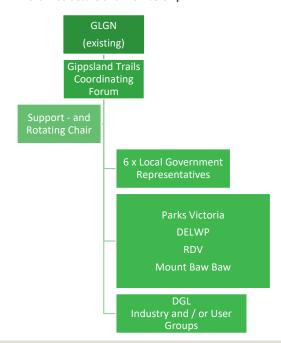

It is also noted that Parks Victoria and DELWP will retain the accountability they have for management planning, and aligning their approvals processes to legislation and State Government policy of the day.

It is proposed to add a trails forum into the GLGN group operating effectively as a subcommittee of GLGN as shown below.

The focus of the forum will be on the signature and regional trails, noting that any trails not in those classifications are designated local trails (from a visitor economy perspective) and fall outside the purview of the forum.

The creation of the Gippsland Trails Coordinating Forum will help provide collaborative leadership in the development of the region's Signature Trail experiences, and assist with the ongoing management and development of the Regional Trails.

Figure 5.The Proposed Gippsland Trails Coordinating Forum Structure and membership

#### Amending the Study and keeping it live

During the life of this study, it is anticipated that circumstances will change and changes to the proposed classification of trails may be desirable or needed. Given the range of partners, and the potential consequences for trails moving in and out of classification bands (particularly signature trails), a process of coordination and agreement is proposed within the framework of trail coordination proposed above. The following diagram provides the process for amending the classification of trails.

#### Figure 6.Trail classification review process

#### Proposal

- A proposal is developed to review the classification of a trail within the Gippsland Trails Feasibility Study
- The proposer evaluates the trail against the criteria within the study and documents the reasons for the proposed change
- The proposal is added to the agenda for the Gippsland Trails Coordinating Forum.

#### Review

- The Gippsland Regional Trails Coordinating Forum meets and considers the proposed change
- Trails to become signature trails must have agreement of 2/3 rds of the forum members and be forwarded to GLGN for endorsement
- Trails to become regional trails can be adopted at the coordinating forum.

#### Amendment

- Trails list is amended and new classification adopted
- Any public information is updated and plan refreshed.

49

Table 6. Actions for effective coordination

ACTION	DESCRIPTION	PRIORITY
1.1	Formalise and create a Gippsland Trails Coordinating Forum (GTCF) under the auspices of the Gippsland Local Government Network.	Very High
1.2	Adopt a process and approach for GTCF to keep the trails feasibility refreshed and current including the way in which trails move between Signature, Regional and Local.	High
1.3	Consider developing an industry and stakeholder forum aligned to the GTCF to bring partners into a regional perspective on trails and assist with input into decision making.	Medium

# 8.2 Consistent and collaborative planning

The challenge for a regional approach to trail planning is that all Councils and State Government agencies have their own set of standards, plans and policies governing their approach. It is reasonable then not to seek to duplicate those, but work collaboratively on areas of divergence.

A review of the relevant policies, plans, studies and documents for all partner agencies and Departments was undertaken as part of this study. Appendix B provides a summary of those plans.

It should also be noted that the majority of Gippsland Councils have adopted the Infrastructure Design Manual (IDM)<sup>51</sup> which also contains standards for a variety of unsealed trails that can apply to a number of applications recommended in this report.

The adoption of trail standards across Gippsland should occur as follows.

Australian Walking Track Standards and Grading System

Grading systems for Trails are used to categorise the technical difficulty of the recreational trail, support trail planning and design and assist users in making informed decisions to partake activity on a trail that is suitable for their capabilities which fosters safe and enjoyable experiences.

Figure 7. Australian Walking Track Standards Grading System

No bush walking experience required. Flat even surface with no steps or steep sections. Suitable for wheelchair users who have someone to assist them. Walks no greater than 5km.

No bush walking experience required. The track is a hardened or compacted surface and may have a gentle hill section or sections and occasional steps. Walks no greater than 10km.

Suitable for most ages and fitness levels. Some bush walking experience recommended. Tracks may have short steep hill sections a rough surface and many steps. Walks up to 20km.

Bush walking experience recommended. Tracks may be long, rough and very steep. Directional signage may be limited.

Very experienced bush walkers with specialised skills, including navigation and emergency first aid. Tracks are likely to be very rough very steep and unmarked. Walks may be more than 20km.

50

 $<sup>^{\</sup>rm 51}$  Infrastructure Design Manual 2018 v5.2 – Local Government Design Association.

#### **Cycling Standards**

The Cycling Aspects of Austroads Guides (2014) provides information relevant for planning, design, construction and traffic management of cycle trails and associated facilities.

www.onlinepublications.austroads.com.au/items/AP -G88-14

#### Rail Trail Standards

Rail trails are generally shared-use trails on old unused railway corridors. Rail Trails are becoming increasingly popular experiences especially for mountain biking, cycling and horse riding, traversing through natural landscapes, connecting people to communities and enjoying experiences such as food and wine enroute. Infrastructure requirements and maintenance is a major consideration in the feasibility planning process for rail trails, especially given many of the rail lines were decommissioned and consist of deteriorating infrastructure including bridges and trail surfaces. Rail Trails Australia provides information for the development of rail trails including feasibility studies and planning for infrastructure. Their guidelines provide an overview of both Australian an international rail trail case studies. www.railtrails.org.au/managementresources/rail-trail-establishment-guidelines

#### Mountain Bike (MTB) Trail Standards

The International Mountain Biking Association has established an international Trail Difficulty Rating System. Adapted from an international trail system for ski areas, the Rating System has also been applied to horse riding trails.

There are 2 trail rating systems for mountain biking:

- Trail Managers System to ensure construction and management adhere to and measure against specified criteria
- Trail User System this provides trail ratings to help users make decisions about which trails are suitable and appropriate for their skill level.

Figure 8.The Trail Difficulty Rating System includes 5 levels of difficulty - International Mountain Bike Trail Rating System

Very easy	
Easy	
Intermediate	
Difficult	•
Extreme	$\blacklozenge \blacklozenge$

The ratings are determined by 4 measurable criteria:

- Tread width
- Tread surface
- Trail Grade
- Natural obstacles and technical trail features.

#### Code of Conduct for Users

Voluntary codes of conduct for trail users are commonplace and best applied when users are involved in the development and implementation of the codes.

A common code of conduct for trail use across Gippsland would be ideal binding users across the 6 local government areas as well as the State organisations. While some organisations already have codes, the difficulty of individual codes is that the user experiences across a region the scale of Gippsland provide for confusion in users of trail as they cross from jurisdiction to jurisdiction.

The adoption of a code of conduct based on the current codes in the market-place including those from member associations such as Mountain Bike Australia would be appropriate for Gippsland and best be coordinated through the GTCF.

Table 7. Actions for consistent and collaborative planning

ACTION	DESCRIPTION	PRIORITY
2.1	Formally adopt a consistent set of trail standards across the region, acknowledging that in most cases they may exist in one form or another. These standards should include the IMBA standards for mountain bike trails, the Australian Walking Tracks Standards Grading system and the guidelines recommended by Rail Trails Australia, acknowledging the infrastructure design manual in use by local government.	High
2.2	Develop a peer review and support system across Gippsland's Councils that helps Councils share and develop consistent interpretation of standards between each other's operations.	Medium
2.3	Use the trail standards commonly adopted across the region in all marketing and publicity for the region's trails to ensure a consistent visitor experience and planning capability for intending trail users.	High
2.4	On trail signage should reflect the adoption of the trail standards to help match skill levels, equipment levels and length of trail to users.	High

#### 8.3 Delivering trail experiences

Section 8 of this study applies market-based logic to the development of a framework to enable prioritisation of the region's trails, and trail-based experiences. This section applies that framework to both the existing network and to the opportunities identified throughout this study, and in the brief. The simple premise is that investment in Signature Trails will provide the greatest increase in visitor numbers and will be prioritised over regional trails (from a visitor economy perspective), acknowledging that there will be local and community investment occur outside these guidelines.

The following tables and associated maps provide an analysis of the visitor experience and framework applied to the significant trails and trail hubs in Gippsland as follows:

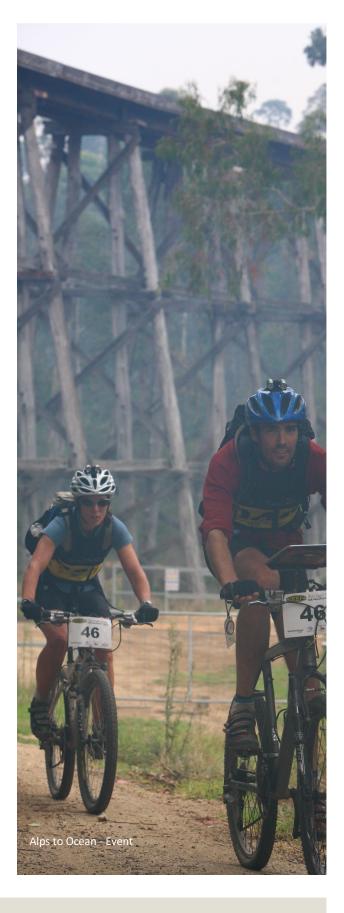

- Signature Trails Walks and Hikes
- Signature Trails and Hubs Mountain Biking
- Signature Trails Multi Use
- Regional Trails

Importantly, the trails proposed against each of the framework elements can be existing, or proposed, and with development works attached to them.

The trail maps directly align with each of the associated Signature Trail/Track tables, under the categories of Walk, Mountain bike and Multi use.

**Table 8.** Actions for Trail experiences

ACTION	DESCRIPTION	PRIORITY
3.1	Gippsland Trails Co- ordinating Forum adopts the proposed classification system for trails in Gippsland and recommends to GLGN and formally to State based agencies that it apply to trails in Gippsland for the purposes of coordinated planning, development, prioritisation of investment and other outcomes described in this study.	Very High
3.2	That the GTCF and GLGN as well as State based agencies adopt the proposed classification for each of Gippsland's major trails/trail hubs proposed in this study as a starting point for future planning and resource allocation – noting the ability for trails to be moved between classification levels described in section 1.	Very High

53

Table 9. Signature trails - walks

CLASSIFICATION	TRAIL OR TRAIL CLUSTER	WHY IT MEETS THE CRITERIA	WHAT NEEDS TO BE DONE
Signature Walk/Hike W1	Wilsons Promontory Circuit Walk	<ul> <li>Wilsons Promontory is an iconic national park destination in Victoria. The Prom Circuit Trail including access to the lighthouse is a well-known walk that is well managed, attracts high numbers of visitors including domestic and international markets, and offers outstanding natural and cultural experiences.</li> <li>The length of the walk is appropriate for the market and governance of the walk is strong including booking options.</li> <li>The lighthouse is a strong destination in its own right being the southernmost point of mainland Australia and with outstanding history and views over Bass Strait and the Islands south of the Prom.</li> </ul>	<ul> <li>The walk applies a single model to visitors, with tent-based camping and self-reliance required in all campsites. Toilets and some water are provided along with a ranger presence that both provides management as well as visitor information.</li> <li>Existing and new markets seek alternative and additional models for walking and an opportunity to build the product into a multi-market walk exists that would grow the yield of the walk. This may include huts, glamping or commercial tent-based accommodation. In making this recommendation it is noted that the existing management plan may not allow for roofed accommodation and that a review may be required to facilitate a new model. Parks Victoria would own and undertake such a review.</li> <li>A future strategy is recommended for Wilsons Promontory NP that includes the development of the Sanctuary concept as well as reviewing the model and options for walking the trail and considers a modernisation of the model for operating the walk.</li> </ul>
Signature Walk/ Hike W2	The George Bass Coastal Walk (Currently Regional but proposed to be Signature)	<ul> <li>The George Bass Coastal Walk is a coastal walk that offers outstanding scenery on the coast close to the Melbourne and Phillip Island markets as well as the growing Bass Coast population.</li> <li>Recent government announcements will transform the walk into a strong signature product that is extended, links to Phillip Island (potentially) and activates a number of strong commercial opportunities.</li> <li>The model for the walk has the potential to offer a European style coastal walk similar in nature to the south west coastal path in the UK where villages and commercial opportunities are activated allowing different models for trail experiences (www.southwestcoastpath.org.au) .</li> </ul>	<ul> <li>While the walk is currently a strong regional product, implementing the range of outcomes funded recently by the Victorian Government will elevate the walk to Signature level.</li> <li>This includes: <ul> <li>Extending the walk to San Remo and purchasing or leasing land, and extending the walk south eastwards close to Wonthaggi and potentially Inverloch</li> <li>Developing an exciting European model activating accommodation opportunities in the Bass Coast villages</li> <li>Constructing campgrounds and other trail infrastructure including interpretation, viewing platforms and toilets</li> <li>Packaging and marketing the trail model and encouraging business development.</li> </ul> </li> </ul>

 $\textbf{Gippsland Tracks and Trails Feasibility Study} \hspace{0.2cm} | \hspace{0.2cm} \textbf{September 2019}$ 

