Asset upgrade expenditure	2,371	1,479
Total capital works expenditure	16,765	11,012

The above statement of capital works should be read in conjunction with the accompanying notes.

Introduction

South Gippsland Shire Council was established by an order of the Governor in Council on 2nd December 1994 and is a body corporate. Council's main office is located at 9 Smith Street, Leongatha.

Statement of compliance

These financial statements are a general purpose financial report that consists of a Comprehensive Income Statement, Balance Sheet, Statement of Changes in Equity, Statement of Cash Flows, Statement of Capital Works and notes accompanying these financial statements. The general purpose financial report complies with Australian Accounting Standards, other authoritative pronouncements of the Australian Accounting Standards Board, the Local Government Act 1989, and the Local Government (Planning and Reporting) Regulations 2014.

Note 1 Significant accounting policies

(a) Basis of accounting

The accrual basis of accounting has been used in the preparation of these financial statements, whereby assets liabilities, equity, income and expenses are recognised in the reporting period to which they relate, regardless of when cash is received or paid.

Judgements, estimates and assumptions are required to be made about the carrying values of assets and liabilities that are not readily apparent from other sources. The estimates and associated judgements are based on professional judgement derived from historical experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates.

Revisions to accounting estimates are recognised in the period in which the estimate is revised and also in future periods that are affected by the revision. Judgements and assumptions made by management in the application of AAS's that have significant effects on the financial statements and estimates relate to:

- the fair value of land, buildings, infrastructure, plant and equipment (refer to note 1 (k))
- the determination of depreciation for buildings, infrastructure, plant and equipment (refer to note 1 (I))
- the determination of employee provisions (refer to note 1 (r))
- the determination of landfill provisions (refer to note 1 (s))

Unless otherwise stated, all accounting policies are consistent with those applied in the prior year. Where appropriate, comparative figures have been amended to accord with current presentation, and disclosure has been made of any material changes to comparatives.

(b) Changes in accounting policies

There have been no changes in accounting policies from previous period.

(c) Committees of management

All entities controlled by Council that have material revenues, expenses, assets or liabilities, such as committees of management, have been included in this financial report. Any transactions between these entities and Council have been eliminated in full.

(d) Accounting for investments in associates

Associates are all entities over which Council has significant influence but not control or joint control. Investments in associates are accounted for using the equity method of accounting, after initially being recognised at cost.

e) Revenue Recognition

Income is recognised when the Council obtains control of the contribution or the right to receive the contribution, it is probable that the economic benefits comprising the contribution will flow to the Council and the amount of the contribution can be measured reliably.

Rates and Charges

Annual rates and charges are recognised as revenues when Council issues annual rates notices. Supplementary rates are recognised when a valuation and reassessment is completed and a supplementary rates notice issued.

Note 1 Significant accounting policies (cont.)

e) Revenue Recognition (cont.)

Statutory fees and fines

Statutory fees and fines (including parking fees and fines) are recognised as revenue when the service has been provided, the payment is received, or when the penalty has been applied, whichever first occurs.

l Isar faas

User fees are recognised as revenue when the service has been provided or the payment is received, whichever first occurs.

Grants

Grant income is recognised when Council obtains control of the contribution. This is normally obtained upon their receipt (or acquittal) or upon earlier notification that a grant has been secured, and are valued at their fair value at the date of transfer.

Where grants or contributions recognised as revenues during the financial year were obtained on condition that they be expended in a particular manner or used over a particular period and those conditions were undischarged at balance date, the unused grant or contribution is disclosed in note 6. The note also discloses the amount of unused grant or contribution from prior years that was expended on Council's operations during the current year. Contributions

Monetary and non monetary contributions are recognised as revenue when Council obtains control over the contributed asset.

Sale of property, infrastructure, plant and equipment

The profit or loss on sale of an asset is determined when control of the asset has irrevocably passed to the buyer. Interest

Interest is recognised as it is earned.

Dividends

Dividend revenue is recognised when the Council's right to receive payment is established.

Other Income

Other income is measured at the fair value of the consideration received or receivable and is recognised when Council gains control over the right to receive the income.

(f) Fair value measurement

Council measures certain assets and liabilities at fair value where required or permitted by Australian Accounting Standards. AASB 13 Fair value measurement, aims to improve consistency and reduce complexity by providing a definition of fair value and a single source of fair value measurement and disclosure requirements for use across Australian Accounting Standards.

AASB 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value under AASB 13 is an exit price regardless of whether that price is directly observable or estimated using another valuation technique. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within a fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For the purpose of fair value disclosures, Council has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

In addition, Council determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Note 1 Significant accounting policies (cont.)

(g) Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits at call, and other highly liquid investments with original maturities of 90 days or less, net of outstanding bank overdrafts.

(h) Trade and other receivables

Receivables are carried at amortised cost using the effective interest rate method. A provision for doubtful debts is recognised when there is objective evidence that an impairment has occurred.