Signature Walk / Hike W3	The Wilderness Coast Walk  (Currently Regional but proposed to be Signature)	<ul> <li>The Wilderness Coast Walk between Marlo (or Cape Conran) and Mallacoota in East Gippsland has long been considered the fourth great walk of Victoria after the West Coast Walk, The Grampians Peak Trail and Falls to Hotham.</li> <li>The coast is stunning, intersecting with whale watching opportunities, the potential for wildlife viewing including seals, birds, native marsupials and birds of prey including sea eagles.</li> <li>Currently is it difficult to walk the entire trail as it requires self-reliance, river or estuary crossings, navigation, a longer period if doing the entire walk, long sections of beach walking, and transport connections that can be problematic.</li> </ul>	<ul> <li>Undertake a master plan and updated feasibility for a 3 to 4 day walk from Cape Conran to Point Hicks as the 'upgraded and serviced' Wilderness Coast Walk.</li> <li>Consider accommodation options on or off park at Bemm River and Tamboon Inlet including walker lodges.</li> <li>Develop the walk-in conjunction with the Gippsland DMP recommendations to seal the Point Hicks Road, make Point Hicks the eastern trail head for the serviced walk and develop further accommodation options at Point Hicks.</li> <li>Test the market for opportunities for private and commercial style walking with the aim of this being able to be added to the Great Walks of Australia.</li> <li>Investigate Aboriginal sector involvement in the walk model.</li> </ul>
Signature Walk /Hike W4	Australian Alps Walking Track	<ul> <li>The Australian Alps Walking Track is a multi-State long distance walk that traverses Australia's most spectacular alpine scenery.</li> <li>The walk is well known with sections of the walk receiving high visitation and facilities in some areas being relatively good.</li> <li>Sections of the walk accessed from Gippsland include the Walhalla trail head and the areas north of Licola through to the Great Divide around Mount Howitt.</li> </ul>	<ul> <li>Further develop the concept for the Walhalla to Baw Baw and St Gwinear car park as a 2 to 3-day high quality walk with supported services including glamping and guiding.</li> <li>Parks Victoria's current focus is on the Falls Creek to Mount Hotham section of the track. Investigate ways to grow the experience aligned to the developments on the Falls to Hotham section of the trail.</li> <li>Consider relaunching the trail with the ACT and NSW government's.</li> </ul>
Signature Walk / Hike W5 (Feasibility)	Sea to Summit Walk	<ul> <li>Undertaking the feasibility of this trail is an election commitment of the Victorian Government.</li> <li>It is unsure if it will meet the criteria for a Signature Trail Experience - however it has the potential to be a significant addition to the hiking / walking trails of Gippsland and is included in the Signature Trails given the investment and intent.</li> </ul>	<ul> <li>Undertake the Feasibility Study.</li> <li>Aim for a very strong visitor experience.</li> </ul>

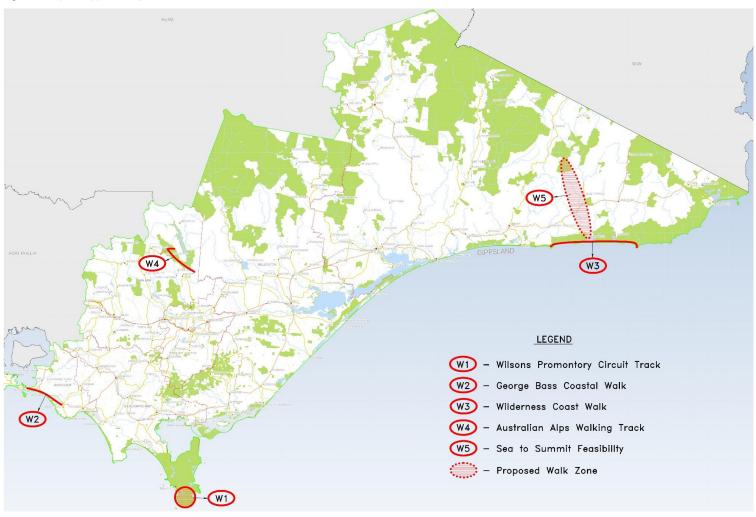

Figure 9.Map of Gippsland signature walks / hikes

Gippsland Tracks and Trails Feasibility Study | September 2019

#### Signature Trails and Hubs – Mountain Biking

CLASSIFICATION	TRAIL OR TRAIL CLUSTER	WHY IT MEETS THE CRITERIA	WHAT NEEDS TO BE DONE
Signature Rides MB1	Central Gippsland Mountain Biking Hub	<ul> <li>Haunted Hills MTB Park (incorporating Stage 1 and further stages under planning) will become (at the time of this plan's development the most accessible and professionally built mountain bike park in Gippsland.</li> <li>It will sit in an area where development of 'adventure' activities and events is being pursued (Latrobe City and the Latrobe Valley more generally) and has access to a large population.</li> <li>The creation of a Central Gippsland mountain biking Hub that incorporates a number of smaller parks within half an hour's drive will create scale and diversity that offers significant visitor potential.</li> <li>Many destinations are creating large parks, the concept of a series of smaller parks linked by branding, small distances apart, and common information, management and marketing will succeed in the marketplace.</li> <li>Terrain is good and across all parks has a diversity of landscape and soil type. Haunted Hills MTB Park offers a unique setting in and close to an old working mine.</li> </ul>	<ul> <li>Complete the development of the Haunted Hills MTB Park (stage 1) and promote it as the best place to develop mountain bike skills in Gippsland.</li> <li>Continue to pursue Haunted Hills stages 2 and beyond as the central core of the proposed Central Gippsland MTB Hub.</li> <li>Brand and develop the surrounding parks in line with the Central Gippsland MTB Hub including Glengarry, Erica, Bores Hill, Avon Mt Hendrick and Maryvale Pines.</li> <li>Ensure the non-trail facilities are to a standard that will help drive signature status.</li> <li>Formalise Glengarry North and Avon Mt Hendrick that form part of the Central Gippsland MTB Hub with the relevant land managers.</li> <li>Develop and market the concept of the Central Gippsland MTB Hub as a nationally significant MTB destination utilising the service infrastructure that exists in the Latrobe Valley more broadly.</li> </ul>
Signature Ride MB2 (In development)	Omeo MTB Destination	<ul> <li>The planning, vision and directions underway for the proposed Omeo MTB Destination will help deliver a signature mountain biking product for Gippsland.</li> <li>The terrain on offer in Omeo is significant providing up to 600 metres of vertical, as well as opportunities for wilderness and cross-country rides.</li> </ul>	<ul> <li>Continue to develop the concept and feasibility of the Omeo MTB Destination focusing on aligning market appeal with the unique features of Omeo which include the Oriental Claims, the view and the 'high-country' culture.</li> <li>Develop partnerships with NE Victoria and align the products and marketing to 'Ride the High Country' as well as Gippsland – including with Mount Hotham and Dinner Plain.</li> <li>Construct the park using MTBA guidelines and seek to create a world class unique trail offer above trying to create kilometres (quality and character over distance).</li> </ul>

CLASSIFICATION	TRAIL OR TRAIL CLUSTER	WHY IT MEETS THE CRITERIA	WHAT NEEDS TO BE DONE
Signature Ride MB3 (Concept)	Epic Trail from Mount Baw Baw to the Latrobe Valley	<ul> <li>The concept is to develop an epic trail from Baw Baw to the Latrobe Valley. This style of trail from the Baw Baw alpine Village to the Latrobe Valley – utilising exiting trails as far as possible, would provide Gippsland with a strong 'hook' that it does not currently possess.</li> <li>Mount Baw Baw has existing visitor facilities and would be an ideal trail head, also aligning to the desire to grow green season product.</li> <li>Haunted Hills MTB Park as part of the Central Gippsland Mtn Bike Hub would make an ideal southern trail head and conceptually the trail could also link into Erica and other opportunities.</li> </ul>	<ul> <li>Feasibility including route analysis and experience development are required.</li> <li>Utilising existing tracks as far as possible would make the trail more feasible and remove statutory planning constraints in sensitive areas around Baw Baw NP.</li> <li>Ensure the trail meets IMBA guidelines for epic status and has a 'marketability' as well as being an exciting day ride opportunity.</li> </ul>
Signature Ride MB4 (Concept)	Gippsland Timber Trail	<ul> <li>The concept of Timber Trail in the foothills of the Baw Baw ranges aligned to the model in use in New Zealand has enormous market potential.</li> <li>Bespoke lodges, commercial services and access to the villages of the Baw Baw area, the trail would use existing forested trails including historical tram lines, trestle bridges and other forest industry living history.</li> <li>The trail has the potential to link into the Powelltown area and to the Yarra Ranges mountain bike trail developments that are occurring.</li> </ul>	Develop a trail feasibility based on the NZ Timber Trail model that seeks to provide an outstanding mountain biking experience coupled with bespoke commercial services including accommodation options and transport for bikes.      (www.thetimberttrail.nz)      Work in partnership with Yarra Ranges to investigate the option of the trail being linked with the Yarra Ranges MTB developments currently in planning and under construction.

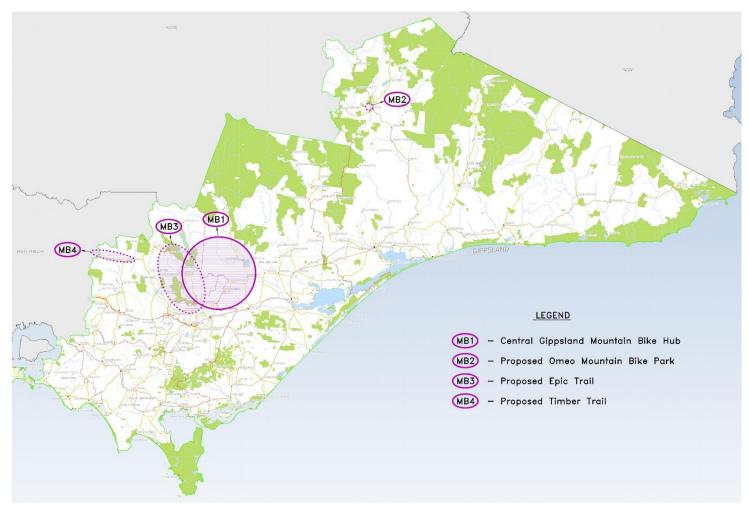

Figure 10. Gippsland Signature mountain bike hubs and trails map

Gippsland Tracks and Trails Feasibility Study | September 2019

#### Signature Trails – Multi Use Trails

CLASSIFICATION	TRAIL OR TRAIL CLUSTER	WHY IT MEETS THE CRITERIA	WHAT NEEDS TO BE DONE
Signature Trail MU1 (In Development but existing in part)	The Gippsland Trail	<ul> <li>The creation of a multipurpose trail that contains elements of many of the existing trails – but is marketed as the 'Gippsland Trail' or 'The Great Gippsland Trail' will provide a trail of State-wide significance.</li> <li>The trail will contain a number of 'contained' experiences that can be enjoyed in sections – and these sections will generally align with the existing trail network (i.e. Great Southern Rail Trail).</li> <li>The trail could have a number of longer routes promoted as 'bike-packing' routes that would enable riders the option of longer journeys through Gippsland.</li> <li>The trail can have t easy access to train and transport services – particularly into the outer Melbourne network</li> </ul>	<ul> <li>Undertake feasibility assessments for linking a number of the rail trails that exist in Gippsland with a focus on developing experiences with product strengths, that showcase communities and landscapes and that offer a diverse and connected story of Gippsland.</li> <li>Focus on the linkages in the first instance in Bass Coast – developing the trail from Woolamai Racecourse northward and in South Gippsland both from Leongatha eastwards to Korumburra and Nyora, and in the Port Welshpool and Yarram areas.</li> <li>Investigate route options utilising existing trails and quiet roads as much as possible along the 90 Mile Beach from Port Welshpool to Sale and then into Loch Sport activating the villages and creating a 'Bike Packing' route aligned to the Gippsland Trail</li> <li>Develop a Gippsland Trail plan that sets a vision for connecting Gippsland's main towns and experiences with bike friendly trails and off road (as far as possible) connections – including a marketing brand and commercial opportunities for bike and other businesses</li> </ul>
Signature Trail MU2 (Feasibility)	Gippsland Lakes Aquatic Trail	<ul> <li>The development of a Gippsland Lakes Aquatic Trail would have significant market appeal and significant commercial opportunities.</li> <li>The proposed Aquatic Tail could pick up some of the best elements of the landscape including waterborne kayaking or canoeing, cycling including trail riding through the Lakes National Park, walking and other activities.</li> <li>Accommodation options for a multiday market based tourism product could include existing options in villages or newer more modern options including houseboats or glamping.</li> </ul>	<ul> <li>The concept of the Gippsland Lakes Aquatic Trail has been in existence for some time, but the concept remains an outstanding business opportunity best developed by private enterprise. A more detailed assessment of proposed routes and facilities is required prior to going to market.</li> <li>Work with existing operators and land managers to develop the feasibility and expression of interest process and put in the marketplace to determine the level of interest from investors.</li> </ul>

Figure 11. Map of Signature Multi Use Trails

### Regional Trails – Walking, Biking and Multi Use

CLASSIFICATION	TRAIL OR TRAIL CLUSTER	WHY IT MEETS THE CRITERIA	WHAT NEEDS TO BE DONE
Regional Trail 1. (Hub)	Wilsons Promontory short and day walks	<ul> <li>A number of outstanding short and day walks exist within the Wilsons Promontory NP. Many of these are located in the under used northern sections of the park.</li> <li>The trails showcase the landscape and natural beauty of the national park and offer visitors a large range of choices depending on time available, fitness, experience preference (i.e. beaches, or climbs).</li> </ul>	<ul> <li>Car parking is an issue at Wilsons Promontory NP, particularly in the summer and busy periods. The Gippsland DMP recommends a review for the national park to ensure visitor experiences, sanctuary style conservation outcomes and infrastructure requirements align.</li> <li>Consider further investment in infrastructure to support the short walks in the northern section of the national park including the dunes and the Vereker Lookout Trail.</li> </ul>
Regional Trail 2. (With some investment)	East Gippsland Short Walks aligned to the Princes Highway East	<ul> <li>The short walks of the East Gippsland component of the Sydney Melbourne Touring route are very important to keep visitors in east Gippsland, and offer accessible experiences for the tourers of the princes Highway.</li> <li>The trails include McKenzie River Rainforest Walk, Point Hicks Light station Walk, Thurra Dunes walk, Wingan Inlet Fly Cover walk, Genoa Peak, walks on the Mallacoota Foreshore and Frenches Narrows.</li> <li>The walks showcase the coastal and forest environment of East Gippsland.</li> </ul>	<ul> <li>The walks all need some form of infrastructure improvement and general maintenance upgrades, in varying degrees.</li> <li>Common branding for pre-trip information, and signage as Gippsland's regional walks is important.</li> <li>Collaboration between the land managers to bring the trails to a similar standard for visitors so the visitor gets a similar experience across all trails.</li> </ul>
Regional Trail 3. (With some investment)	West Gippsland Day Walks	<ul> <li>The shorter walks of the West Gippsland Foothills predominantly within the Baw Baw Shire are important for the day markets coming out of Melbourne.</li> <li>They offer outstanding forest and history experiences that can be combine with other products and services including food and adventure.</li> <li>Trails will include Noojee Trestle Bridge, Toorongo Falls, Poverty Point Bridge (Walhalla) and Walhalla Township Walks.</li> </ul>	<ul> <li>Improved infrastructure and signage would add to the experience. This includes car parks, toilets, signs, trail head information.</li> <li>Common branding around Gippsland's walks both on site and in pretrip information would add to the experience.</li> <li>Some investment is required in improving the presentation and fee of the products and ensuring they sit at a regional level.</li> <li>A well-developed set of walks would keep people in the region longer and potentially attract new visitors to the region.</li> </ul>