(i) Other financial assets

Other financial assets are valued at fair value, being market value, at balance date. Term deposits are measured at amortised cost. Any unrealised gains and losses on holdings at balance date are recognised as either a revenue or expense.

(j) Inventories

Inventories held for distribution are measured at cost adjusted when applicable for any loss of service potential. Inventories are measured at the lower of cost and net realisable value.

All other inventories, including land held for sale, are measured at the lower of cost and net realisable value. Where Inventories are acquired for no cost or nominal consideration, they are measured at current replacement cost at the date of acquisition.

(k) Recognition and measurement of property, infrastructure plant and equipment Acquisition

The purchase method of accounting is used for all acquisitions of assets, being the fair value of assets provided as consideration at the date of acquisition plus any incidental costs attributable to the acquisition. Fair value is the amount for which the asset could be exchanged between knowledgeable willing parties in an arm's length transaction.

Where assets are constructed by Council, cost includes all materials used in construction, direct labour, borrowing costs incurred during construction, and an appropriate share of directly attributable variable and fixed overheads. In accordance with Council's policy, the threshold limits detailed in Note 1 (I) have applied when recognising assets within an applicable asset class and unless otherwise stated are consistent with the prior year. *Revaluation*

Subsequent to the initial recognition of assets, non-current physical assets, other than plant and equipment, are measured at their fair value, being the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. At balance date, the Council reviewed the carrying value of the individual classes of assets measured at fair value to ensure that each asset materially approximated its fair value. Where the carrying value materially differed from the fair value at balance date, the class of asset was revalued.

Fair value valuations are determined in accordance with a valuation hierarchy. Changes to the valuation hierarchy will only occur if an external change in the restrictions or limitations of use on an asset result in changes to the permissible or practical highest and best use of the asset. Further details regarding the fair value hierarchy are disclosed at Note 22, Property, infrastructure, plant and equipment.

In addition, Council undertakes a formal revaluation of land, buildings, and infrastructure assets on a regular basis ranging from 1 to 3 years. The valuation is performed either by experienced council officers or independent experts.

Where the assets are revalued, the revaluation increments are credited directly to the asset revaluation reserve except to the extent that an increment reverses a prior year decrement for that class of asset that had been recognised as an expense in which case the increment is recognised as revenue up to the amount of the expense. Revaluation decrements are recognised as an expense except where prior increments are included in the asset revaluation reserve for that class of asset in which case the decrement is taken to the reserve to the extent of the remaining increments. Within the same class of assets, revaluation increments and decrements within the year are offset.

Land under roads

Council recognises land under roads it controls at fair value since 30 June 2008.

Note 1 Significant accounting policies (cont.)

(I) Depreciation of property, infrastructure, plant and equipment

Buildings, land improvements, plant and equipment, infrastructure, and other assets having limited useful lives are systematically depreciated over their useful lives to the Council in a manner which reflects consumption of the service potential embodied in those assets. Estimates of remaining useful lives and residual values are made on a regular basis with major asset classes reassessed annually. Depreciation rates and methods are reviewed annually.

Where assets have separate identifiable components that are subject to regular replacement, these components are assigned distinct useful lives and residual values and a separate depreciation rate is determined for each component.

Road earthworks are not depreciated on the basis that they are assessed as not having a limited useful life. Straight line depreciation is charged based on the residual useful life as determined each year.

Depreciation periods used are listed below and have changed compared to previous year. The impact on current value due to change in depreciation period was \$14.99M as detailed below.

Asset Category	Impact \$'000	Average useful life (Years)		Curren	t Value \$'000
		2016	2015	2016	2015
Roads	4,878	130	100	267,230	262,352
Kerb & Channel	2,030	120	80	17,427	15,397
Bridges	4,127	150	100	20,763	16,636
Major Culverts	935	120	100	8,290	7,355
Footpaths	320	90	80	12,985	12,665
Drainage	2,705	120	100	26,132	23,427
Total	14,995			352,827	337,832

Asset recognition thresholds and depreciation periods	Depreciation Period	Threshold Limit
<u>Property</u>		\$'000
land	-	No Threshold
land improvements	-	10
<u>Buildings</u>		
heritage buildings	100 years	15
buildings	20 to 50 years	15
building improvements	20 to 50 years	15
Plant and Equipment		
major plant, machinery and equipment	1 to 20 years	No Threshold
fixtures, fittings and furniture	1 to 5 years	15
computers and telecommunications	1 to 5 years	15
Infrastructure		
road pavements	130 years	No Threshold
road seals	15 years	No Threshold
road formation and earthworks	not depreciated	No Threshold
road kerbs & channel	120 years	15
bridges	150 Years	15
major culverts	120 years	15
footpaths and cycleways	90 years	15
off street car parks pavement	130 years	15
off street car parks seal	15 years	15
drainage	120 Years	15
waste management	4 to 50 years	15
other structures	10 to 40 Years	15

(m) Repairs and maintenance

Routine maintenance, repair costs, and minor renewal costs are expensed as incurred. Where the repair relates to the replacement of a component of an asset and the cost exceeds the capitalisation threshold the cost is capitalised and depreciated. The carrying value of the replaced asset is expensed.