 $\textbf{Gippsland Tracks and Trails Feasibility Study} \hspace{0.2cm} | \hspace{0.2cm} \textbf{September 2019}$ 

CLASSIFICATION	TRAIL OR TRAIL CLUSTER	WHY IT MEETS THE CRITERIA	WHAT NEEDS TO BE DONE
Regional Trail 4. (With some investment)	Raymond Island Koala Trail	<ul> <li>This walk is currently not well developed but the chance for international visitors to see koalas in the wild offers very significant potential, coupled with a village and ferry ride across the Strait to Raymond Island.</li> <li>The location also provides another option for touring visitors in Gippsland between the NSW coast and the option of travelling to south Gippsland or via Walhalla and the Baw Baw foothills.</li> </ul>	<ul> <li>Work is required to have this walk fulfil its potential. Social media reports show that visitors have an outstanding experience viewing koalas in the wild. Developing a trail through forests, signs, viewing platforms, information and other infrastructure to support the experience would life this to signature trail.</li> <li>Consider developing partnerships with university or the Melbourne Zoo (Healesville Sanctuary) to showcase native animals in native habitat.</li> </ul>
Regional Trail 5. (Hub) Walk	Alpine NP Short Walks	<ul> <li>A number of short walks accessing spectacular views, and landscapes, as well as culturally important sites offer visitors access to the Victorian Alpine environment.</li> <li>Trails include Guys Hut, Bryces Gorge, Mount Howitt day walk, several tracks in the Dargo area and</li> </ul>	<ul> <li>Providing pre-trip information as part of a 'Gippsland Walks' or Gippsland Trails website to enable visitation.</li> <li>Provide interpretation where possible to help develop the experience for visitors.</li> <li>Gradually improve the infrastructure at sites including toilets, shelters, car parking, signs and trail marking.</li> <li>Work with VicRoads, Councils, Visitor Centres and other bodies to better promote the opportunities that exist.</li> </ul>
Regional Trails 6. Walk	Errinundra Walks	<ul> <li>Includes the Errinundra Board Walk</li> <li>Provides a show case of the tall forests of east Gippsland to visitors to the area.</li> <li>Relatively high-quality infrastructure</li> </ul>	<ul> <li>Distance from many drives including the Sydney Melbourne Touring route makes these walks limited in their market appeal.</li> <li>Develop and implement 'Gippsland Walks' and include these opportunities in a revamped trail offering to the market.</li> </ul>
Regional Trails 7. Walks	Snowy River NP Short Walks	<ul> <li>The Snowy River is an iconic Australian brand that is widely known in the visitor economy, if not exactly where it is and what it is.</li> <li>The Snowy River NP has some outstanding short walks showcasing the landscape and gorges of the park. These include the Little River Gorge Lookout, and Tulloch Ard Gorge trail and lookout.</li> </ul>	<ul> <li>As with other recommendation, increase the profile of the regional short walks through further and updated 'Gippsland Walks' branding and promotion.</li> <li>Continue to work with land managers to maintain and improve the services, infrastructure and overall presentation of the sites.</li> </ul>

CLASSIFICATION	TRAIL OR TRAIL CLUSTER	WHY IT MEETS THE CRITERIA	WHAT NEEDS TO BE DONE
		<ul> <li>The trails are well maintained and offer strong visitor experiences in locations that do not have a lot of other infrastructure to assist with visitor experiences.</li> </ul>	
Regional Trails 8. (Walk/Hike)	Tarli Karng	<ul> <li>This trail is a popular trail and one of the destination walks in the Alpine NP.</li> <li>Recent fires have reduced the appeal of the walk.</li> <li>The area is important culturally to the Gunaikurnai Aboriginal people.</li> <li>The walk is suitable for self-reliant walkers for 2 to 3 days.</li> </ul>	<ul> <li>The walking track requires maintenance in sections, particularly across the plains in the northern end and along sections of the trail on the Wellington River.</li> <li>Campsite development outside the immediate Lake enviros due to cultural sensitivities has occurred but the campsites offer little in the way of setting.</li> <li>Improvements to the car park and other areas from a presentation perspective would be appropriate.</li> </ul>
Regional Trail 9. (Walk)	Sale Common and River walks	<ul> <li>Sale Common is an area on the outskirts of Sale that offers a unique perspective on ephemeral wetlands and the birdlife that inhabits them.</li> <li>The trail is easily accessible and well signed and includes good infrastructure and signs.</li> </ul>	<ul> <li>Further marketing and promotion of the wetlands walks both to residents and visitors to Sale.</li> <li>Some improvement in presentation and basic infrastructure including toilets.</li> </ul>
Regional Trail 10. (Walk)	Tarra Bulga Short Walks	<ul> <li>Tarra Bulga is a national park located centrally in Gippsland and offering tall mountain ash forests and good walks.</li> <li>The park is one of the 10 that is a Gunaikurnai Aboriginal native title park and presents future opportunities to explore Aboriginal culture.</li> <li>Several short walks offer a strong forest experience and an old visitor centre and picnic area exist.</li> </ul>	<ul> <li>The opportunity to explore Aboriginal culture with the Gunaikurnai Land and Water Corporation has strong visitor appeal and will depend on their timing and desire to pursue this over other opportunities that they will pursue.</li> <li>A revitalised visitor precinct near the visitor centre and aligning the walking opportunities to that would add significant appeal.</li> <li>Promote the Tarra Valley .</li> <li>Continue to work with partners to promote this as part of Gippsland Walks.</li> </ul>
Regional Trail 11.	Grand Strzelecki Track	A trail through the heart of the Strzelecki Ranges offering opportunities for overnight accommodation in the villages along the way.	<ul> <li>Sections of the trail are in need of some maintenance.</li> <li>Marketing of the trail and the experiences on offer could be improved.</li> </ul>

CLASSIFICATION	TRAIL OR TRAIL CLUSTER	WHY IT MEETS THE CRITERIA	WHAT NEEDS TO BE DONE
		Strong community interest and volunteer support in the trail's management.	<ul> <li>Some of the more challenging components including creek crossings and steep slippery slopes could be improved for visitor comfort.</li> <li>Implementing a branding and signage program to promote the trail and its experiences would assist with its market knowledge.</li> </ul>
Regional Trail 12. (Multi Use Trail)	Bicentennial National Trail	<ul> <li>The Bicentennial National Trail is Australia's premier long distance multi use trail stretching from Cooktown in the north of QLD to Healesville in Victoria. A significant part of the trail is in Gippsland.</li> <li>The predominant users of the trail are horse riders but walkers also complete sections of the trail.</li> <li>The Trail is well known in trail markets, particularly in the horse riding sector.</li> </ul>	Continue to work with land managers and the not for profit organisation that runs the trail marketing, branding and marking to ensure the Gippsland section is open and well-marked.
Regional Trail Hub 13. (Mountain Biking)	Blores Hill MTB Park	<ul> <li>Develop the park as a part of the Central Gippsland MTB Hub concept. On its own – it sits as a Regional Trail – collectively with the other mountain bike hubs – it sits as Signature Trail.</li> <li>A strong mountain biking area well known regionally for a series of good collection of well-made trails.</li> <li>Strong local management and ownership by Gippsland MTB Club.</li> <li>Over 30 kilometres of trail mostly intermediate and easy for a variety of trail users.</li> <li>Easy access to population centres in the Latrobe Valley.</li> <li>Close to camping areas.</li> </ul>	<ul> <li>Further infrastructure on site is required to provide a better experience for users and family and friends. This includes shelter, toilets, parking etc.</li> <li>The length of trail in the park is limited by the terrain and size of the Regional Park in which they site but more trails would increase the appeal as markets seek over 50 to 60 km of trails in parks to attract significant out of region visitor numbers.</li> <li>Nearby Avon Henrick Scenic Natural Features Reserve is under consideration for additional trails, and if developed would add scale and enable facilities to be built and better utilised.</li> <li>Develop the branding and information aligning it to the Central Gippsland MTB Hub concept.</li> </ul>
Regional Trail Hub 14.	Avon Hendrick Natural	Develop the park as a part of the Central Gippsland MTB hub concept. <i>On its own – it sits as a Regional</i>	Work with the land manager to formalise an agreement for the development of 'official' trails in the reserve.

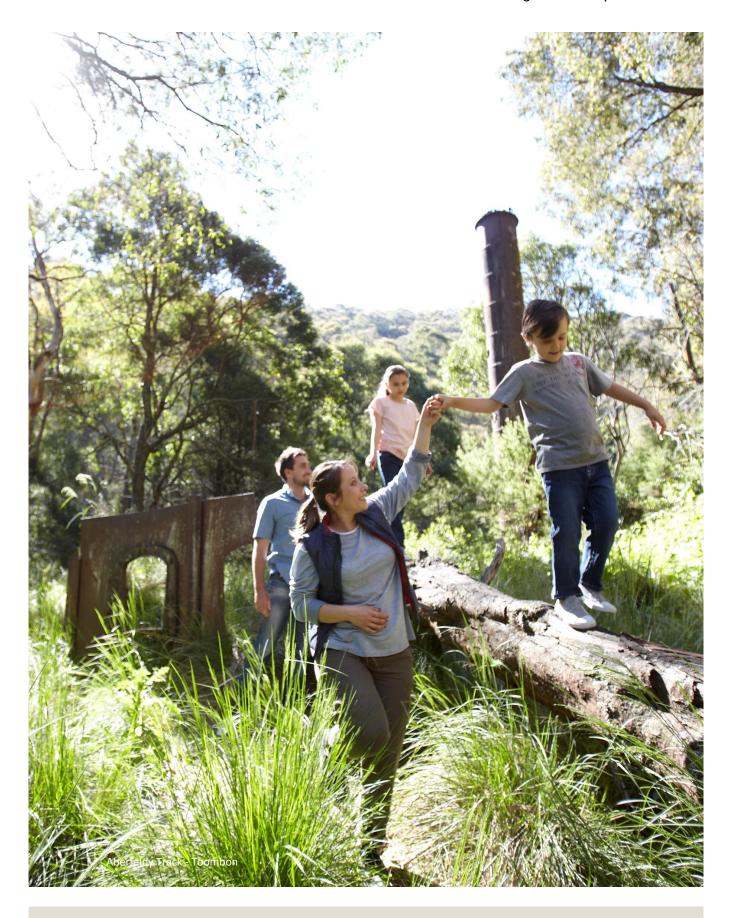

CLASSIFICATION	TRAIL OR TRAIL CLUSTER	WHY IT MEETS THE CRITERIA	WHAT NEEDS TO BE DONE
(Mountain Biking)	Features Reserve	<ul> <li>Trail – collectively with the other mountain bike hubs – it sits as Signature Trail.</li> <li>The terrain and proximity to the Blores Hill park combine to offer potential for trail development.</li> <li>Existing trails formed through motor bike use are being used for mountain bike riding and could be formalised</li> </ul>	<ul> <li>Develop the reserve as a 'sister' site to Blores Hill enabling the sharing of facilities as far as possible.</li> <li>Consider developing infrastructure to support the development of the regional parks concept.</li> <li>Develop the branding and information aligning it to the Central Gippsland MTB Hub concept.</li> </ul>
Regional Trails Hub 15. (Mountain Biking)	Mount Taylor	<ul> <li>A strong downhill riding park with good technical features and close to Bairnsdale and the regional population.</li> <li>Formalised trails and managed cooperatively with the land manager.</li> </ul>	<ul> <li>The trail hub requires ongoing maintenance only.</li> <li>Continued work to promote this as art of Gippsland MTB offering in the market-place.</li> </ul>
Regional Trails Hub 16. (Mountain Biking)	Erica	<ul> <li>The park offers a strong mountain biking experience close to the Warragul and Melbourne markets. On its own – it sits as a Regional Trail – collectively with the other mountain bike hubs – it sits as Signature Trail.</li> <li>The park is currently being developed in partnership with the land manager.</li> <li>Continued trail development will occur over time.</li> <li>Close to the Latrobe Valley and in good terrain for MTB trails particularly more difficult trails.</li> </ul>	<ul> <li>Continue to work with DELWP and the Gippsland MTB Club to develop the park.</li> <li>Ensure adequate trails facilities are considered and built as part of the development.</li> <li>Develop the branding and information aligning it to the Central Gippsland MTB Hub concept.</li> </ul>
Regional Trails Hub 17. (Mountain Biking)	Cement Hill Foster	<ul> <li>A good local and regional mountain bike trail and loop constructed well and close to Foster.</li> <li>While infrastructure at the park is not available, it is close to Foster and public amenities can be found there.</li> <li>A good trail offering for visitors to the region seeking to stay longer.</li> </ul>	<ul> <li>Continue to maintain and manage the trails in partnership with the land manager.</li> <li>Promote as part of a Gippsland MTB offering to get some scale to the MTB trail product.</li> </ul>
Regional Trails Hub 18.	Nowa Nowa	A good cross country offering on the edges of Nowa Nowa township.	Continue to maintain the trails.

CLASSIFICATION	TRAIL OR TRAIL CLUSTER	WHY IT MEETS THE CRITERIA	WHAT NEEDS TO BE DONE
(Mountain Biking)		<ul><li>On the Princes Highway.</li><li>Good local partnerships involved in the trails.</li></ul>	Continue to promote as part of the Gippsland Trails offering for MTB riding.
Regional Trails Hub 19. (Mountain Biking)	Glengarry North	<ul> <li>Has the potential to be a part of the Central Gippsland MTB Hub and be developed as a part of a larger collective riding experience. On its own – it sits as a Regional Trail – collectively with the other mountain bike hubs – it sits as Signature Trail.</li> <li>Currently has 18 km of trails with good terrain and in close proximity to the Latrobe Valley and Sale population centres.</li> </ul>	<ul> <li>Formalise the trail network with the public land manager (DELWP).</li> <li>Develop the branding and information aligning it to the Central Gippsland MTB Hub concept.</li> </ul>
Regional Trails Mtn Hub 20. (Mountain Biking)	Maryvale Pines	<ul> <li>Has the potential to be a part of the Central Gippsland MTB Hub and be developed as a part of a larger collective riding experience. On its own – it sits as a Regional Trail – collectively with the other mountain bike hubs – it sits as Signature Trail.</li> <li>Close to Central Gippsland population centres and forms a part of the collective riding experience on offer.</li> </ul>	<ul> <li>Formalise trails with the land manager.</li> <li>Has the potential to be a part of the Central Gippsland MTB Hub and be developed as a part of a larger collective riding experience.</li> </ul>
Regional Trails Hub 21. (Mountain Biking)	Colquhoun Forest Park	<ul> <li>A good trail mix in open forest close to the Lakes Entrance township.</li> <li>Just off the Princes Highway with easy access and parking.</li> </ul>	<ul> <li>Continue to work with the land manager to develop and maintain the park.</li> <li>Continue to develop the park as appropriate with new trail experiences.</li> <li>Work across Gippsland to promote all the MTB parks as one offering.</li> </ul>
Regional Trail 22.	Grand Ridge Rail Trail	Recent investment has provided a strong regional rail trail of approximately 13 kilometres from Mirboo North to Boolarra.	Work in partnership with the other Councils of Gippsland to undertake a feasibility study into the development of a 'Gippsland Trail' that has strong linkages into the other rail trails and creates a spine trail providing strong marketability and offering large commercial opportunities for trail and off trail businesses including new Bike Packing Markets

CLASSIFICATION	TRAIL OR TRAIL CLUSTER	WHY IT MEETS THE CRITERIA	WHAT NEEDS TO BE DONE
			Continue to maintain and develop the local connectedness of the trail.
Regional Trail 23	Cape Woolamai	Phillip Island receives a very large number of visitors and this trail provides a strong experience to the Cape and offers strong coastal views.	Continue to improve the visitor facilities in the area.
Regional Trail 24	Great Southern Rail Trail	<ul> <li>A strong Rail Trail offering through the South Gippsland farming landscape and connecting villages with character and a strong arts and food culture.</li> <li>On its own – it sits as a Regional Trail – collectively with the other trails that form the "Gippsland Trail' – it sits as Signature Trail.</li> <li>South Gippsland has an outstanding natural and working landscape.</li> </ul>	<ul> <li>Resurfacing of the original parts of the trail needs to occur in places to ensure a consistent experience for users.</li> <li>Extending the rail trail is currently underway in the south as a joint project with Wellington and South Gippsland Councils including accessing Port Albert as another feature of the trail.</li> <li>Extension of the Rail Trail westwards through Korumburra to Nyora would offer a strong addition to the trail picking up a number of towns and potential products.</li> <li>Work in partnership with the other Councils of Gippsland to undertake a feasibility study into the development of a 'Gippsland Trail' that has strong linkages into the other rail trails and creates a spine trail providing strong marketability and offering large commercial opportunities for trail and off trail businesses including new Bike Packing Markets.</li> </ul>
Regional Trail 25	Gippsland Plains Rail Trail	<ul> <li>The rail traverses pleasant landscapes and includes small towns along the way with regional character.</li> <li>On its own – it sits as a Regional Trail – collectively with the other multi use trails – it sits as Signature Trail.</li> <li>Options for train travel one way and riding on way exist with the terminus of the trail close to the Stratford Railway Station.</li> </ul>	<ul> <li>The first priority must be to resolve on road sections of the trail where the rail trail does not formally exist.</li> <li>Ideally to build the marketability of the trail – link trail heads at either end to the Traralgon and Stratford train stations.</li> <li>Work in partnership with the other Councils of Gippsland to undertake a feasibility study into the development of a 'Gippsland Trail' that has strong linkages into the other rail trails and creates a spine trail providing strong marketability and offering large commercial opportunities for trail and off trail businesses including new Bike Packing Markets.</li> </ul>

68

CLASSIFICATION	TRAIL OR TRAIL CLUSTER	WHY IT MEETS THE CRITERIA	WHAT NEEDS TO BE DONE
Regional Trail 26	East Gippsland Rail Trail including the Lakes Discovery Trail	<ul> <li>The trail extends 94 km from Bairnsdale to Orbost with the Lakes Discovery Trail linking Lakes Entrance to the trail.</li> <li>On its own – it sits as a Regional Trail – collectively with the other multi use trails – it sits as Signature Trail.</li> <li>Strong product offering between Bairnsdale and Nowa Nowa but with long sections of forest between Nowa and Orbost.</li> </ul>	<ul> <li>Resurface the sections of trail that are eroded or in need of significant maintenance.</li> <li>Develop the experiences on the trail as far as possible to grow the appeal of the trail to the widest possible market.</li> <li>Work in partnership with the other Councils of Gippsland to undertake a feasibility study into the development of a 'Gippsland Trail' that has strong linkages into the other rail trails and creates a spine trail providing strong marketability and offering large commercial opportunities for trail and off trail businesses including new Bike Packing Markets.</li> </ul>
Regional Trail 27	Bass Coast Rail Trail	<ul> <li>The trail has some outstanding views and includes passing by the Kilcunda Trestle Bridge.</li> <li>On its own – it sits as a Regional Trail – collectively with the other multi use trails – it sits as Signature Trail.</li> <li>The trail is close to the growing Bass Coast town of Wonthaggi and the visitor economy hub of Phillip Island.</li> </ul>	<ul> <li>The trail is relatively short does not link with other products.</li> <li>The options involved with taking the rail trail further towards Nyora form Woolamai Racecourse should be considered.</li> <li>Work in partnership with the other Councils of Gippsland to undertake a feasibility study into the development of a 'Gippsland Trail' that has strong linkages into the other rail trails and creates a spine trail providing strong marketability and offering large commercial opportunities for trail and off trail businesses including new Bike Packing Markets.</li> </ul>
Regional Trail 28	Traralgon to Morwell Off Road Path	<ul> <li>Links Traralgon and Morwell to the Gippsland Plains Rail Trail.</li> <li>On its own – it sits as a Regional Trail – collectively with the other multi use trails – it sits as Signature Trail.</li> <li>Off road connectivity between 2 of the largest cities in the Latrobe Valley.</li> <li>Provides a strong foundation from which the Gippsland Trail can head westwards to Moe (feasibility).</li> </ul>	Work in partnership with the other Councils of Gippsland to undertake a feasibility study into the development of a 'Gippsland Trail' that has strong linkages into the other rail trails and creates a spine trail providing strong marketability and offering large commercial opportunities for trail and off trail businesses including new Bike Packing Markets.

Gippsland Tracks and Trails Feasibility Study | September 2019

## 9 Investment

Decisions on investment in trails and support services occur regularly and can be difficult. The purpose of this plan is to provide some support to those decisions in terms of:

- Developing the greatest opportunities
- Filling the greatest market gaps
- Seeking to provide experiences for markets not being served
- Aligning community and visitor economy benefits.

The Gippsland DMP provides the following criteria for investing in visitor economy projects. It is also recommended that this is appropriate for trails-based investment decisions aligned to implementing this study.

Accordingly this study recommends an approach where the following principles are adopted:

- 1. The greatest return on investment
- Brand aligned Gippsland DMP and Gippsland Trails
- The optimisation of outcomes for business, government and the community
- 4. Planning issues, land tenure, community views and constraints are considered
- 5. The investment has a transformational change capability
- 6. The investment provides quick wins
- 7. The investment provides regional outcomes.

The initial priorities for the region must be to build the mechanisms from which regional trails can be further developed and from which regional decisions can be made.

#### Collaboration

 Build the regional processes in order to be able to collaborate on trail based funding decisions

#### nvest

 Based on the trail hierachy, invest in trail based infrastructure and services across Gippsland

#### Monitor

 Montior user numbers, market trends, gaps in service and pexperience and adapt the study

In relation to investment, the greatest market gap in Gippsland, (and opportunity for Gippsland) in the Signature Trails classification, is in fully serviced walking/hiking (and riding) experiences. This is closely followed by the need to develop mountain bike hubs or parks of scale and substance, and the desire to develop a linked and cohesive multi use trail network that delivers community and visitor economy benefits.

The following new and or significantly expanded products and experiences are recommended as the highest priority investments across the region (excluding maintenance and local trail developments by individual Councils). This is based on the Signature Trails listed in section 9, and the criteria for investment. This also notes that outside this framework, Councils and other land managers will invest their own capital for local trails, for community wellbeing and connectedness, and for other reasons important to the organisation and their stakeholders.

#### Signature Walks and Hikes

- 1. Wilsons Promontory Circuit Track and upgrade (Planning as an initial step)
- 2. George Bass Coastal Walk (as per the Government's investment commitment)
- 3. Wilderness Coast Walk from Cape Conran to Point Hicks
- Sections of the Australian Alps Walking
   Track including a relaunched and rebranded trail in conjunction with the trail partners the ACT and NSW.
- 5. The Sea to Summit (Feasibility Study)

#### **Signature Mountain Biking Hubs and Trails**

- Develop the Central Gippsland Mountain Biking Hub with Haunted Hills as a centrepiece
- 2. Omeo MTB Destination Development
- Feasibility for the Epic Trail in Central Gippsland
- 4. The Timber Trail including options for accommodation and servicing

#### **Multi Use Trails**

- Continued development of 'Rail Trails' that together will form the basis of a 'Gippsland Trail'. This includes extensions westward from Leongatha and northwards from Woolamai Racetrack to eventually join int the outer Melbourne transport network
- 2. The development and implementation of the Gippsland Lakes Aquatic Trail.

Table 10. Actions for investment

ACTION	DESCRIPTION	PRIORITY
8.1	All partners to agree on investment priorities and proactively seek to invest in the development of market based experiences for Gippsland as outlined in this study.	

# 10 Next steps

This study provides a series of approaches and recommendations for trails in Gippsland. It is appropriate as a first step, following its endorsement by the funding agency, that the GLGN and agencies aligned to this plan implement the Gippsland Trails Coordinating Forum. With support from GLGN, PV, DELWP, Baw Baw and DGL, the forum can provide an implementation strategy with funders that includes consideration of investment priorities.

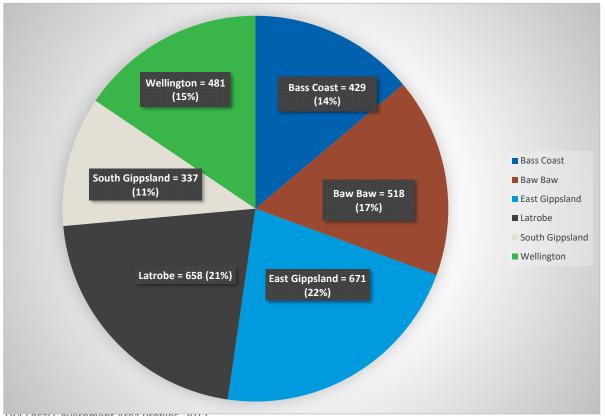

Individual business case and feasibility assessment will be required for some of the developments proposed in this study. By their very nature, the proposals are conceptual and require further detailed analysis and planning.

The development of investment prospectuses, including those in the DMP are important to signal to investors that Gippsland has considered the current offer, the gaps and the future priorities. It has also considered the benefits of investing and believes there is strong future and collaborative approach being implemented between government, industry, the community and the education sectors.

Gippsland Tracks and Trails Feasibility Study | September 2019

TKA Local Government Area Profiles, 2017.

## APPENDIX B – SUMMARY OF RELEVANT EXISTING PLANS AND STRATEGIES

DOCUMENT OWNER	TITLE AND YEAR OF PUBLISHING	SUMMARY OF INTENT	FOLLOW UP / ISSUES FOR THE GIPPSLAND FEASIBILITY STUDY
Bass Coast Council	Shaping a Better Bass Coast – Council Plan 2017- 2021	<ul> <li>Describes the vision, mission and values of Council. The vision being that 'Bass Coast will be known as a region that supports a sustainable and healthy community, and values and protects its natural assets'.</li> <li>The health priorities include supporting social connectedness.</li> <li>Strategic outcomes include; improving visitor infrastructure and enhancing the lifestyle of the local community, improving the economic value of the region, diversifying the region's tourism market mix by promoting year-round visitation.</li> <li>Eco Development strategic indicators include an increased focus on eco-tourism.</li> <li>References the Philip Island Visitor Economy Strategy as the main tourism plan to implement.</li> <li>Environment strategies include references to better balancing the natural environment and public access including foreshores and waterways.</li> <li>A strong focus throughout the plan on consultation, and good governance.</li> <li>Health and active community directly reference opportunities for healthy active lifestyles and connectiveness.</li> <li>The liveability pillar contains references to the need for access, connections and recreation.</li> </ul>	PI Visitor Economy Strategy – refer to its priorities for trail investment.  The Aspirational Networks Pathway Plan 2016
Bass Coast Council	Active Bass Coast - 2018 - 2028	Council's 10-year plan that sets the vision for the provision and use of open space and recreation activities in the Shire. The vision is 'a healthy and connected community that regularly participates in recreation and social activities in both natural and structured open spaces'.  • The plan covers 3 main themes – Active People, Active Places and Active Partnerships.  • The active places stream references 'connecting the Bass Coast Shire via walking and cycling trails'.  • Active partnerships references; 'Identifying and prioritising regional recreation facilities and boosting the economy via recreation tourism.  Walking has been identified as an activity 38% of the community enjoy doing, with participation in cycling at 9% of the community.  • The Gippsland Tracks and Trails Plan (this project) is a priority action.  • Active Places has an action to partner with PINP and PV to promote natural spaces and nature programs such as bushwalking.	