Note 1 Significant accounting policies (cont.)

(n) Investment property

Investment property, comprising freehold office complexes, is held to generate long-term rental yields. Investment property is measured initially at cost, including transaction costs. Costs incurred subsequent to initial acquisition are capitalised when it is probable that future economic benefit in excess of the originally assessed performance of the asset will flow to the Council. Subsequent to initial recognition at cost, investment property is carried at fair value, determined annually by independent valuers. Changes to fair value are recorded in the comprehensive income statement in the period that they arise. Rental income from the leasing of investment properties is recognised in the comprehensive income statement on a straight line basis over the lease term.

(o) Impairment of assets

At each reporting date, the Council reviews the carrying value of its assets to determine whether there is any indication that these assets have been impaired. If such an indication exists, the recoverable amount of the asset, being the higher of the asset's fair value less costs to sell and value in use, is compared to the assets carrying value. Any excess of the assets carrying value over its recoverable amount is expensed to the comprehensive income statement, unless the asset is carried at the revalued amount in which case, the impairment loss is recognised directly against the revaluation surplus in respect of the same class of asset to the extent that the impairment loss does not exceed the amount in the revaluation surplus for that same class of asset.

(p) Trust funds and deposits

Amounts received as deposits and retention amounts controlled by Council are recognised as trust funds until they are returned, transferred in accordance with the purpose of the receipt, or forfeited (refer to Note 25).

(q) Borrowings

Borrowings are initially measured at fair value, being the cost of the interest bearing liabilities, net of transaction costs. The measurement basis subsequent to initial recognition depends on whether the Council has categorised its interest-bearing liabilities as either financial liabilities designated at fair value through the profit and loss, or financial liabilities at amortised cost. Any difference between the initial recognised amount and the redemption value is recognised in net result over the period of the borrowing using the effective interest method.

The classification depends on the nature and purpose of the interest bearing liabilities. The Council determines the classification of its interest bearing liabilities at initial recognition.

Borrowing costs

Borrowing costs are recognised as an expense in the period in which they are incurred, except where they are capitalised as part of a qualifying asset constructed by Council. Except where specific borrowings are obtained for the purpose of specific asset acquisition, the weighted average interest rate applicable to borrowings at balance date, excluding borrowings associated with superannuation, is used to determine the borrowing costs to be capitalised.

Borrowing costs include interest on bank overdrafts and interest on borrowings.

(r) Employee costs and benefits

The calculation of employee costs and benefits includes all relevant on-costs and are calculated as follows at reporting date.

Wages and salaries and annual leave

Liabilities for wages and salaries, including non-monetary benefits, annual leave and accumulated sick leave expected to be wholly settled within 12 months of the reporting date are recognised in the provision for employee benefits in respect of employee services up to the reporting date, classified as current liabilities and measured at their nominal values.

Liabilities that are not expected to be wholly settled within 12 months of the reporting date are recognised in the provision for employee benefits as current liabilities, measured at present value of the amounts expected to be paid when the liabilities are settled using the remuneration rate expected to apply at the time of settlement.

Liability for long service leave (LSL) is recognised in the provision for employee benefits.

Current Liability - unconditional LSL is disclosed as a current liability even when the council does not expect to settle the liability within 12 months because it will not have the unconditional right to defer settlement of the entitlement should an employee take leave within 12 months

The components of this current liability are measured at :

- present value component that is not expected to be wholly settled within 12 months.
- nominal value component that is expected to be wholly settled within 12 months.

Note 1 Significant accounting policies (cont.)

(r) Employee costs and benefits (cont.)

Classification of employee costs

Non-current liability - conditional LSL that has been accrued, where an employee is yet to reach a qualifying term of employment, is disclosed as a non - current liability. There is an unconditional right to defer settlement of the entitlement until the employee has completed the requisite years of service. This non-current LSL liability is measured at present value.

(s) Landfill rehabilitation provision

Council is obligated to restore its Koonwarra landfill site to a particular standard. The forecast life of the site is based on current estimates of remaining capacity and the forecast rate of infill. The provision for landfill restoration has been calculated based on the present value of the expected cost of works to be undertaken. The expected cost of works has been estimated based on current understanding of work required to reinstate the site to a suitable standard. Accordingly, the estimation of the provision required is dependent on the accuracy of the forecast timing of the work, work required and related costs.

(t) Leases

Operating leases

Lease payments for operating leases are required by the accounting standard to be recognised on a straight line basis, rather than expensed in the years in which they are incurred.

Leasehold improvements

Leasehold improvements are recognised at cost and are amortised over the unexpired period of the lease or the estimated useful life of the improvement, whichever is the shorter.