DOCUMENT OWNER	TITLE AND YEAR OF PUBLISHING	SUMMARY OF INTENT	FOLLOW UP / ISSUES FOR THE GIPPSLAND FEASIBILITY STUDY
		<ul> <li>Connecting Bass Coast actions, the Bass Coast Pathways Plan 2017 advocates for its priorities.</li> <li>The active partnerships section has an action to advocate for the extension of the George Bass Coastal Trail and the Bass Coast Coastal Trail.</li> <li>Priority projects include the Inverloch to Wonthaggi Trail and the Inverloch to Wonthaggi Trail, the San Remo Foreshore Trail, and the Bass Coast Rail Trail extension.</li> </ul>	
South Gippsland Shire Council	Australian Mtn Biking Magazine 2013	The article reviews Cement Hill near Foster. Cement Hill has a good mix of blue and black flow trails with good terrain. The write up is positive and encourages people to use the nearby facilities in Foster acknowledging that there is only a car park on site.	Add to the regional trail database.
Bass Coast Shire	Philip Island and San Remo Visitor Economy Strategy 2035	<ul> <li>An important document for the Bass Coast and PI. Sets the vision; 'PI to be recognised nationally and globally as a world leading sustainable tourism destination, where tourism is embraced by the community'. Relevant strategies include building connectivity.</li> <li>Future niche markets are identified and a product gap for the Island walking and cycling trails, as well other experiences.</li> <li>Guiding principles include balancing the environment and infrastructure, community lifestyle enhancement and creating jobs and workforce retention year-round.</li> <li>Market positioning of the Island and Bass Coast will be enhanced by walking trails and lookouts.</li> <li>Walking trails are listed as 'game changer project 8' with investment in coastal walkways, viewing platforms and recreational infrastructure.</li> <li>The strategy also seeks to promote the 'Best Walks of Gippsland' through a cooperative marketing program.</li> </ul>	Importance of the thematic and specifically game changer project 8 to build more trails for walking and recreation, and adding an additional \$3.7 mill per annum in additional expenditure.  Cooperative marketing programs for Gippsland and walking.
Bass Coast Shire	Economic Development Strategy 2016 to 2021	Acknowledgment that tourism contributes \$655 million directly and creates 3,100 jobs annually. Enhancement of tourism infrastructure is a key future direction.  Visit Bass Cast thematic includes the need for advocacy of more pathways, viewing platforms to attract a wider market of visitors.	More walking trails for economic development objectives.
Bass Coast Shire	Bass Coast Pathways Plan – August 2017	A plan that seeks to objectively assess the pathways in the Bass Coast that are inspirationally required. 53 aspirational pathways across the Shire identified. The following pathways scored very highly on the pathway assessment scoring system (some are community benefit):  1. George Bass Coastal Walk Extension	Consider the pathways that scored 'very high' in the feasibility study.

DOCUMENT OWNER	TITLE AND YEAR OF PUBLISHING	SUMMARY OF INTENT	FOLLOW UP / ISSUES FOR THE GIPPSLAND FEASIBILITY STUDY
		<ol> <li>Realignment of San Remo Anderson Pathway</li> <li>On road connection from George Bass walk to San Remo</li> <li>Corinella Foreshore Walking Trail</li> <li>Waterline Coastal Walking Trail Jam Jerrup to Corinella</li> <li>Connection to the Wonthaggi Heathlands on road</li> <li>South on Boundary Road from Bass Highway</li> <li>Connection from Archies Creek south to the rail trail at Dalyston</li> <li>Cape Patterson extension on Surf Beach Rd</li> <li>Coastal Walking Track along Cape Woolamai foreshore</li> <li>Coastal connections from Boys Home road to Churchill Is</li> <li>Coastal Walking around Rhyll</li> <li>Coastal walking along Newhaven foreshore</li> <li>Connection from Settlement Road</li> <li>Coastal walk from PI bridge to Cape Woolamai via the Esplanade</li> </ol>	
Baw Baw Shire Council	AMB Magazine	Promo piece on the Baw Baw Mtn Bike Trails – including the flow tracks and downhill tracks.	
Baw Baw Shire Council	AMB Magazine	Article on Erica Mtn Bike Park.	
Baw Baw Shire Council	Cycle Opportunities Assessment November 2017	<ul> <li>Deals with the 5 main cycling activities; Road Riding, Mtn Bikes, Gravel Rides, Touring and Cycle Events.</li> <li>Focusses on the Drouin Warragul area.</li> <li>Identifies the connections to Melbourne and the diversity of landscape as strengths.</li> <li>Identifies the lack of product knowledge as the weakness in promoting tourism.</li> <li>Identifies the variety of trails, highly visible signage and infrastructure as 3 priorities for attracting mtn bike riders.</li> <li>Gravel riders have become a growth sector in riding.</li> <li>References the Victorian Trail Strategy 2014-2024.</li> <li>Strategies for Growth include:</li> <li>Developing Partnerships</li> <li>Developing a Marketing Strategy</li> <li>Attracting Grants and Investment</li> <li>Improve Cycle Visitor Services.</li> </ul>	Consider the cycle tourism segmentation in the feasibility.  Provides NE Vic as a case study – see the NE Vic Cycle Optimisation Plan for ideas

DOCUMENT OWNER	TITLE AND YEAR OF PUBLISHING	SUMMARY OF INTENT	FOLLOW UP / ISSUES FOR THE GIPPSLAND FEASIBILITY STUDY
Baw Baw Shire Council	Bicycle and Walking Paths Development Plan 1998.	<ul> <li>Plan being replaced by a new strategy in 2019.</li> <li>Identifies Zones for Trail development / refinement:</li> <li>Noojee – develop 5 walking tracks radiating from the town centre that will help Noojee become a centre for trail use.</li> <li>Neerim – identifies Neerim as a starting point and seeks to develop / highlight 5 walks.</li> <li>Erica/Rawson – link Erica Rawson and Walhalla with pathways.</li> <li>Trafalgar/Yarragon – improvement of existing opportunities.</li> <li>Warragul/Drouin – develop the Two Towns Trail linking Warragul and Drouin.</li> <li>Longwarry/Baw Baw – OK as is.</li> <li>Baw Baw Circuit – consider a circuit track in Baw Baw Council area to link existing pathways.</li> </ul>	
Baw Baw Shire Council	Nature Based Tourism Development Strategy 2006	Identifies the core markets for Baw Baw short break visitors from Melbourne – families.  Bush walking, rail trails and adrenaline are products of strength.  Tourism contributed \$138 million to Baw Baw Shire and employed 1500 people.  Overnight stays from visitors are declining (to 2005) to 200,000 per annum.  500,000 day trippers.  Bushwalking is listed as a core activity of the targeted markets for Baw Baw.  Rail trails identified as a product suited to the older segments in the target market.  Major walks listed as:  Australian Alps Walking Track  Great Walhalla Alpine Track  Beech Trail, Baw Baw Alpine Resort  Mt Baw Baw Alpine Resort Walk  Mt Worth Walks  Tyers River Walk  Eastern Tyers Walking Track  Latrobe Trail – BBARMB  Latrobe Trail – BBARMB  Thomson River Walk  Glen Nayook Walk  Ada Tree Walk  Toorongo Falls Walk	Consider adding the walks to the database of walks for Gippsland

DOCUMENT OWNER	TITLE AND YEAR OF PUBLISHING	SUMMARY OF INTENT	FOLLOW UP / ISSUES FOR THE GIPPSLAND FEASIBILITY STUDY
		<ul> <li>Warragul Linear Park Discovery Walk</li> <li>Drouin Nature Reserve</li> <li>Horseshoe Bend Tunnel Walk</li> <li>Mountain Monarchs Walk</li> <li>Beech Gully Nature Walk</li> <li>Two Towns Trail (Drouin to Warragul)</li> <li>Noojee Rail Trail Bridge</li> <li>Powelltown Tramway</li> <li>Moondarra Rail Trail</li> <li>Tyers Junction Trail</li> <li>Walhalla Goldfields Rail Trail</li> <li>Walhalla Tramline Walk</li> <li>Loch Valley Tramway Walk</li> <li>Rokeby Rail Trail</li> <li>Recommends a number of new trails including:</li> <li>The boulders walk at St Gwinear in the Baw Baw NP.</li> <li>A Trestle Bridge loop walk at Noojee and a loop track at Glen Nayook.</li> </ul>	
Baw Baw Shire Council	Baw Baw Walk Ride Booklet – December 2011	A well-produced booklet from 2011 that provides info on all the main walks in the Baw Baw Council area. Lists 26 Tracks and Trails in Baw Baw Shire.  Provides info on each, including distance, photos and a description.	See brochure for adding to the tracks and trails database for Gippsland.
Baw Baw Council	Mt Baw Baw ARMB Mtn Biking Trails Concept Plan June 2011	<ul> <li>Provides an assessment and concept for mtn biking on Mt Baw Baw predominantly in the resort.</li> <li>Provides a description and map of the Baw Baw trails.</li> <li>Acknowledges the need for all season summer use at Baw Baw through trail development.</li> <li>Proposes trail heads in the village to tie in with the infrastructure and utilising the existing trail infrastructure where possible.</li> <li>Seeks to build 3 types of trail – X-country, flow and downhill.</li> <li>If all built, the resort will be a mtn biking hub tying in with other Gippsland hubs.</li> </ul>	Consider using 'hubs' rather than trails for the broader Gippsland feasibility strategy.
Latrobe City Council	Tracks Trails and Paths Strategy 2016	Latrobe is the largest municipality in Gippsland with a population of 72,000 and this strategy looks at among other elements the health benefits to residents who are generally more disadvantaged than many other municipalities and have lower health outcomes.  • Looks at various programs to get people more active on paths and trails including a cycle to work program.	Strategy references the 'Walking Maps' website run by Victoria Walks as a good source of all trail

DOCUMENT OWNER	TITLE AND YEAR OF PUBLISHING	SUMMARY OF INTENT	FOLLOW UP / ISSUES FOR THE GIPPSLAND FEASIBILITY STUDY
		<ul> <li>Several intertown links are proposed between major towns including Traralgon and Morwell, and Moe and Yallourn North.</li> <li>Infrastructure recommendations include water fountains for drinking and signage.</li> <li>Aspirational links mentioned in the plan include:</li> <li>Link to Yallourn North from Moe Yallourn Rail Trail</li> <li>Link to the Churchill Town to Hazelwood Pondage</li> <li>Link from the Yinnar township to Hazelwood Pondage</li> <li>Link from Traralgon to Traralgon South</li> <li>Link from Morwell to Churchill</li> <li>Link from Moe to Morwell</li> <li>Link from Yallourn North to George Bates Reserve</li> <li>Path on the North side of Narracan to south side of Narracan.</li> </ul>	and walks including maps and directions.
Latrobe City Council	Municipal Public Health and Wellbeing Plan 2013-2017	Plan fits under the Latrobe Council Plan which has a vision 'In 2026 the Latrobe Valley is a liveable and sustainable region with collaborative and inclusive community leadership'.  Being active is a fundamental part of the plan.  Community connectiveness and community safety in open spaces are important.	
Latrobe City Council	Public Open Space Strategy March 2013	Sets the connect for open space and provides the directions for open space management in Latrobe City.  The plan categorises open space into 3 levels; local, district and regional.  Strong emphasis on the importance of open space for communities	
Latrobe City Council	Latrobe City Events and Tourism Strategy 2018-2022	The purpose is to strengthen Latrobe City Council's profile and position in events and tourism creating a higher return on investment for the community and industry in Latrobe City.  The Strategy sets a vision to be Victoria's leading light in major events and regional experiences.  The strategy has 4 main objectives which drive a series of strategies and actions. The objectives include:  Increasing Visitation  Increasing Length of Stay and Visitor Spend  Increasing the Destination Profile  Promoting Community Connectedness	Strong links to visitor economy outcomes and to the Gippsland DMP.
South Gippsland Shire Council	Paths and Trails Strategy – 2018	Sets a vision for a central rail trail as an active corridor and the project list has this as a focus. Council has a slow rate of population growth and an older demographic.	Need to include the central rail trail focus in the regional thinking

DOCUMENT OWNER	TITLE AND YEAR OF PUBLISHING	SUMMARY OF INTENT	FOLLOW UP / ISSUES FOR THE GIPPSLAND FEASIBILITY STUDY
		The overarching vision is to:  Develop South Gippsland's walking, cycling, and horse-riding infrastructure for all abilities, and where practical, safely connect South Gippsland's residents, businesses, and visitors to town centres, schools and main tourism attractions.  Goals include:  1. The South Gippsland Experience – capitalise on the unique features of the region 2. Health and Well-being – providing safe trails for people to use for active and health outcomes 3. All Abilities – inclusion of all people and all abilities 4. Safety and perception – aimed at off road paths for safety of users 5. Connecting People and Places – integrated network and strategic links 6. Awareness and Education – creating opportunities for walking, horse riding and cycling 7. Economy and Tourism – high quality infrastructure contributing to a healthy and strong economy 8. Most streets in Sth Gipps fall below the 3,000 cars per day Austroads AARB design – so no cycle lanes are required 2018 projects include:  • The extension of the Great Southern Rail Trail to Nyora.  • The development of the Hoddles Mountain trail from Fish Creek with a look out point.  • Development of a link between Sandy Point and Waratah Bay.  • A number of paths and shared paths within town boundaries that are outside the scope of the regional overview.  • Indications that the Shire and the Prom Coast MTB group want to establish Cement Creek as a world class facility.	Alignment of the visions? Consider Cement Creek Trails in the regional review and study
South Gippsland Shire Council	Economic Development Strategy – 2018- 2020	States the objective of the strategy is to grow employment and businesses.  Build on the clean and green image and the brand of Prom Country.  The strategy has 3 goals:  Business attraction and development  Business Support  Promotion, marketing and networks  The strategy appears to be focussed on agriculture, manufacturing and transport.	Link objectives to the regional study and other Councils – build a consensus view on the importance of trails

DOCUMENT OWNER	TITLE AND YEAR OF PUBLISHING	SUMMARY OF INTENT	FOLLOW UP / ISSUES FOR THE GIPPSLAND FEASIBILITY STUDY
		Tourism is a pillar in the strategy – and focusses on lifestyle and linking other sectors.	
		Rail and walking tracks are listed as assets.	
		Promoting new and existing rail trails is a stated action.	
South Gipps Shire Council	Great Southern Rail Trail Extension –	The current trail stretches 71 km and this project seeks to extend it a further 20 km linking Welshpool and Alberton.	Consider the findings in the regional study
	Cost Benefit Analysis	The trail extension based on the assumptions would have a net positive benefit of \$2,239,000 and a BCR of 1.4, with an internal rate of return of 6.39%.	
	Dec 2017	The extension would lead to an additional 23 day trips and 21 overnight trips.	
		The sensitivity if 15% for break even.	
		12.4 FTE jobs are created in the operational phase of the extension.	
South Gippsland Shire Council	Prom Country Eco Impact Assessment and Visitor Profile – 2012/2013	<ul> <li>Tourism is important with most accommodation providers relying on tourism for at least 80% of their revenue.</li> <li>Annual occupancy reported at between 35% and 70% (Prom higher).</li> <li>Per person spend in winter was \$127 per night and \$99 in summer.</li> <li>Day trippers was \$80 in winter and \$42 in summer.</li> <li>Tourism directly employs 646 people in Sth Gippsland.</li> <li>Across all seasons a high proportion of visitors were couples.</li> <li>Recommendations include product development for growth in winter visitors.</li> <li>Not a lot of recommendations on trails generally.</li> </ul>	
Wellington Shire Council	AMB Article	Blores Hill expose – showcasing the site as a great all year mtn bike destination.	
Wellington Shire Council	Great Rides in Wellington	Brochure/booklet and online resource outlining the rides in Wellington.  Includes:  The Stratford Arts Trail Circuit – 8kn easy circuit around Stratford  The Sale Town Ride – 10 km easy ride  The Stratford Weirs Crossing Circuit – 14 k easy ride  The Sale Herb Gyatt Sanctuary Ride – 16 k easy ride  The Sale Longford and Swing Bridge rides at 16 km's and easy  The Heyfield Lake Glenmaggie ride – 16 km easy ride on sealed roads  The Maffra Bundalaguah Road circuit – 19 km easy ride  The Maffra RAAF base circuit ride – 24 km easy sealed ride	

DOCUMENT OWNER	TITLE AND YEAR OF PUBLISHING	SUMMARY OF INTENT	FOLLOW UP / ISSUES FOR THE GIPPSLAND FEASIBILITY STUDY
		<ul> <li>The Maffra Bellbird Corner Circuit ride – 25 km easy ride</li> <li>The Heyfield Dawson Flora Reserve – Cowwarr ride – 22 km and medium difficulty</li> <li>The Yarram Jack River ride – 24/33/38 km easy grade depending on the loops chosen</li> <li>The Yarram Port Albert Tarraville circuit – 36 km and easy grade on sealed roads</li> <li>The Rosedale Willung circuit – 49 km on sealed roads and easy to medium</li> <li>The Maffra to Glenmaggie to Heyfield circuit ride – 55 km and medium difficulty</li> <li>The Yarram to Balook and Tarra Valley ride – 66 km on sealed roads with a high degree of difficulty</li> <li>The Yarram Woodside Beach circuit – 62 km on sealed roads – easy grade</li> <li>The Maffra Briagolong Newry circuit – 70 km on sealed roads – easy grade.</li> <li>The Heyfield Cheynes Bridge ride – difficult on narrow sealed roads</li> <li>The Gippsland Plains rail trail – 67 km of rail trail between Stratford and Traralgon</li> <li>The Heyfield Blores Hill Mountain Bike Park = over 30 km of trails varying in difficulty</li> </ul>	
Wellington Shire Council	Walking and Cycling Strategic Plan – 2012-16	**Now technically out of date Focussed on physical activity for health and community benefits. Strong message about youth and using trails as the main method of transport through cycling, walking or other. The objectives are focussed on healthy, liveable and active communities and include:  Guiding the development of walking and cycling trails to encourage residents and visitors to become involved in activity  Finding destinations for walking and cycling  Removing barriers that discourage the use of infrastructure for recreation, health and well-being as well as commuting  Guiding new developments to ensure future provision of walking and cycling infrastructure  Developing principles that guide the development of walking and cycling path networks  Promoting in partnership with the community, the benefits of walking and cycling.  Trails mentioned that have not been included to date include the Grand Strzelecki Track, the Tarra Trail, as well as walks in the Alpine National Park, and the foothill forests.  Projects are predominantly footpaths, crossings, and share paths.  Partnerships are deemed as important.

 $\textbf{Gippsland Tracks and Trails Feasibility Study} \hspace{0.2cm} | \hspace{0.2cm} \textbf{September 2019}$ 

#### APPENDIX D - CASE STUDIES OF OTHER TRAILS AND TRAILS DESTINATIONS

#### Case Study: Three Capes Track, Tasmania, Australia

The Three Capes Track is a 4-day/3-night hike in Tasmania's south, totalling 48 kilometres in length. The walk is graded easy to moderate and leads visitors through a myriad of natural landscapes with exhilarating clifftop outlooks on Cape Pillar and Cape Hauy and stunning views to Cape Raoul. The trail experience starts at Port Arthur, with a 60-90 minute boat ride including interpretation around the Southern Peninsula to the start of the track.

The first day is a 4 kilometre walk. Day two is 11 kilometres, day three 19 kilometres and day four 14 kilometres.

The track is well-defined and purpose-built including timber boardwalks and several sections of stone steps. It also includes a series of interpretive encounters along the track, marked by whimsically-shaped benches and artistic installations. An accompanying handbook explains the tale of the Tasman Peninsula's human and natural history at each stop.

Overnight accommodation is at huts managed by Parks and Wildlife Service, with shared rooms featuring mattresses, toilets and all cooking facilities and equipment provided. Cold showers are also available.

A commercial operator has recently built two highend huts that offer fully serviced and accommodation packages, including all bedding, hot showers and food and wine.

The fee for 3 nights on a self-guided visit to the Three Capes Track is \$495 per person. This includes entry to Port Arthur Historic Site (valid for 2 years), car parking and secure lockers; Pennicott Wilderness Journey cruise departing Port Arthur twice daily; 3 nights self-catered accommodation in cabins on track; bus transfer from Fortescue Bay back to Port Arthur Historic Site twice daily; "Encounters on the Edge" guidebook with maps and trail access.

A maximum of 48 people can depart each day with bookings made online. Walkers can only travel in one direction.

Parks and Wildlife Service figures show that around 600 people per year hiked on the old tracks south of Cape Hauy before the creation of the official Three Capes Track. More than 1300 people hiked the Three Capes Track in the first month of its opening. A Media Release published in October 2017 by Elise Archer, the Minister for Environment and Parks stated that a total of 6,628 forward bookings had been received for the track

experience through to the end of August 2018.<sup>52</sup> Since opening in December of 2015, more than 15,500 people, locals and internationals, have completed the walk.<sup>53</sup>

A range of commercial operators provide services for Three Capes Track walkers including accommodation pre and post walk, shuttle services and 'gear and gourmet' food and equipment supplies. Although only one commercial operator can offer accommodation on the actual track, others are offering guided experiences on the track with accommodation off-track.

For visitors that do not wish to complete the entire 3 night Three Capes Track experience, Parks and Wildlife Service has also facilitated a 29 kilometre round-trip walk that accesses Cape Pillar via the old Cape Pillar track from Fortescue Bay, with a formal campsite provided at Wughalee Falls featuring tent platform, toilet and rainwater tank.

Some of the tourism and planning accolades that the Three Capes Track has received include: Best New Tourism Business – Tasmanian Tourism Awards – 2016; Best New Tourism Business – Qantas Australian Tourism Awards – 2016; International Planning and Design Award – American Trails – 2017; Tasmanian Development of the Year – Property Council of Australia – 2018; Ecotourism Winner – Tasmanian Tourism Awards – 2018.

#### Case Study: Barwon South West Adventure Trails, Victoria

The Barwon South West region of Victoria wanted to plan and position itself as an adventure trails destination. The region covers 9 local government areas and incorporates numerous reserves, natural areas and visitor destinations.

Previous planning efforts for walking, cycling and mountain biking had been challenged by the complexity of the region, its numerous stakeholders and the large range of trails and trail management arrangements.

Over 20 trails already existed in the region, including 6 international and nationally significant trails and mountain biking hubs. An impressive calendar of international and national cycling and trail based events was also in place.

A Vision and Business Case, Action Plan, Cycle Tourism Strategy, Marketing Strategy and Guidelines for Trail Planning, Design and Management were each prepared to achieve a coordinated and collaborative approach in developing a leading trails destination.

The approach taken was visitor-centric, rather than a landowner/manager approach and best-practice from world leading trail developers was utilised.

The outcomes included successful buy-in to the importance of lead and support trails, and agreement on which was which; community support and an understanding of the roles of the different trails; trails construction and management guidelines to assist the community; agreement to the commitment of funds to jointly invest in the priority trails; and a business case for investment.

Importantly, the project was been implemented with the stakeholders continuing to work closely together on the agreed strategy. This included giving priority to a small number of iconic trails that could position the region, without being parochial. These would be priorities for investment, development and marketing within the bounds of expected resources.

These prioritised trails would become flagships for the region, form the core adventure trails and cycle tourism offering in the region and be used to attract private and public sector investment, and would offer the best opportunity for revenue generation.

- Great Ocean Walk
- Grampians Peaks Trail
- You Yangs MTB Trails
- Surf Coast Walk
- Forrest MTB Trails
- Twelve Apostles Trail
- Great South West Walk

With implementation of the proposed improvements and if the leading trails continued to attract existing and new visitors to the region, it was estimated that a 10% increase in visitor numbers could be achieved. This would result in an estimated \$24 million in direct visitor expenditure per annum in the region and 273 jobs. In addition, the flow-on effects as a result of indirect expenditure were expected to be greater.<sup>54</sup>

The Barwon South West Adventure trail network is expected to deliver significant economic benefits to the Victorian community. With a 6 year investment of \$40 million, the trail network net upgrade is expected to deliver \$74.7 million in benefits over 10 years.<sup>55</sup>

TRC's success in developing a workable and consistent regional approach to partnering in the delivery of a trail destination in the Barwon South West region of Victoria was recognised in the Planning Institute of Australia (PIA) Awards for Planning Excellence. The Guidelines won the Victorian Best Planning Ideas – Large Projects Award in 2015. The project also received an award from Parks and Leisure Australia in 2016.

<sup>54</sup> TRC Tourism, Growing Adventure Tourism in Barwon South West Region, A Business Case for Investing in Regional Trails in Barwon South West Region, June 2015

<sup>55</sup> TRC Tourism, Growing Adventure Tourism in Barwon South West Region, A Business Case for Investing in Regional Trails in Barwon South West Region, June 2015

#### Case Study: Queenstown Trails, Queenstown, New Zealand

Queenstown Trails are a successful example of visionary planning to respond to changing trends and extend the trails offering. TRC's work in planning for this trails network is a benchmark in ongoing planning and adaptive management of a major trails network.

An initial strategy was developed in 2004 to guide development of a world-class 190+ km network of walking, hiking and biking trails across multiple tenures in the iconic nature-based and adventure destination of Queenstown. This trail network became an important local and tourism asset, with 90% of the plan having been implemented.

In 2015, a new strategic plan to guide the next 10-year phase of trail development and management was developed. In close consultation with trail stakeholders and community, outcomes of the first strategy and changes affecting use of the trails were analysed, and a vision and performance target were agreed.

The new plan consolidated work completed to-date and looked to respond to new opportunities not foreseen 10 years before. It also provided a solid footing for further growth in the trail use across the region and addressed the need to complete trail

linkages for local resident and visitor use; strategies to improve trail experience delivery; ways to promote increased use and community stewardship of trails; improved information gathering; and sources of sustainable funding for trails development and management.

A survey of Queenstown Mountain Bike Club members and trail users in 2016/17 indicated a range of economic impacts resulting directly from the Queenstown Mountain Bike trails:

- Mountain bike trail users were estimated to spend \$64 million per year in the Queenstown region. This spending covered bike related expenses, food and beverage, other retail spending, other adventure tourism spending and for overnight visitors, spending on accommodation.
- The trails generate a total of \$25 million in income for the Queenstown region annually.
- The operation of the trails and the users are estimated to generate a total of 335 FTE jobs in the region (both direct and indirect).<sup>56</sup>

<sup>56</sup> Review of Economic Impact of Queenstown Mountain Bike Trails Draft Report May 2017

The Queenstown Trails are undeniably a part of the success of the tourism industry in Queenstown, with visitation growth and spending at record levels. Queenstown was the South Island's number one visitor destination in 2018.<sup>57</sup>

The Queenstown Trails Trust Trail Count Report dated 3<sup>rd</sup> April 2017 reported that there have been 'a total 1,294,144 trail journeys and 5,758,941 total trail movements (clicks) since opening in October 2012, this includes 114,982 journeys so far in 2017, compared to 109,538 in the same period in 2016, a 5% increase year on year so far.'

In late 2018, Google mapped 120 km of the trail to bring the trails into the digital age and publish the hiking and cycling tracks online.

Further expansions to link the resort's outer suburbs are planned in 2019, with the first stage of building works expected to start by the end of the year.

Queenstown Trails are also currently part of a new project, which will connect 4 existing Great Rides and link 30 communities along a 530 km continuous cycle trail network across Otago. The Government has committed over \$13 million in funding for this proposed extension, which will be matched by local funding to reach the total \$26 million required.

<sup>57</sup> Radio NZ Article 28th January 2019 https://www.radionz.co.nz/news/national/381129/queenstown

# Port Campbell Princetown B100 Great Otway National Park National Park Melbourne AUSTRALIA Melbourne Vehicle Access Points

# Case Study: Great Ocean Walk, Victoria, Australia

The Great Ocean Walk is Victoria's premier long distance walk. It stretches approximately 104 kilometres along the south-west coast and traverses the coastline and forest from Apollo Bay to the iconic Twelve Apostles, Port Campbell National Park.