(u) Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Tax Office. In these circumstances the GST is recognised as part of the cost of acquisition of the asset or as part of an item of the expense. Receivables and payables in the balance sheet are shown inclusive of GST.

Cash flows are presented in the Statement of Cash flows on a gross basis, except for the GST component of investing and financing activities, which are disclosed as operating cash flows.

(v) Financial quarantees

Financial guarantee contracts are not recognised as a liability in the balance sheet unless the lender has exercised their right to call on the guarantee or Council has other reasons to believe that it is probably that that right will be exercised. Details of guarantees that Council has provided, that are not recognised in the balance sheet are disclosed at Note 34 Contingent Liabilities and Contingent Assets.

(w) Contingent assets and contingent liabilities and commitments

Contingent assets and contingent liabilities are not recognised in the Balance Sheet, but are disclosed by way of a note and, if quantifiable, are measured at nominal value. Contingent assets and liabilities are presented inclusive of GST receivable or payable respectively.

Commitments are not recognised in the Balance Sheet. Commitments are disclosed at their nominal value by way of note and presented inclusive of the GST payable.

(x) Pending accounting standards

Certain new AAS's have been issued that are not mandatory for the 30 June 2016 reporting period. Council has assessed these pending standards and has identified that no material impact will flow from the application of these standards in future reporting periods.

(y) Rounding

Unless otherwise stated, amounts in the financial report have been rounded to the nearest thousand dollars. Figures in the financial statement may not equate due to rounding.

Note 2 Budget comparison

The budget comparison notes compare Council's financial plan, expressed through its annual budget, with actual performance. The Local Government (Planning and Reporting) Regulations 2014 requires explanation of any material variances. Council has adopted a materiality threshold of the lower of 5 percent or \$100K where further explanation is warranted. Explanations have not been provided for variations below the materiality threshold unless the variance is considered to be material because of its nature.

The budget figures detailed below are those adopted by Council on 24 June 2015. The Budget was based on assumptions that were relevant at the time of adoption of the Budget. Council sets guidelines and parameters for revenue and expense targets in this budget in order to meet Council's planning and financial performance targets for both the short and long-term. The budget did not reflect any changes to equity resulting from asset revaluations, as their impacts were not considered predictable.

These notes are prepared to meet the requirements of the Local Government Act 1989 and the Local Government (Planning and Reporting) Regulations 2014 .

Surplus for the year	5,292	4,234	(1,058)	

(i) Explanation Variance Ref.	(i) Explanation of material variations Variance Ref. Item Explanation						
1	Rates and charges	Supplementary waste charges were higher by \$207K and supplementary general rates were higher by \$102K					
2	Statutory fees and fines	New and amendment applications received for statutory planning fees was below expected numbers. However revenue from fees in local laws was higher than estimate.					
3	Grants - Operating	50% of Grants commission allocation (\$4.3M) relating to 2015-16 was received in advance in 2014-15. Further State grants for Agnes falls (\$300K) and Great Southern Rail Trial (\$500K) was not received in 2015-16. This was partly compensated by higher grants for natural disaster and a few other projects.					
4	Grants - Capital	New and additional grants received for Federal blackspot program (\$667K), Child care hub (\$160K), Public jetty upgrade (\$113K), Recycling project (\$54K), Roads to recovery (\$1.4M). Grants not received was for Foster Streetscape(\$347K).					
5	Contributions - monetary	Contribution expected for Child care hub (\$100K) was not received in 2015-16. This was partly compensated by higher contribution for other projects.					
6	Contributions - non monetary	Developer contributed infrastructure assets was higher than estimate by \$259K.					
7	Net gain on disposal of property, infrastructure plant and equipment	Most of the land sales budgeted in 2015-16 has been postponed to future years. Fleet sales were also lower than originally planned and has been carried forward to 2016-17.					
8	Share of net profits / (losses) of associates and joint ventures	Council share of \$119K surplus from Library was unexpected and not budgeted for.					

Note 2 Budget comparison (cont.)

12

a) Income and Expenditure (cont.)

(i) Explanation of material variations (cont.)

Variance Ref. 9	Item Other Income
10	Bad and doubtful debts
11	Depreciation

Other expenses

Explanation

Higher income mainly from Interest on investments (\$100K), private works (\$444K), WorkCover & other reimbursements (\$207K) and Fuel tax credits (\$45K). Lower income was mainly in retail sales at Coal Creek (\$90K). Unexpected bad debts due to liquidation of a debtor and provision for other doubtful debts.

Lower depreciation mainly due to change in useful lives of infrastructure assets.

Community grants which were budgeted for payment in 2015-16 were either reduced or carried forward to 2016-17.

(i) Explanation of material variations

(i) Explanation	or material variations	
Variance Ref.	Item Land	Explanation Land acquisition costs were marginally higher (\$18K) than budget.
2	Buildings	Caravan park toilet block project (\$377K), and building renewal program (\$376) and certain other projects have been carried forward to 2016-17. This was partly compensated by expenditure on public toilets \$163K.
3	Heritage Building	Capital expenditure budget for Coal Creek was classified as Heritage building .
4	Plant, machinery and equipment	Fleet (\$291K) and Plant (\$97K) purchases were carried forward to 2016-17.
5	Computers and telecommunications	A number of Information technology projects such as network infrastructure (\$359), governance software (\$42K), unified communications (\$103K), and GIS (\$78K) were carried forward to 2016-17.
6	Roads	Expenditure on Re-seals (\$419K), sealed rehabilitation program (\$1.9M) and Foster streetscape (\$832K) were carried forward while new projects such as Grand ridge road (\$1.2M), Princess street (\$630K), A'Beckett street (\$331K), Federal Blackspot program (\$674k), Carmondys road (\$505K) and other minor road projects were added.
7	Bridges	Bridges rehabilitation programs were carried forward to future years.
8	Drainage	New programs included in drainage rehabilitation included Hannah rise cresent (\$23K) and Drouin road (\$32K).
9	Waste management	Landfill Cell construction expenditure was carried forward to 2016-17.
10	Other infrastructure	Mainly due to carry forward of expenditure on Splash pool (\$70K), Community infrastructure projects (\$50K) and playground replacement program (\$116K).

2016	2015
\$'000	\$'000

Note 3 Rates and charges

Council uses Capital Improved Value (CIV) as the basis of valuation of all properties within the municipal district. The capital value of a property is the value that it could be reasonably expected to sell for on the open market.

The valuation base used to calculate general rates for 2015/16 was \$7,083 million (2014/15 \$6,976 million) The rates for each classification was:-

Total rates and charges	38,584	35,797
Garbage Charges	2,438	1,810
Supplementary Rates & Rate Adjustments	598	399
Special Rates	-	145
Municipal Charge	-	3,326
Cultural & Recreational Land	23	17
Vacant Land	2,366	1,883
Rural Residential	87	-
Farm	9,709	9,240
Commercial	1,381	1,133
Industrial	1,197	821
General	20,785	17,023

The date of the latest general revaluation of land for rating purposes within the municipal district was 1 January 2016, and the valuation first applies to the rating year commencing 1 July 2016.

the valuation first applies to the rating year commencing 1 July 2016.

Note 22 Property, Infrastructure Plant and Equipment (cont.)

Valuation of land and buildings

Valuation of Land and buildings were undertaken by Andrew Begg, AAPI (Council Employee). The basis of valuation is at fair value, being market value based on highest and best use permitted by relevant land planning provisions. Where land use is restricted through existing planning provisions the valuation is reduced to reflect this limitation. This adjustment is an unobservable input in the valuation. The adjustment has no impact on the comprehensive income statement.

Specialised land is valued at fair value using site values adjusted for englobo (undeveloped and/or unserviced) characteristics, access rights and private interests of other parties and entitlements of infrastructure assets and services. This adjustment is an unobservable input in the valuation. The adjustment has no impact on the comprehensive income statement.

Any significant movement in the unobservable inputs for land and land under roads will have a significant impact on the fair value of these assets.

Details of the Council's land and buildings and information about the fair value hierarchy as at 30 June 2016 are as follows:

	Level 1	Level 2	Level 3
Land Specialised	-	-	45,616
Land under roads	-	-	32,966
Heritage buildings	-	-	1,351
Building specialised	-	-	41,638
Total	-	-	121.571

Valuation of infrastructure

Valuation of Council's, infrastructure assets was performed by John Moylan, BE Civil Engineering, MBA(Tech Mgt) (Council employee). The valuation is at fair value based on replacement cost less accumulated depreciation as at the date of valuation.

Details of the Council's infrastructure and information about the fair value hierarchy as at 30 June 2016 are as follows:

	Level 1	Level 2	Level 3
Roads	-	-	267,229
Bridges	-	-	37,420
Major Culverts	-	-	8,588
Footpaths and cycleways	-	-	16,224

Waste Management	-	-	1,160
Other infrastructure	-	-	4,527
Total	-	-	381,499

Description of significant unobservable inputs into level 3 valuation

Specialised land and land under roads is valued using a market based direct comparison technique. Significant unobservable inputs include the extent and impact of restriction of use and the market cost of land per square metre. The extent and impact of restrictions on use varies and results in a reduction to surrounding land values between 5% and 95%. The market value of land varies significantly depending on the location of the land and the current market conditions. Currently land values range between \$1 and \$826 per square metre.

Specialised buildings are valued using a depreciated replacement cost technique. Significant unobservable inputs include the current replacement cost and remaining useful lives of buildings. Current replacement costs is calculated on a square metre basis and ranges from \$500 to \$5000 per square metre. The remaining useful lives of buildings are determined on the basis of the current condition of buildings and vary from 20 years to 50 years. Replacement cost is sensitive to changes in market conditions, with any increase or decrease in cost flowing through to the valuation. Useful lives of buildings are sensitive to changes in expectations or requirements that could either shorten or extend the useful lives of buildings.