The trail offers walkers the option of short walks to day hikes and longer 7 night/8 day camping experiences. The proximity to local towns also allows for visitors to stay in 'o-walk' accommodation and enjoy a variety of independent or packaged services, such as tours, guides, transport providers, food and wine.

Most of the Great Ocean Walk sections could be classified as suitable for most ages and fitness levels, with some bush walking experience recommended.

The sections of the Great Ocean Walk can be broken up by campsite stops.

- Section 1 Apollo Bay Visitor Information
   Centre to Elliot Ridge Campsite = 10.3km.
- Section 2 Elliott Ridge Campsite to Blanket Bay Campsite = 13.3km.
- Section 3 Blanket Bay Campsite to Cape
   Otway Campsite = 11.4km.
- Section 4 Cape Otway Campsite to Aire River Campsite = 9.8km.
- Section 5 Aire River Campsite to Johanna Beach Campsite = 15.3km.
- Section 6 Johanna Beach Campsite to Ryans
   Den Campsite = 14.8km.
- Section 7 Ryans Den Campsite to Devils Kitchen Campsite = 15.3km.
- Section 8 Devils Kitchen Campsite to Great
  Ocean Road information bay adjacent to
  Glenample Homestead = 14.1km.

Self-guided walkers can choose to have accommodation arranged or to use the campsites along the route. Each campsite has 8 individual camp 'pads' set into the surrounding bushland which can accommodate a 2-3 person tent. Registration fees apply at these campsites and hikers must book at least 2 weeks in advance.

Part of the appeal of the walk is that it is accessible to everyone, from visitors that want to carry their own equipment and walk independently, to those who wish to only carry a daypack and enjoy a more luxurious transfer and accommodation hosted option.

There are no trail fees to walk the Great Ocean Walk.

Opened in January 2006, the Great Ocean Walk displayed signs of immediate economic benefits. The Victoria's Trails Strategy 2013-2023 stated that the Great Ocean Walk involved 'more than 40 marketing partners; and in 2009, the Walk provided an estimated annual impact of \$15 million (including marketing, visitor expenditure and flow-on expenditure) and more than 100 full-time jobs.'

## Case Study: Ngā Haerenga, the New Zealand Cycle Trail

Each year more than 1 million people use the 22 Great Rides of Ngã Haerenga, the New Zealand Cycle Trail.<sup>58</sup>

The Great Rides are the premier rides on the New Zealand Cycle Trail. They are predominantly off-road trails that showcase the very best of New Zealand's landscape, environment, culture and heritage. These trails have given new life to old tracks, roads and disused railways, provide exciting journeys on 2,500 kilometres of trails suited to everyone from sightseeing riders, to serious mountain bikers up for a challenge.

'Nga Haerenga, The New Zealand Cycle Trail' originated as a partnership project between the Government and the Green Party of

Aotearoa New Zealand. The Government invested \$50 million into turning this idea into a reality, with additional contributions of \$30 million from local Government and cycle trail

Trusts resulting in the various Great Rides being established across the country. The trail is estimated to have a cost benefit ratio of \$1 to \$3.55<sup>59</sup> and the estimated economic contribution of the trails in 2015 was \$37.4 million.<sup>60</sup>

The Great Rides are supported by over 400 Official Partner businesses around the country offering a wide array of experiences from accommodation to bike hire, tours, transport, attractions and activities.

- Twin Coast Cycle Trail, Northland / 84 km / 2 days
- Hauraki Rail Trail, Coromandel / 77 km / 2 days
- Waikato River Trails, Waikato / 102 km / 1-4 days
- The Timber Trail, Central North Island / 77 km / 2 days
- Motu Trails, East Coast / 132 km / 1-3 days
- Te Ara Ahi (Thermal by Bike), Rotorua / 66 km / 2 days
- Great Lake Trail, Taupo / 74 km / 2-3 days
- Mountains to Sea, Ruapehu-Whanganui / 317
   km / 1-6 days
- Hawke's Bay Trails, Hawke's Bay / 187 km / 1-4 days
- Queen Charlotte Track, Marlborough Sounds / 70 km / 2-3 days
- Dun Mountain Trail, Nelson / 38 km / 4-6 hours

<sup>&</sup>lt;sup>59</sup> MBIE Ngā Haerenga NZ Cycle Trail Evaluation Report 2016 (based on 2015 calendar)

<sup>60</sup> https://www.mbie.govt.nz/immigration-and-tourism/tourism/tourism-funding/nga-haerenga-the-new-zealand-cycle-trail/

- Great Taste Trail, Tasman / 175 km / 1-4 days
- West Coast Wilderness Trail, West Coast / 135 km / 4 days
- St James Cycle Trail, Canterbury / 64 km / 1-2 days
- Alps 2 Ocean, Canterbury to Otago / 64 km / 1-2 days
- Otago Central Rail Trail, Otago / 150 km / 1-5 days
- Roxburgh Gorge Trail, Otago / 34 km / 1 day
- Clutha Gold Trail, Otago / 75 km / 2 days
- The Queenstown Trail, Southern Lakes / 99 km / 1-3 days
- Around the Mountains, Otago to Southland / 175 km / 1-3 days
- Remutaka Cycle Trail, Wellington / 114 km / 1-4 days
- Old Ghost Road, West Coast / 85 km / 2-4 days
- Little River Trail, Christchurch / 50 km / 1 day

In 2013, the Great Rides experienced 56% average growth, with an estimated 97,000 trail users during the month of January alone. Reports show more than 1,200 jobs have been created and the trails are boosting regional economies. <sup>61</sup>

<sup>61</sup> https://www.nzcycletrail.com/about/history/

Case Study: The Timber Trail, Central North Island, New Zealand

The Department of Conservation's concept of a cycle trail through Pureora Forest Park was agreed to in 2010. The trail starts in the old forestry village and heads south along disused logging roads and through mature forests to the farmland and village of Ongarue. New bridges and basic facilities such as toilets and signage were constructed. The total cost was NZD\$5 million.

The business case for the trail estimated 4,000 overnight visitors and 3,000 day visitors by Year 5, with a caveat that accommodation was provided at the midway point.

The trail opened in March 2013 and within a year 3,000 cyclists were using it, many riding it in a single day due to a lack of accommodation. The trail immediately received excellent reviews as the best 1-2 day remote mountain bike Great Ride in New Zealand.

The constraint to growth in the markets was accommodation on the trail. Whilst accommodation at the start and end was developed and camping was available, it took time for the private sector to commit to building a lodge. In early 2017, a 50-bed dedicated trail lodge was opened (Timber Trail Lodge).

Shared and ensuite rooms, a licensed restaurant and dedicated cycle touring facilities were provided. The lodge was initiated by local investors who received some financial assistance from a Ministry of Business, Innovation and Employment private sector support programme, the now abandoned Tourism Growth Partnership Fund. The total lodge build cost NZD\$3.5 million, with the NZ Government grant contributing one-third of this.

The development of the accommodation complemented a range of local transport and bike hire providers. There are now 4 significant providers surrounding the trail. There has also been the rejuvenation of the villages at the start and finish of the trail with the development of cafes and other accommodation. A proposed serviced camping operation was consented and due to open in the 2018-2019 season.

The users of the trail were initially serious mountain bikers from the main North Island cities of Wellington and Auckland) who would do the trip in one day. This market stimulated the growth of the transport providers. The providers also offered transport from the trail at the halfway point to nearby accommodation, and this grew the market for a 2 day option with accommodation.

The market shifted and expanded to include the older (60-70 years) and family groups. The markets now predominantly come from throughout New Zealand and there are strong emerging markets from Australia and Europe. Specialised bike tour operators are making their presence felt and the current 10% overseas market share is likely to move closer to 25% within the next 5 years.

The customer profile for the Timber Trail Lodge is more varied than predicted. The assumption that the markets would be virtually all cyclists was wrong. The increase in the Timber Trail walkers has opened up the walking market and small group company retreats, and social groups are a strong emerging market for the lodge.

From over 3,000 visitors in the first year of the trail, growth has been solid for the first 5 years with now over 6,000 2 day riders and another 1,000+ day riders. Early market predictions for 2 day riders are up by 50%.

In the last 2 years, the Timber Trail has been incorporated into a major mountain bike event and the Te Araroa Trail, a 3,000 kilometre walk the length of New Zealand.

The impact of the trail for the local region has been regarded, both nationally and internationally, as a very successful part of the regional economic development programme.

The lessons learned from the Timber Trail development include ensuring that:

- There is a well-development business case that is confident there is a market
- The trail has legal access secured
- The trail has a governance group
- Leadership exists for the development of the concept
- There are opportunities for the public sector to support the start-up of SMEs.

# APPENDIX E - TRAIL MARKETS AND THEIR PREFERENCES

MARKET	DESCRIPTION	EXPERIENCE NEEDS AND PREFERENCES
	Reg	ional Residents
Walkers and Hikers	<ul> <li>Wide range of users and ability levels including people using trails for exercise, commuting, relaxation and leisure activities.</li> <li>Some groups using rail trails and local paths, some seeking nature and adventure experiences in the regions National Park and reserves.</li> </ul>	<ul> <li>Safe short trails for daily use.</li> <li>A range of all-ability access trails.</li> <li>Short to long trails for weekend leisure activities both close to population centres and within easy weekend travel from home. Appealing destinations. Linked or nearby activities, attractions and accommodation.</li> <li>Short to long hiking trails in a variety of locations (from near-urban to remote) at a range of difficulties.</li> <li>Links from accommodation hubs to areas of interest such as the Latrobe Valley, South Gippsland, East Gippsland.</li> <li>Accessible trailheads with adequate parking and facilities. Overnight or multi-day trails with provision for on-trail camping or hut accommodation or nearby off-trail accommodation.</li> <li>Regional residents often seek areas away from the busy tourism hot spots in peak periods to continue to enjoy their local area highlights. Gippsland has a wide variety of trails that can be used when some areas are busy.</li> </ul>
Trail Runners	<ul> <li>People running on trails for exercise, training for events and for adventure.</li> </ul>	<ul> <li>Range of short and long trails in and near urban areas, parks and reserves.</li> <li>Challenging backcountry trails for extended running.</li> <li>Connected trails suitable for running events such as the Mitchel River Trail Run.</li> <li>Range of participative and competitive trail running events.</li> </ul>
Cyclists (excluding mountain biking)	<ul> <li>Wide range of users and ability levels including people cycling for exercise, commuting, relaxation and leisure activities and touring.</li> </ul>	<ul> <li>Safe cycling or shared use trails for daily use.</li> <li>Short to long cycle trails for weekend leisure use both close to population centres and at visitor hubs within easy weekend travel from home. Appealing destinations. Linked or nearby activities, attractions and accommodation such as wineries, cafes and good food. Some may require bike hire or transport services</li> <li>Accessible trailheads with adequate parking and facilities such as the Gippsland Plains Rail Trail which can utilise the train as a one way travel source and then ride the return leg back to the car.</li> </ul>
Mountain Bikers (Use of a purpose-built mountain bike on purpose- built trails, shared trails or other off-road trails.)	<ul> <li>Children and families seeking a safe entry level or skills development experience.</li> <li>Riders in the young adult to middle age groups.</li> <li>Experienced local riders who have ridden for many years in the region, and who continue to contribute to the trail network through building, maintenance and other activities</li> </ul>	<ul> <li>Trails and bike parks accessible from population centres and together offering a range of trail types.</li> <li>Inter-connected trail networks offering a range of difficulty levels and technical challenges. Ideally offering at least a day's riding.</li> <li>Skills parks and technical trails.</li> <li>Participative and competitive events.</li> <li>Trailheads with appropriate facilities including car parking, bike wash-down, food services, shuttle transport.</li> <li>A range of trails accessible for shorter 1 to 4 hour rides near places of work and living. Trails generally for the local user market although will travel more broadly to key trails regionally and will travel nationally for longer weekend breaks and short holidays.</li> </ul>

MARKET	DESCRIPTION	EXPERIENCE NEEDS AND PREFERENCES
		<ul> <li>Some feature rides that might include long descents, well designed and constructed features, outstanding scenery and other features.</li> <li>Diversity of offerings.</li> </ul>
Horse Riders	<ul> <li>Likely to be members of local horse riding clubs in the main.</li> </ul>	<ul> <li>Bridle trails accessible from horse agistment areas/ equestrian centres or with adequate horse trailer parking and unloading facilities.</li> <li>Some further dedicated bridle trails with the appropriate facilities.</li> </ul>
	Do	mestic Visitors
General Visitors	<ul> <li>People on a holiday or visiting friends and relations.</li> <li>For Gippsland, this is likely to be shorter easy to access trails such as day walks near the Sydney Melbourne Touring Route, or close to the Noojee area where day trippers can experience easy walk experiences.</li> </ul>	<ul> <li>Trails of different types to or at points of interest suited to a range of abilities.</li> <li>Something different to do while on holiday.</li> <li>Equipment and bike hire.</li> <li>Short guided tours.</li> <li>Easily available information and packaged tours/product to provide the experience in an easily accessible way.</li> <li>Picnic and toilet facilities close to the trail so that the stop can be an enjoyable one and made easy for them.</li> </ul>
Soft Adventure	<ul> <li>Families, adult couples and retired people seeking trail activities of one or more day's induration.</li> <li>Some may visit the region specifically to undertake a particular trail.</li> <li>This will generally occur on trails that are more widely used and offer a 'safer' entry into trail use</li> </ul>	<ul> <li>Hiking and cycle trails packaged for journeys of one or more days.</li> <li>Guided or self-guided tours or packages, accommodation, linked activities.</li> <li>Mountain bike parks with variety and/or iconic rides.</li> <li>Transport, accessible trailhead, equipment and bike hire.</li> <li>Good pre-trip information and booking.</li> <li>Engaging, immersive interpretation.</li> <li>Generally good facilities nearby for food and beverage after completing the trail adventure.</li> </ul>
Hikers	<ul> <li>Self-sufficient hikers, walking clubs, youth and other social groups in a variety of ages engaging in short and long experiences.</li> <li>May visit the region specifically to walk a particular trail.</li> </ul>	<ul> <li>Short to long hiking tracks at a range of difficulty levels showcasing landscapes or offering a special challenge. An example might be Lake Tarli Karng or a number of other offerings in the region.</li> <li>Accessible trailheads with adequate parking and facilities. Overnight or multi-day trails with provision for camping or even staying at cattleman huts or nearby off-trail accommodation.</li> <li>Transport and shuttles, especially for one-directional trails.</li> <li>Accessible track information.</li> </ul>
Mountain Bikers	<ul> <li>Riders in the young adult to middle age groups who may visit the region specifically to ride a particular trail or bike park.</li> <li>Club members on trips.</li> </ul>	<ul> <li>Trail networks and bike parks that offer 2 to 3 days riding and a range of trail type and difficulty levels.</li> <li>Iconic and challenging rides.</li> <li>Multi day epic trail with support services to make experience more accessible.</li> <li>Trailheads with appropriate facilities including car parking, bike wash-down, food services, shuttle transport.</li> <li>Bike hire and repair services.</li> <li>Good pre-trip information and booking.</li> </ul>