Infrastructure assets are valued based on the depreciated replacement cost. Significant unobservable inputs include the current replacement cost and remaining useful lives of infrastructure. The remaining useful lives of infrastructure assets are determined on the basis of the current condition of the asset and vary from 4 years to 150 years. Replacement cost is sensitive to changes in market conditions, with any increase or decrease in cost flowing through to the valuation. Useful lives of infrastructure are sensitive to changes in use, expectations or requirements that could either shorten or extend the useful lives of infrastructure assets.

Valuation of investment property

Valuation of investment property has been determined in accordance with an independent valuation by Marc Babos, AAPI (Council employee) who has recent experience in the location and category of the property being valued. The valuation is at fair value, based on the current market value for the property.

Payables	1,504	986

Fire Services levy	365	379
Retention amounts	25	47
Other Deposits	282	418
Total trust funds and deposits	873	1,065

Purpose and nature of items

Refundable deposits - Deposits are taken by council as a form of surety in a number of circumstances, including in relation to building works, tender deposits, contract deposits and the use of civic facilities

Fire Service Levy - Council is the collection agent for fire services levy on behalf of the State Government. Council remits amounts received on a quarterly basis. Amounts disclosed here will be remitted to the state government in line with that process.

Retention Amounts - Council has a contractual right to retain certain amounts until a contractor has met certain requirements or a related warrant or defect period has elapsed. Subject to the satisfactory completion of the contractual obligations, or the elapsing of time, these amounts will be paid to the relevant contractor in line with Council's contractual obligations.

Public Open Space

Statutory reserve to be used for the future development of land for public purposes.

Caravan Parks Reserve

Reserve created for future funding of Caravan Parks projects

General Reserve

Reserve to provide for likely defined benefit superannuation funding calls and unforeseen and unavoidable future costs.

Corner Inlet Seawall Reserve

Reserve for the maintenance of a seawall to protect private lands from flooding.

Henry's Road Reserve

Reserve for contributions made by developers for future road improvement works.

Loan Reserve

Reserve created to repay outstanding Loan at the end of its term.

Note 32 Operating Leases		
(a) Operating lease commitments		
At the reporting date, the Council had the following obligations under non-cancellable operating lease of plant and equipment and land and buildings for use within Council's activities (these obnot recognised as liabilities).		
Not later than one year	197	116
Later than one year and not later than five years	345	109
Later than five years	1	-
Total operating lease commitments	543	225

(b) Operating lease receivables

The Council has entered into commercial property leases on its investment property, consisting of surplus freehold office complexes and a quarry site. These properties held under operating leases have remaining non-cancellable lease terms of between 1 and 10 years. All leases include a CPI based revision of the rental charge annually.

Future minimum rentals receivable under non-cancellable operating leases are as follows:

Not later than one year	119	154
Later than one year and not later than five years	219	321
Later than five years	428	450
Total operating lease receivables	766	925

Note 33 Superannuation

Council makes majority of its employer superannuation contributions in respect of its employees to the Local Authorities Superannuation Fund (the Fund). This Fund has two categories of membership, accumulation and defined benefit, each of which is funded differently. Obligations for contributions to the Fund are recognised as an expense in the Comprehensive Income Statement when they are made or due.

Accumulation

The Fund's accumulation categories, Vision MySuper/Vision Super Saver, receive both employer and employee contributions on a progressive basis. Employer contributions are normally based on a fixed percentage of employee earnings (for the year ended 30 June 2016, this was 9.5% as required under Superannuation Guarantee legislation).

Defined Benefit

Council does not use defined benefit accounting for its defined benefit obligations under the Fund's Defined Benefit category. This is because the Fund's Defined Benefit category is a pooled multi-employer sponsored plan.

There is no proportional split of the defined benefit liabilities, assets or costs between the participating employers as the defined benefit obligation is a floating obligation between the participating employers and the only time that the aggregate obligation is allocated to specific employers is when a call is made. As a result, the level of participation of Council in the Fund cannot be measured as a percentage compared with other participating employers. Therefore, the Fund Actuary is unable to allocate benefit liabilities, assets and costs between employers for the purposes of AASB 119.

Note 33 Superannuation (cont.)

Funding arrangements

Council makes employer contributions to the Defined Benefit category of the Fund at rates determined by the Trustee on the advice of the Fund Actuary.

As at 30 June 2015, an interim actuarial investigation was held as the Fund provides lifetime pensions in the Defined Benefit category. The vested benefit index (VBI) of the Defined Benefit category of which Council is a contributing employer was 105.8%. To determine the VBI, the fund Actuary used the following long-term assumptions:

Net investment returns 7.0% pa Salary information 4.25% pa Price inflation (CPI) 2.5% pa.

Vision Super has advised that the estimated VBI at 30 June 2016 was 102 %. The VBI is to be used as the primary funding indicator. Because the VBI was above 100%, the 2015 interim actuarial investigation determined the Defined Benefit category was in a satisfactory financial position and that no change was necessary to the Defined Benefit category's funding arrangements from prior years.

Employer contributions

Regular contributions

On the basis of the results of the 2015 interim actuarial investigation conducted by the Fund Actuary, Council makes employer contributions to the Fund's Defined Benefit category at rates determined by the Fund's Trustee. For the year ended 30 June 2016, this rate was 9.5% of members' salaries (9.5% in 2014/2015). This rate will increase in line with any increase to the contribution rate. In addition, Council reimburses the Fund to cover the excess of the benefits paid as a consequence of retrenchment above the funded resignation or retirement benefit.

Funding calls

If the Defined Benefit category is in an unsatisfactory financial position at an actuarial investigation or the Defined Benefit category's VBI is below its shortfall limit at any time other than the date of the actuarial investigation, the Defined Benefit category has a shortfall for the purposes of SPS 160 and the Fund is required to put a plan in place so that the shortfall is fully funded within three years of the shortfall occurring. The Fund monitors its VBI on a quarterly basis and the Fund has set its shortfall limit at 97%.

In the event that the Fund Actuary determines that there is a shortfall based on the above requirement, the Fund's participating employers (including Council) are required to make an employer contribution to cover the shortfall. Using the agreed methodology, the shortfall amount is apportioned between the participating employers based on the pre-1 July 1993 and post-30 June 1993 service liabilities of the Fund's Defined Benefit category, together with the employer's payroll at 30 June 1993 and at the date the shortfall has been calculated.

Due to the nature of the contractual obligations between the participating employers and the Fund, and that the Fund includes lifetime pensioners and their reversionary beneficiaries, it is unlikely that the Fund will be wound up. If there is a surplus in the Fund, the surplus cannot be returned to the participating employers. In the event that a participating employer is wound-up, the defined benefit obligations of that employer will be transferred to that employer's successor.

Note 33 Superannuation (cont.) 2015 Interim actuarial investigation surplus amounts

The Fund's interim actuarial investigation as at 30 June 2015 identified the following in the defined benefit category of which Council is a contributing employer:

A VBI surplus of \$130.8 million; and

A total service liability surplus of \$239 million.

The VBI surplus means that the market value of the fund's assets supporting the defined benefit obligations exceed the vested benefits that the defined benefit members would have been entitled to if they had all exited on 30 June 2015. The total service liability surplus means that the current value of the assets in the Fund's Defined Benefit category plus expected future contributions exceeds the value of expected future benefits and expenses. Council was notified of the 30 June 2015 VBI during August 2015.

Future superannuation contributions

The expected contributions to be paid to the Defined Benefit category of Vision Super for the year ending 30 June 2017 is \$145,000.

Note 34 Contingent liabilities and contingent assets Contingent liabilities Superannuation

Council has obligations under a defined benefit superannuation scheme that may result in the need to make additional contributions to the scheme, matters relating to this potential obligation are outlined in Note 33. As a result of the volatility in financial markets the likelihood of making such contributions in future periods exists. At this point in time it is not known if additional contributions will be required, their timing or potential amount.

Landfills

Under requirement of the Environmental Protection Authority (EPA), Council has a present obligation to perform site rehabilitation works for landfills that it operates on a progressive basis. At balance date Council has made necessary provisions for rehabilitation of Landfills that are currently in operation (Refer note 26 (b)). However the estimates of provision required is dependent on the accuracy of the forecast, timing of the work, work required, and related costs.

Guarantees

Council has taken out Bank Guarantees with Commonwealth Bank of Australia as per details below:

Description	Favouree	Amount
Contract Performance Guarantee	South Gippsland Regional Water Board	\$ 40,000
Contract Performance Guarantee	Department of Energy and Minerals	\$ 15,000
Contract Performance Guarantee	Department of Natural Resources & Minerals	\$ 20,000
Security Deposit Guarantee	Environment Protection Authority	\$ 425,000
Security Deposit Guarantee	State of Victoria - Environment Protection Authority	\$ 451,296
Total contingent liability as at 30 June 2016		\$ 951,296

Contingent assets

Developer contributions to be received by Council in respect of estates currently under development total \$413K (2015 \$749K).

Note 35 Financial instruments

(a) Objectives and policies

The Council's principal financial instruments comprise cash assets, term deposits, receivables (excluding statutory receivables), payables (excluding statutory payables) and bank borrowings. Details of the significant accounting policies and methods adopted, including the criteria for recognition the basis of measurement and the basis on which income and expenses are recognised, in respect of each class of financial asset, financial liability and equity instrument is disclosed in Note 1 of the financial statements. Risk management is carried out by senior management under policies approved by the Council. These policies include identification and analysis of the risk exposure to Council and appropriate procedures, controls and risk minimisation.