MARKET	DESCRIPTION	EXPERIENCE NEEDS AND PREFERENCES
Education Groups	Schools, outdoor education and youth groups from within and near the region.	Accommodation and transport that is bike friendly, allowing for washing, storage and access to bikes.  Guided or self-guided walking, hiking, cycling, mountain biking or horse riding experiences that offer environmental or cultural learning, outdoor skills development, challenge and team building opportunities.  A range of trails will be needed suited to different ages and skills.  Nearby accommodation and education facilities suited to school and youth groups. A number of educational 'camps' in Gippsland provide some basis for exploring outwards from these. Wilsons Promontory is also popular for school groups.  Trails experiences may be part of longer learning products or packages.  Good pre-trip information and booking.  Engaging, immersive interpretation.
		national Visitors
Walking Tourists	Mainly visitors from USA, UK, Germany, Japan, Netherlands and New Zealand ranging in age from young adult to over 55, travelling with a partner or alone.	<ul> <li>Iconic, soft adventure walks with guided and self-guided products and packages providing accommodation and linked experiences.</li> <li>A range of other walking and hiking opportunities and nature-based and outdoor pursuits.</li> <li>Adventure activities and packages.</li> <li>Transport, equipment hire.</li> <li>Good pre-trip information and booking.</li> <li>Engaging, immersive interpretation and signs to assist with the feeling of safety and accessibility.</li> </ul>
Cycle/ Mountain Biking Tourists	Mainly visitors from Australia, UK, USA, Germany, Canada, Netherlands aged from young adult to people in their 50's and 60's, travelling alone or with a partner.	<ul> <li>Iconic and challenging rides and trail journeys.</li> <li>Outstanding trail networks and bike parks that offer 2 to 3 days riding and a range of trail type and difficulty levels.</li> <li>Multi day epic trail with support services to make experience more accessible.</li> <li>Trailheads with appropriate facilities including car parking, bike wash-down, food services, shuttle transport.</li> <li>Bike hire and repair services.</li> <li>Accommodation and food and beverage appropriate for people travelling long distances for an outstanding experiences.</li> <li>Good pre-trip information and booking.</li> <li>Signature events.</li> </ul>

# APPENDIX F - GIPPSLAND TRAIL AREAS

AREA / TRAIL	PREDOMINANT LAND MANAGER	TRAIL USE	DESCRIPTION
Noojee / Neerim	DELWP, Parks Vic and Baw Baw Shire Council	Mostly short walks	This area of west Gippsland boasts a number of higher quality short walks designed for use predominantly by Melbourne based day trip markets. Includes well known visitor sites such as the Trestle Bridge and the trail to Toorongo Falls.
			Shorter trails for community benefit include the Rokeby Cross Over track and the trail to Neerim.
			Nearby and in the connection to the Yara Valley, the Ada Tree walk in State Forest is popular to the tree that once was Victoria's tallest.
Walhalla / Mount Baw	Parks Vic, DELWP, MBBAR, Baw Baw Shire Council	A mixed collection of trails. Includes short walks, mountain biking areas, long trails and ski areas	Walhalla is a visitor destination with a variety of short walks including the Cricket Ground trail. It is also the start/end of the Australian Alps Walking Track – the original and probably most well-known long-distance rail in Australia.  Mount Baw Baw Alpine Resort and Baw Baw National Park are home to ski trails, shorter and longer walks and mountain biking.
Erica Rawson	DELWP, Baw Baw Shire Council, Parks	Mountain Biking	Erica hosts a smaller mountain biking area frequented by predominantly local and regional visitors.
Mount Worth State Park	Parks Vic	Walking	A series of short walks radiate from the Moonlight Creek car park and picnic area.  Predominantly local users.
Morwell NP	Parks Vic	Walking	Short walks to immerse visitors into the forest and gullies in the area. Use primarily by local and regional visitors.
Tarra Bulga NP	Parks Vic	Walking	A series of well-designed and maintained short walks offering high quality access to the tall forests of the Strzelecki Ranges. Caters to visitors from all markets and the area includes picnic facilities, toilets and car parks.
Phillip Island	Phillip Island Nature Park, DELWP, South Gippsland Council, Parks Vic	Various	Includes the very popular Cape Woolamai walks, and the main trail linking Cowes and the beaches to the south and west on the Island. Walks around the Nature Park are also popular.

AREA / TRAIL	PREDOMINANT LAND MANAGER	TRAIL USE	DESCRIPTION
The Bass Coast and Cape Liptrap	Parks Vic, Bass Coast Council	Various mostly walking	Includes the George Bass Coastal Walk – a spectacular walk along cliffs and coastal vegetation and the Point Smythe walk further south near Inverloch.
			The area also includes other shorter walks that are popular with local and regional visitors.
Bass Coast Rail Trail	Bass Coast Council	Multiple Use	The trail is a very popular trail and includes the Kilcunda Trestle Bridge. The rail trail includes Wonthaggi and through in the west to Wolamai Racetrack. Possible extensions to the north west would include a future link to the Great Southern Rail Trail.
Foster / Cement Hill	Parks Vic, South Gippsland Council	Mountain Biking	A regionally significant mountain bike recreation area that offers a strong intermediate trail offer close to Foster.
Great Southern Rail Trail	South Gippsland and Wellington Councils	Multiple Use	A very well-known and well used rail trail from Leongatha in south Gippsland to Port Welshpool. Extensions at either end of the trail are being considered and planned for at present. The trail passes through many small towns and has potential to assist in the development of trail related businesses. The trail caters for visitors and local communities with sections being used locally.
Wilson Promontory	Parks Vic	Various	Wilsons Promontory is one of Victoria's best-known walking destinations. It offers a range of trails from easy short walks along the beaches and coastal headlands, to longer walks that can be remote and challenging. The remote and natural areas in the northern and eastern areas of the Prom offer wilderness walks, while the Tidal River area Is often crowded and with well-formed easy nature trails including the Loo-ern Boardwalk.
			The Circuit Track and access to the Lighthouse in the southern areas is very popular and serviced campsites including water and toilets are available to book.
90 Mile Beach	DELWP, Wellington and East Gippsland Shire Councils	Shorter Walks	Includes short walks in the fishing villages and small towns of Nooramunga Coastal Park and the 90 Mile Beach. Includes the Port Welshpool Long Jetty, the Old Port Trail at Port Albert and the McLaughlins Beach boardwalk.
Sale Wetlands	Wellington Shire Council, Parks Vic	Multiple Use and Walks	The Sale Wetlands offer outstanding bird life, wetlands walks on boardwalks and multiple use trails. The Lake Guthridge walk is popular with community for outdoor activity.
Latrobe Valley	Latrobe City Council	Multiple Use Trails	Extensions of trails is occurring to link the Latrobe Valleys main population centres of Traralgon, Moe and Morwell. The trails offer community access to services and infrastructure, activating exercise opportunities and further connections for businesses.

AREA / TRAIL	PREDOMINANT LAND MANAGER	TRAIL USE	DESCRIPTION
			In addition the Moe Yallourn Rail Trail is a popular trail linking communities and providing for local use and recreation.
Warragul / Drouin	Baw Baw Shire Council	Multiple Use Trails	The Two Towns Trail links Drouin and Warragul and is an important piece of community infrastructure. It provides connectivity between the two main population centres of Baw Baw Council and also provides a spine for potential growth of the trail connectivity.
Strzelecki Ranges	DELWP, Council, Parks Victoria	Multiple Trails for multiple users	Includes the Grand Strzelecki Trail and the Grand Ridge Rail Trail. Both are managed for multiple users and the Grand Ridge Rail Trail has received investment in recent times including new bridges. The Grand Strzelecki Trail is at times affected by logging and some parts of the trail require maintenance but a strong local connection and the Association that was created helps fund and implement maintenance on the trail.
Central Gippsland Mtn Biking	Latrobe City Council	Mountain Biking	Haunted Hills MTB Park is under development at the time of writing this study, the Gippsland Mountain Bike Club will manage the site and it will include over 15 kilometres of trails designed for all levels of riding, while aimed as an introduction to riding in Gippsland.  Other trail parks include Glengarry North and Maryvale Pines trails which have strong local and regional offerings.
Gippsland Plains Rail Trail	Latrobe City Council and Gippsland Plains Rail Trail Committee of Management	Multiple Use	A premier rail trail traversing the Gippsland Plains linking Traralgon and Stratford. The trail passes through small towns and is well utilised as a day trip with people able to catch a train one way and ride one way. The trail is also used as a community resource for many of the smaller towns. Some sections remain on or near roads and further works are planned.
Southern Alps	Parks Vic, DELWP, East Gippsland and Wellington Councils	Various	A range of short to medium walks existing the southern foothills of the Alps north of Licola and Dargo.  Includes some well-known walks such as Lake Tarli Karng, and elements of the Bicentennial Trail. A range of shorter walks also exists including day walks to mountains such as the Crinoline and many of the mountain huts and waterfalls in the area. This includes Bryces Gorge trail and Guys Hut walks.
Mitchell River NP	Parks Victoria	Walking	A number of well-known walks including the culturally significant Den of Nargun Track and circuit track, as well as the 18 km Mitchell River trail.

AREA / TRAIL	PREDOMINANT LAND MANAGER	TRAIL USE	DESCRIPTION
Blores Hill	Parks Vic and Gipps Mtn Bike Club	Mtn Biking	A mountain bike park near Lake Glenmaggie offering a strong trail network and expanding number of trails. Holds regional events and is of regional significance.
Mt Taylor just north of Bairnsdale	DELWP	Mtn Biking	Strong regional and local offering of trails for mountain biking. Includes a hard-downhill trail for experienced users.
Colquhoun and Nowa Nowa	Parks Vic and DELWP	Mtn Biking and Walks	Two separate mountain bike parks in relatively close proximity although offering different trails for riders. Both are popular and have varying degrees of infrastructure.  Separate walking trails around the Nowa Nowa Arm provide a strong walking opportunity along 12 kms of trail. Facilities exist.
East Gippsland Rail Trail	East Gippsland Shire Council, DELWP and others	Multiple Use	94 kilometres of rail trail stretching from Bairnsdale to Orbost. Sections are well maintained and have been the recipient of a recent grant to upgrade the surface. Other sections provide long forest and gravel surfaced riding closer to the eastern end of the trail.
Lakes Entrance	East Gippsland Shire Council	Multiple Trails for Multiple Use	The trail offering includes the very popular Lakes Entrance Walk to the entrance of the Lakes along coastal foreshores. Other walks include the proposed new trail around Cunningham Arm and near Kalimna Wharf.  Lakes Entrance Discovery Trail connects Lakes Entrance with the East Gippsland Rail Trail with recent work ensuring the standard and accessibility of the trail matches the rail trail through to
			Lakes Entrance.
Omeo and Oriental Claims	Parks Vic and DELWP	Multiple Use	Oriental Claims has a number of walking tracks through the old mining and diggings areas.  Omeo is also seeking to develop a significant mountain bike park with detailed planning under way.
Princes Highway East Day Walks	Parks Vic, DELWP	Walks	A number of important short walks on the Princes Highway offering travellers an opportunity to stop while on the highway and enjoy the areas nature. These include the McKenzie River Rainforest Walk, Genoa Peak climb (near Mallacoota) and other nearby walks and Raymond Creek Walk near Orbost.
Cape Conran	Parks Vic	Walks	The Cape Conran Nature Trail offers a strong regional offer for visitors to the area as well as locals and nearby residents. Passes through Coastal heathland and forests.

AREA / TRAIL	PREDOMINANT LAND MANAGER	TRAIL USE	DESCRIPTION
Mallacoota	Various	Walks	Mallacoota offers a number of short walks including the start of the Wilderness Coast Walk through the foreshore of Mallacoota Inlet and Bass Straight. Nearby Genoa Peak is a good climb with outstanding views from the top. Accessing the Cape Howe wilderness walks is via Mallacoota and the Inlet.
East Gippsland Forests	Parks Vic, Various	Walks	A general description for a number of walks in the East Gippsland High Country. Includes the Erinunderra Rainforest Walk and the Snowy River Gorge Walks. Mostly remote from the main touring routes but offering a high-quality experience.
Wilderness Coast Walk	Parks Victoria	Long Distance Walk	One of Victoria's icon walks that offers a strong wilderness experience with self-reliance required. Generally, people walk from Cape Conran to Mallacoota or vice versa although shorter sections are available for walkers by accessing the coast via Wingan Inlet, or Point Hicks.
Australian Alps Walking Track	Parks Vic	Long Distance Walk	Australia's most well-known long-distance walking track traversing the Australian Alps and Great Divide from Walhalla in the south to Canberra in the north. Very few people walk the entre track in one effort – with some sections being very popular and walked by tens of thousands of people a year and others by only several dozen.
Raymond Island Koala Walk	DELWP, East Gippsland Shire Council, Parks Vic	Short Walk	A small community driven trail that provides visitors access to viewing Koalas in their native habitat.