(b) Market risk

Market risk is the risk that the fair value or future cash flows of our financial instruments will fluctuate because of changes in market prices. The Council's exposures to market risk is primarily through interest rate risk with only insignificant exposure to other price risks and no exposure to foreign currency risk.

Interest rate risk

Interest rate risk refers to the risk that the value of a financial instrument or cash flows associated with the instrument will fluctuate due to changes in market interest rates. Our interest rate liability risk arises primarily from long term loans and borrowings at fixed rates which exposes us to fair value interest rate risk / Council does not hold any interest bearing financial instruments that are measured at fair value, and therefore has no exposure to fair value interest rate risk. Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Council has minimal exposure to cash flow interest rate risk through its cash and deposits that are at floating rate.

Investment of surplus funds is made with approved financial institutions under the Local Government Act 1989. We manage interest rate risk by adopting an investment policy that ensures:

- diversification of investment product,
- monitoring of return on investment,
- benchmarking of returns and comparison with budget.

There has been no significant change in the Council's exposure, or its objectives, policies and processes for managing interest rate risk or the methods used to measure this risk from the previous reporting period.

Interest rate movements have not been sufficiently significant during the year to have an impact on the Council's year end result.

(c) Credit risk

Credit risk is the risk that a contracting entity will not complete its obligations under a financial instrument and cause us to make a financial loss. We have exposure to credit risk on some financial assets included in our balance sheet. To help manage this risk:

- we have a policy for establishing credit limits for the entities we deal with;
- we may require collateral where appropriate; and
- we only invest surplus funds with financial institutions which have a recognised credit rating specified in our investment policy. Receivables consist of a large number of customers, spread across the ratepayer, business and government sectors. Credit risk associated with the Council's financial assets is minimal because the main debtor is secured by a charge over the rateable property.

There are no material financial assets which are individually determined to be impaired.

We may also be subject to credit risk for transactions which are not included in the balance sheet, such as when we provide a guarantee for another party. Details of our contingent liabilities are disclosed in note 34.

The maximum exposure to credit risk at the reporting date to recognised financial assets is the carrying amount, net of any provisions for impairment of those assets, as disclosed in the balance sheet and notes to the financial statements. Council does not hold any collateral.

(d) Liquidity risk

Liquidity risk includes the risk that, as a result of our operational liquidity requirements or we will not have sufficient funds to settle a transaction when required, we will be forced to sell a financial asset at below value or may be unable to settle or recover a financial asset.

To help reduce these risks Council:

- have a liquidity policy which targets a minimum and average level of cash and cash equivalents to be maintained;
- have readily accessible standby facilities and other funding arrangements in place;
- have a liquidity portfolio structure that requires surplus funds to be invested within various bands of liquid instruments;
- monitor budget to actual performance on a regular basis; and
- set limits on borrowings relating to the percentage of loans to rate revenue and percentage of loan principal repayments to rate revenue.

Note 35 Financial instruments (cont.)

(d) Liquidity risk (cont.)

The Council's maximum exposure to liquidity risk is the carrying amounts of financial liabilities as disclosed in the face of the balance sheet and the amounts related to financial guarantees disclosed in Note 34, and is deemed insignificant based on prior periods' data and current assessment of risk.

There has been no significant change in Council's exposure, or its objectives, policies and processes for managing liquidity risk or the methods used to measure this risk from the previous reporting period.

With the exception of borrowings, all financial liabilities are expected to be settled within normal terms of trade. Details of the maturity profile for borrowings are disclosed at Note 27.

Unless otherwise stated, the carrying amounts of financial instruments reflect their fair value.

e) Fair value

Unless otherwise stated, the carrying amount of financial instruments reflect their fair value Fair value hierarchy

Council's financial assets and liabilities are not valued in accordance with the fair value hierarchy, Council's financial assets and liabilities are measured at amortised cost.

(f) Sensitivity disclosure analysis

Taking into account past performance, future expectations, economic forecasts, and management's knowledge and experience of the financial markets, Council believes the following movements are 'reasonably possible' over the next 12 months:

- A parallel shift of + 1% and -1% in market interest rates (AUD) from year-end rates of 2%.

These movements will not have a material impact on the valuation of Council's financial assets and liabilities, nor will they have a material impact on the results of Council's operations.

Note 36 Related party transactions

(i) Responsible Persons

Names of persons holding the position of a Responsible Person at the South Gippsland Shire Council at any time during the year are :-

Councillors

Robert Newton (Mayor from 4 November 2015 to 30 June 2016)

Jeanette Harding (Mayor from 1 July 2015 to 3 November 2015)

Mohya Davies Kieran Kennedy Lorraine Brunt Andrew McEwen James Fawcett Don Hill

Nigel Hutchinson-Brooks

Chief Executive Officer Tim Tamlin

(ii) Remuneration of responsible persons

The number of Responsible Officers, whose total remuneration from Council and any related entities fall within the following bands:

	2016	2015
	No.	No.
